

# Subject Index

- abiotic elicitors 168  
acclimatization 26  
activated charcoal 26  
adventitious buds 73  
agarose 37, 57, 73, 127  
agropine 134, 148, 184, 257, 316  
*Agrobacterium rhizogenes* 13, 41, 72, 135, 147, 159, 182, 190, 234, 245, 280, 315  
*A. tumefaciens* 27, 41, 190, 214, 234, 244, 279, 295, 308, 321  
*Agrostis alba* 3–12  
*A. palustris* 3  
*A. tenuis* 10  
ajmalicine 144  
alkaloid biosynthesis 198  
ampicillin 162  
aneuploids 20  
anther culture 69  
anthraserpine derivatives 151  
antibiotics 162  
antibiotic resistance 126  
antisense gene expression 211  
antisense RNA 211  
antitumor compounds 144  
Apocyanaceae 150  
*Arabidopsis thaliana* 123–134  
asymmetrical hybridization 46  
*Atropa belladonna* 13–21, 135–143  
atropine 157
- BA 73, 216, 310  
*Bacillus thuringiensis* 249  
bacterial blight 87  
BAP 89, 113  
barley 220–233  
bioreactor 150  
biosynthesis 159  
biosynthetic potential 19  
birdsfoot trefoil 69  
bisindole alkaloids 146  
*Brassica alboglabra* 22–30
- Campanulaceae 253  
carbenicillin 138  
carbohydrates 58
- cardioactive glycosides 186  
carrot 172–181  
casein hydrolysate 113  
CAT activity 28, 272  
– assays 303  
*Catharanthus* species 144–156  
*Catharanthus roseus* 145, 152  
*C. trichophyllus* 145, 148  
cauliflower mosaic virus 126, 294, 298  
cell colonies 83  
– culture 315  
– suspension 13, 49, 55  
cellulose 6, 13, 81, 110, 124  
chimeric genes 185  
Chinese kale 22–30  
chitinase 227  
clonal propagation 203  
cocultivation 321  
cold storage 116  
colony development 7  
crown gall 146  
cryopreservation 19  
cucumber 31–45  
*Cucumis anguria* 31  
*C. melo* 31  
*C. metuliferus* 31  
*C. sativus* 31–45  
Cucurbitaceae 31  
culture conditions 60  
cybrid 46  
*Cydonia oblonga* 106  
cytokinin 26, 113, 221
- Datura* species 19, 157–171  
*Datura candida* 158  
*D. metel* 160  
*D. sanguinea* 158  
*Daucus carota* 172–181  
deadly nightshade 13–21  
differentiation 17  
*Digitalis lanata* 182  
*D. purpurea* 182–189  
digitoxin 182  
direct gene transfer 125, 270, 321  
direct needle injection 223

- disease resistance 225  
DMSO 39  
dot blot analysis 229  
driselase 81  
*Duboisia* species 190–201  
*Duboisia hopwoodii* 190  
*D. leichhardtii* 190  
*D. myoporoides* 190
- effect of sugars 270  
eggplant 321–328  
electroporation 27, 106, 114, 172, 179, 301  
ELISA 186, 188  
embryogenesis 16, 320, 322  
embryogenic callus 3, 51, 63  
embryoids 39  
enzymes 32, 35, 55  
*Erwinia amylovora* 226  
*Erysiphe graminis* 226  
escape regenerants 245  
*Eustoma grandiflorum* 202–212
- factors influencing yield 35, 55  
fermentor culture 151  
Fescues 46–68  
*Festuca* species 46–68  
figwort mosaic virus 296  
fire blight 115  
flavonoids 315  
flavonoid glycosylation 211  
flax 244–252  
Foxglove 182–189  
frost tolerance 31  
fungal elicitors 166
- gamma irradiation 203  
gene introduction 222  
– targeting 123  
– transfer 27  
genetic analysis 288, 322  
– engineering 123  
– instability 197  
– manipulation 3, 19, 75, 265, 279  
– stability 85, 152, 169  
– transformation 39, 48, 121–328  
genotypic variability 28  
geopen 297  
geraniums 87–96  
gherkins 31  
gitoxin 182  
glycyrrhizin 315  
glyphosate resistance 247  
graft compatibility 109  
grain legumes 97  
growth regulators 24, 33, 58, 111  
GUS activity 175, 216, 236, 326  
– assay 205, 303  
– gene 137
- hairy root cultures 150, 161, 191, 253, 256, 314  
hanging drop culture 37  
haploids 320  
heat shock 56  
*Helianthus annuus* 213–219  
hemicellulase 118  
herbicide resistance 246  
heterokaryons 114  
histochemical assay 225  
HPLC 163, 258  
*Hordeum vulgare* 220–233  
hormone autotrophy 136  
hygromycin resistance 127, 136  
hyoscyne 157  
hyoscyamine 13, 135, 319
- IAA 80  
indole alkaloids 153  
intermolecular recombination 132  
in vitro propagation 202  
*ipt* gene 286
- jelly melon 31
- Kalanchoe* 234–243  
*K. blossfeldiana* 234  
*K. diagremoniana* 234
- Labiatae 279  
leaf disc transformation 295  
Leguminosae 187  
linalool 289  
*Linum usitatissimum* 244–252  
Lisianthus 202–212  
*Lithospermum erythrorhizon* 151  
*Lobelia inflata* 253–264  
lobeline 254  
lobetyol 260  
lobetyolin 260  
*Lolium* species 46–68  
*Lotus* species 69–78  
*L. corniculatus* 69  
*L. tenuis* 74  
*L. uliginosus* 69  
*Lycopersicon esculentum* 265–277  
*L. peruvianum* 266
- macerozyme 13, 72, 110, 124  
Madagascar periwinkle 144–156  
male sterility 241  
manipulation of color 210  
mannitol 58  
mannopine 148, 184, 257, 316  
mannose 8

- medium 4, 24, 32, 58, 80, 99, 111, 124  
 meicelase 72, 89  
*Mentha* species 278–293  
*Mentha citrata* 287  
*M. piperita* 287  
 menthol 279, 290  
 meristem transformation 213  
 mesophyll protoplasts 90  
 microinjection 221  
 mint 278–293  
 molecular analysis 129  
   – biology 123  
 monoterpenes 278, 289  
 morphogenesis 17  
 mutagenesis 299  
 myoinositol 269
- Nicotiana edwardsonii* 294–307  
*N. plumbaginifolia* 19  
 nicotine 197  
 nopaline 236, 310  
 northern hybridization 224  
*nos* gene 286, 322  
 nurse culture 40, 57
- opines 162  
 organ culture 147  
 organogenesis 3, 26, 34, 75, 103, 113, 322
- pasture grass 3  
 pea 97–104  
 pear 105–119  
 pectinase 81  
 pectolyase 6, 118  
 PEG 39, 123, 173, 265  
*Pelargonium* species 87–96  
*Pelargonium cordifolium* 87  
*P. grandiflorum* 87  
*P. scandens* 87  
*P. x hortorum* 87  
 peppermint 278  
*Petunia hybrida* 19  
 phenolic compounds 26  
 phytochrome gene 241  
 picloram 101  
*Pisum sativum* 97–104  
 plants from protoplasts 1–119  
 plant regeneration 37, 73, 89, 101, 131, 139  
 plasmids 147, 187  
 plastid inheritance 93  
 plating density 38, 43  
   – efficiency 7, 39, 55, 73, 85, 89, 101, 131, 269  
 powdery mildew 225  
 preculture 98  
 preplasmolysis 35  
 protoclonal population 75
- variation 106, 116  
 proline 3  
 protoplast culture 24, 36, 43  
   – density 14  
   – isolation 6, 23, 70, 98, 89, 179, 301  
   – fusion 19, 39, 114  
 pulse characteristics 176  
*Pyrus* species 105–119  
*Pyrus communis* 105  
*P. pyrifolia* 105  
*P. serotina* 105
- Rauwolfia serpentina* 153  
 redtop 3–12  
 reporter gene 176, 246  
 rhizogenesis 17, 107, 192  
 rhozyme 89  
 ribose 8  
 Ri plasmid 265  
 RFLP 123  
 rooting media 203  
 rooting of shoots 83  
 root stock 106  
 Rosaceae 105  
 ryegrass 46–68
- Salvia chinensis* 308–313  
 saponin 315  
 scopolamine 13, 135, 157  
*Scopolia* species 314–319  
*S. acutangulus* 314  
*S. lurida* 314  
*S. tangutica* 314  
 scutellum 5  
 secondary metabolites 144, 159, 203  
 serpentine 144  
 shikonine 151  
 Solanaceae 13, 190, 313, 320  
*Solanum melongena* 321–328  
 somaclonal variation 34, 42, 49, 61, 93, 97, 144, 172, 203, 213  
 somatic embryogenesis 173, 322  
   – hybridization 19, 23, 63, 93, 109, 114, 196, 265  
 sorbitol 10  
 Southern blot 48, 127, 148, 188, 273  
   – hybridization 49, 162, 184, 209, 255  
 sulfonylurea resistance 248  
 sunflower 213–219  
 suspension culture 3, 89
- tannins 70  
 teratoma 289  
 tomato 265–277  
 transformation of protoplasts 302  
 transformation strategies 321  
 transformed plants 217

- transformed shoot cultures 279
- transgenic callus 322
  - plants 123, 309
  - roots 185
- transient gene expression 220, 235
- Trifolium hybridum* 46
- tropane alkaloids 13
- tropic acid 197
  
- Umbelliferae 260
  
- variant plants 49
- variations 42
- Vinca rosea* 145
- vincristin 144
- visblastine 145
  
- wolfberry 79–86
  
- xylose 8
  
- zeatin 73, 102
