- Alecian, E., Wade, G. A., Catala, C., Grunhut, J.H., Landstreet, J. D., Bagnulo, S., Böhm, T., Folsom, C. P., Marsden, S., & Waite, I. (2013). A high-resolution spectropolarimetric survey of Herbig Ae/Be stars – I. Observations and measurements. *Monthly Notices of the Royal Astronomical Society*, *429*, 1001.
- Andre, P., Ward-Thompson, D., & Barsony, M. (1993). Submillimeter continuum observations of Rho Ophiuchi A – The candidate protostar VLA 1623 and prestellar clumps. *Astrophysical Journal*, *406*, 122.
- Basri, G., & Martín, E. L. (1999). PPL 15: The first brown dwarf spectroscopic binary. *Astronomical Journal*, *118*, 2460.
- Bethe, H. A. (1939). Energy production in stars. *Physical Review*, *55*, 434.
- Burnham, R. J. (1978). *Burnham's Celestial Handbook – An Observer's Guide to the Universe Beyond the Solar System*. Revised and Enlarged Edition. New York: Dover Publications. ISBN 978-0-486-23567-X.
- Cameron, A. G. W., & Fowler, W. A. (1971). Lithium and the s-process in Red-Giant Stars. *Astrophysical Journal*, *164*, 111.
- Eddington, A. S. (1926). *The internal constitution of the stars*. Cambridge: Cambridge University Press.
- Ezer, D., & Cameron, A. G. W. (1967). Early and main sequence evolution of stars in the range 0.5 to 100 solar masses. *Canadian Journal of Physics*, *45*, 3429.
- Hayashi, C. (1961). Stellar evolution in early phases of gravitational contraction. *Publications of the Astronomical Society of Japan*, *13*, 450.
- Herbig, G. H. (1960). The spectra of Be- and Ae-type stars associated with nebulosity. *Astrophysical Journal Supplement*, *4*, 337.
- Heyssler, M. (2014). *Das Leben der Sterne – Teil I: Von der Dunkelwolke zum Protostern* (1. Aufl.). Wiesbaden: Springer Fachmedien Wiesbaden GmbH. ISBN 978-3-658-07495-1.
- Koch, B., & Korth, S. (2010). *Die Messier-Objekte* (1. Aufl.). Stuttgart: Franckh-Kosmos. ISBN 978-3-440-11743-9.

- Lada, C. J. (1987). Star formation – From OB associations to protostars. In M. Peimbert & J. Jugaku (Hrsg.), *Star forming regions* Bd. 115. (IAU Symposium), S. 1.
- Lesch, H., & Müller, J. (2011). *Sterne – Wie das Licht in die Welt kommt*. Frankfurt a. M.: Goldmann. ISBN 978-3-442-15643-6.
- Murillo, N. M., Lai, S.-P., Bruderer, S., Harsono, D., & van Dishoeck, E. F. (2013). A Keplerian disk around a Class 0 source: ALMA observations of VLA1623A. *Astronomy & Astrophysics*, 560, A103.
- Nakajima, T., Oppenheimer, B. R., Kulkarni, S. R., Golimowski, D. A., Matthews, K., & Durrance, S. T. (1995). Discovery of a cool brown dwarf. *Nature*, 378, 463.
- Palla, F., & Stahler, S. W. (1990). The birthline for intermediate-mass stars. *Astrophysical Journal Letters*, 360, L47.
- Sackmann, I.-J., Boothroyd, A. I., & Kraemer, K. E. (1993). Our Sun. III. Present and future. *Astrophysical Journal*, 418, 457.
- Samus, N. N., Durlevich, O. V., Kazarovets E. V., Kireeva, N. N., Pastukhova, E. N., & Zharova, A. V. (2014). *General Catalogue of Variable Stars (Institute of Astronomy of Russian Academy of Sciences and Sternberg State Astronomical Institute of the Moscow State University)*. <http://www.sai.msu.su/gcvs/gcvs/>. Version.
- Scheffler, H., & Elsässer, H. (1984). *Physik der Sterne und der Sonne*. Mannheim: B.I.-Wissenschaftsverlag. ISBN 978-3-411-01438-5.
- Stahler, S. W. (1983). The birthline for low-mass stars. *Astrophysical Journal*, 274, 822.
- Stahler, S. W. (2014). Kosmische Kinderstuben. *Spektrum der Wissenschaft Spezial*, 2, 14.
- Stahler, S. W., & Palla, F. (2004) *The formation of stars*. New York: Wiley. ISBN 978-3-527-40559-6.
- Surdin, V. G., & Lamsin, S. A. (1998). *Protosterne - Wo, wie und woraus entstehen Sterne?* Berlin: Johann Ambrosius Barth. – ISBN 978-3-335-00444-8.
- von Weizsäcker, C. F. (1937). Über Elementumwandlungen im Innern der Sterne. *Physikalische Zeitschrift*, 38, 176.
- von Weizsäcker, C. F. (1938). Über Elementumwandlungen im Innern der Sterne. *Physikalische Zeitschrift*, 39, 633.
- Weintraub, D. A., Sandell, G., Huard, T. L., Kastner, J. H., van den Ancker, M. E., & Waters, R. (1999). Submillimeter imaging of T Tauri's circumbinary disk and the discovery of a protostar in Hind's Nebula. *Astrophysical Journal*, 517, 819.
