

Subject Index

- 40 Hz 177
- absorption 33, 42
- acetylcholine 172
- acoustic system 82
- active points 77
- α -wave 113
- anti-co-firing 62
- apparent RF size 91
- assemblies see neuronal assemblies
- asynchronous contribution 262, 268
- asynchronous gain 262
- auditory cortex 73, 249, 257, 269, 271
- average common excitation (ACE)
 - potential 233
- average cortical neuroanatomy 89

- background stimulus 79, 95
- behavioral task 252 ff., 266
- binocular correspondence 169
- brain-slices 33

- cell assemblies see neuronal assemblies
- center-surround 81
- charge-coupled device (CCD) 43 ff.
- checkerboard model 155
- chromophore 33
- circuit selection 168
- coding properties 202
- coherence 165 ff., 184, 202
- coherent features 166
- coincidence detection 170
- coincidence of oscillation 75, 76, 97
- colour selectivity 113
- columnar organization 254, 256
- common excitation, common input 8, 54, 63, 138, 147, 243, 259 ff., 287
- complex cell 5
- connectivity, structural 53
- condensation 57
- conditioning 287
- conduction velocity 112
- context-dependent 56

- contour planes 82
- contribution 16, 146
- correlation profiles 199, 200
- correlational assemblies 53
- cortical architecture 69 ff., 99
- cortical columns 53
- cortical layers 89
- cortical network 281
 - specificity of cortical networks 292
- cortical slice 24
- cortico-geniculate transmission 11
- covariability 115–119, 120–123
- covariance computer 189
- co-firing 62
- cross-correlation, cross correlogram 5 ff., 52, 76, 105–115, 120–123, 135, 179, 199, 206, 211, 251, 258, 259, 264 ff., 271
- cumulative PSTH 96
- cytochrome 33, 42
- cytochrome oxidase blobs 148

- damped aperiodic oscillation 74 ff., 97 ff.
- delay scale 112
- dendritic field 68, 90, 91, 99
- deoxyglucose 30
- development 169, 175
- direct connections 54
- direction of motion 93, 98
- direction selectivity directionality 20, 95, 113, 144
- disynaptic connections 242, 246
- double color opponent 151
- double line model 9
- double-barrel microelectrode 7
 - dura 47, 48
- dynamic cooperativity 52
- dynamic reorganization 56
- dynamic RF properties 82 ff., 99, 100

- early vision 165
- effective connectivity 52, 249, 251, 259–261, 272

- elementary events 98, 100
- end stopping 68, 83, 95
- environment 105
- excitatory postsynaptic potential (EPSP) 23, 225, 228, 262 ff., 268, 270
- experience 169
- exuberant connections 176
- e.m.g., human 227, 228

- feature detector 68, 99
- feature linking 184, 186
- feedback 80, 97
- feeding network 187, 201
- firing rate modulation 62
- fluorescence 31, 33, 42
- frequency discrimination 89
- frontal cortex 249, 256, 269, 272
- functional connectivity 53
- functional group 99, 249

- gating systems 171
- geniculo-cortical transmission 9
- gravitational clustering 55
- gravity representation 55

- habit-reversal 254, 271
- Hebb rules 170
- hebbian assemblies 53
- Hebb-synapse 106
- hemoglobin 33, 42, 47
- high frequency oscillation 71 ff.
- higher brain functions 250, 256
- horizontal connections 134
- horseradish peroxidase (HRP) 135
- hypercomplexity 68, 83, 95, 98

- idiosyncratic temporal structure 101
- inhibition 56, 69, 91, 92
- inhibitory postsynaptic potential (IPSP) 21
- interareal interaction 96, 201
- interareal synchronization 207
- intercostal motoneurons 244, 225–227
 - inputs from bulbospinal neurons 240, 241
 - pattern of inputs 238–240
 - spatial distribution of synchronization 238–240
- interneurons 54
- interpeak interval 74, 88
- interspike interval 88
- intracolumnar interaction 18, 167, 175
- intracolumnar transmission 12
- intrinsic dynamic properties 100
- isoluminant color contrast 152
- IT 70, 96, 97

- Joint Peri Stimulus Time Histogram (JPSTH) 54, 61 ff., 261, 266, 272, 273

- latency 112
- lateral geniculate nucleus (LGN) 71, 74, 81, 96 ff.
- light-scattering 33, 42
- linking features 186, 212
- linking field 185, 217
- linking network 185, 201, 211
- local assembly 217
- local field potential (LFP) 40, 191
- local mass signals 190
- local oscillator 212
- long-term potentiation 173
- low frequency oscillation 69, 71 ff., 97
- LP Pulvinar 70

- membrane potential 263, 265
- microset 287
- model neurons 185, 212
- modified type II 151
- modulatory systems 171
- monosynaptic connection 241, 242
- monosynaptic input 138
- motoneuron synchronization 225, 228, 244
 - broad peak synchronization 229
 - high frequency oscillation (HFO) 229, 245
 - presynaptic synchronization 228, 232, 245, 246
 - purring 231
 - respiratory periodicity 229
 - short-term synchronization 231, 245
- motoneurons 225
- MT 70
- multiple microelectrode 6, 106, 184, 250
- multiple unit activity (MUA) 192
- multi-channel photodiode array 24
- multi-neuron recordings 6, 56, 106, 184, 250
- multi-unit spike trains 52
- mutual inhibition 63

- narrow peak 263, 268
- net correlation 7
- neural code 250, 251
- neural coordination 56
- neuron pools 53
- neuronal assemblies 40, 50, 52 ff., 65, 76, 99, 166, 177, 181, 202, 210, 214, 249 ff.
- NMDA 66, 172
- nonlinearity 70
- non-spiny stellate cell 69
- noradrenaline 172
- normalization procedures 52

- now print signals 173
 nuclear magnetic resonance (MRI) 30
- object integration 187
 ocular dominance 76, 109, 110
 ocular dominance column 12, 47
 off subarea 5
 olfactory bulb 34
 on subarea 5
 optical flow 79, 98
 optical recording 24
 optic-tectum 34
 orientation column 43
 orientation selectivity 20, 68, 83, 84, 95, 98,
 126, 130
 orientation tuning 87, 195, 197
 oscillation 74, 96, 113–115, 177
 oscillation spindles 198
 oscillator units 211
 oscillatory episodes 98
 oxymetry 42
- parallel processing 70, 96
 pattern recognition 186
 phase locking 210
 photodetector 31
 piecewise separability 79 ff.
 PMLS 70, 73, 75, 92, 96, 97
 pool activity 66
 positron emission tomography (PET) 30
 prefrontal cortex 256, 273
 presynaptic synchronization 242–244
 presynaptic inhibition 66
 primary correlation operator 232–238
 processing submodality 77, 92
 projection 59
 pseudo-correlation 7
 PST coincidence histogram 54
 PST histogram 54
 psychological time scale 88, 100
 purring 231
 pyramidal cell 69
- rapid modulations 57
 rapidly changing synapses 66
 reaction time 88
 receptive field (RF) 68 ff., 70, 90 ff., 98 ff.,
 109
 spatiotemporal RF 80
 receptive field size 82, 83, 87
 respiratory movements 225
 response plane 64, 77
 response selectivity 20
 response synchronization 178
 retinal ganglion cell 81, 109
- retinotopy 91, 109
 RH 155 24
- segmentation 165
 selective attention 250
 self-organization 175, 207
 sensorimotor association 254, 256, 272
 separability 77
 serial excitation 8
 serial inhibition 8
 shared excitation see common excitation
 shared input see common input
 shared modulation 54
 shift predictor 7, 55, 62, 108, 109, 259, 271
 short term memory 250, 252
 signal content 130
 signal importance 130
 simple cell 5
 slow-wave field potentials 189
 small field stimulation 101
 somatosensory areas 92
 somatosensory cortex 34, 39, 48, 73, 76
 spatial filter 68, 79, 80, 100
 spatiotemporal pattern 30, 33, 123, 126, 130
 spectro-temporal 82
 spike size 113
 spike-triggered averaging 21, 41
 steady state 75, 79, 98, 100
 stimulus coding 64
 stimulus discrimination 95, 100
 stimulus dynamics 100
 stimulus recognition 123–129
 stimulus shape 93, 100
 stimulus speed 93, 98
 stimulus-induced oscillation 191, 192, 202
 stimulus-induced synchronization 187, 197,
 204, 210, 216, 218
 stimulus-locked response 193
 strength index 142
 striate cortex see visual cortex
 subfield stimulation 77
 superposition problem 167
 surround antagonism 161
 surround suppression 152
 synaptic efficacy 260, 261, 266, 268
 synaptic latency 138
 synaptic plasticity 170
 synchronization 101, 177, 184
 synchronized activity 214
 synchronized oscillations 198, 210, 212, 217
 synchronous gain 263, 264, 268
 synfire 270, 276
- temporal averaging 79, 82, 99
 temporal discrimination behaviour 287

- temporal encoding 88, 98, 100, 130, 185 ff., 212
- temporal filter 79, 100
- threshold distance 265
- time windows 63
- topographic representation 92
- transcolumnar interaction 18
- transient grouping 198
- transswitching 292
- tuning curve 64, 86, 93
- two-channel recording 6

- variability 115–119, 120–123
- visual experience 176
- visual latencies 89

- visual cortex 6 ff., 33–35, 40, 43, 45, 47, 53 ff., 70 ff., 96 ff., 106 ff., 133 ff., 166 ff., 185 ff., 281 ff.
- visual segmentation 188

- wavelet activity 194
- weak correlations 190
- wetware 89
- white noise 82
- w-type 70, 81

- x-y-w-input 89

- y-type 70
