

# Subject Index

- Acoustic characteristics
  - temperature dependence 101–102
- Alternate method 120
- Antenna 114
- Aperture synthesis thermography 55–56
- Applicator 117–118
  - microstrip, microslot 118
  - multiapplicator 121
- Applied potential tomography (*see* Electrical impedance tomography)
- Attenuation 115
  - electric field 115
  - power 114, 115
- Bandwidth** 114, 115
- Bioheat transfer equation 112, 125
- Black body 113
- Blood flow 38, 72–73, 79, 125
- Brightness 113
- Bolus 122
- Calibration**
  - preliminary 117
  - radiometer 118
  - thermometry 22–23
- Captor 114
- Catheters
  - thermometry 7–8
- Combined heating and monitoring 57, 88–89
- Comparison
  - theory experiment 127
- Computation
  - radiometric signal 119
  - thermal signal 122
- Computer programs 126
- Contrast 43, 75
- Control
  - microwave hyperthermia 119
  - non invasive 35, 36
  - radiofrequency hyperthermia 122
  - temperature 9–13
- Cooling system 119, 121
- CT number 58–63
  - temperature dependence of 61
- Depth of view** 49–50
- Dielectric
  - constants 114, 115
  - properties 50–51, 68–72, 87
  - temperature dependence 72, 76
- tissue 71, 72
- Diffraction 81, 83–84
- Electrical impedance tomography 73–81
- Emissivity 115
- Equivalent current 84
- Frequency choice 115
- HYLCAR** 120
- Hyperthermia
  - microwave 119
  - monitoring 113
  - radiofrequency 112
- Image**
  - content 42
  - quality 43, 59, 65
- Imaging**
  - active 39–40
  - classification of modalities 39
  - electrical impedance 73–81
  - generalized 98
  - microwave 54–60, 81–97
  - NMR 63–68
  - passive 39–40
  - qualitative 42
  - quantitative 42
  - ultrasound 101–107
  - X-ray 57–63
- Infrared thermography 48
- Interpretation of radiometric measurements 50
- Inverse scattering 97–101
- Layered material** 123
- Medium**
  - boundaries 125
  - liquid emissive 118
  - lossy 119
  - multilayered 125
- Method**
  - discrete finite differences 125
  - pseudo zero 117
  - zero 116, 117
- Microwave 113, 114, 116, 119, 120, 122, 123
  - camera 83, 87–96
  - circular scanner 83
  - imaging 81–97
  - radiometry 47–58, 89–95
- Model**
  - multilayered 123
- Modeling**
  - mathematical 29
- Noise 45, 65, 75, 86
  - temperature 49
- NMR tomography 63–68
- Nyquist formula 114
- Optimization**
  - hyperthermia treatments 100
  - operating frequency 86–87
- Penetration depth** 50, 114, 115
- Plane wave 114, 115, 125
- Plank's law 113
- Point response 43–44
- Probes (*see* Temperature probes)
  - invasive 1, 13–21, 31
- Radiofrequency radiation** 63, 64, 65, 97–101
- Radiometer 48
  - Dicke 116
  - modified 116, 117
- Radiometric
  - measurements 114
    - interpretation 50
  - methods
    - characteristics 115
    - signal 123
    - systems 114, 116
- Radiometry 113, 119, 122, 127
  - microwave 47–58, 89–95
    - aperture synthesis 55–56
    - correlation 53
    - multi-frequency 52
    - multi-probe 53
  - ultrasound 104
- Raleigh Jean's relation 114
- Reconstruction
  - images 56, 59, 64, 74, 81–82, 98
  - temperature profile 53
- Reflection coefficient 115
- Sensitivity** 115, 116, 118
- Signal to noise ratio 60, 65, 75
- Spatial resolution 43, 49, 61, 75, 83
- Spin-lattice relaxation time T 63, 65–68
  - temperature dependence 66

- Temperature
  - apparent 117
  - control 9-13
  - medium 117
  - noise 49
  - reference 116, 117
  - receiver noise 116
  - resolution 49, 61, 67, 78, 95, 104
- Temperature probes 1
  - electrical resistance 15
  - - resistance thermometer detector (RTD) 15
  - - thermistor 15, 31
  - optical 16
  - - gallium arsenide 16, 17, 31
  - - photoluminescent 17-21, 31
  - - probe localization 3-8
- Time constant 116
- Thermal
  - conductance 125
  - dosimetry 113, 123, 127
  - mapping 5, 8
  - profile 124, 125
  - smearing 23-25
- Thermometry 1
  - artifact 21, 25-27
  - available technologies 13-21, 31
  - calibration 22-23
  - catheters 7-8
  - clinical application 3-9
  - measurement error 21
  - noninvasive 27-29
  - performance goals 1, 2
  - probes, invasive 1, 13-21, 31
- Ultrasonic techniques 101
  - active modalities 102-104
  - radiometry 104
  - thermo-induced acoustic imaging 104-107
- X-ray tomodensitometry 58-63

# **Clinical Thermology**

---

## **Subseries Thermotherapy**

Series Editor: M. Gautherie

Biological Basis of Therapeutic Hyperthermia

Methods of External Heating

Methods of Hyperthermia Control

Thermal Dosimetry and Treatment Planning

Whole-Body Hyperthermia in Clinical Oncology

Interstitial, Endocavitary and Perfusional Hyperthermia –  
Methods and Clinical Trials

---

## **Subseries Diagnosis**

Series Editor: M. Gautherie

Thermal Measuring, Recording and Imaging Techniques

Chronobiology and Thermophysiology

Clinical Thermology of Breast Diseases

Clinical Thermology of Rheumatic and Bone Diseases

---
