

Subject Index

- Abies fraseri* 345–358
acclimatization 201, 383
Acrocomia species 3–17
actinorhizal nodules 86
 symbiosis 78
activated charcoal 11, 38, 55
adventitious buds 144, 350, 397
 regeneration 183
 shoots 82, 165, 414
Agrobacterium 64, 89, 91, 114, 187, 285, 379
Agrobacterium rhizogens 89
A. tumefaciens 89, 91, 114, 285
agropine 89
ailanthone 21
Ailanthus altissima 18–30
air layering 35
albiflorin 265
Aleppo pine 389
alkaloids 370
Allocasuarina 76–94
Anacardiaceae 31
Anacardium occidentale 31–49
anther culture 112, 150, 167, 253, 283, 301, 318
anti-filarial activity 33
anti-oxidant 62
anti tumor 361
apple juice 33
Arenga pinnata 217
automated micropropagation 281
- BA 44, 143, 280, 315, 324, 382, 416
babacu 5
Bacillus thuringiensis 54, 115
bactericidal 157
BAP 81, 208, 261, 397
beech 138–154
biochemical studies 112
browning 38
bud culture 38, 111, 144, 300
- caffeic acid 35
caffeine 110
Callitris articulata 407
callus culture 83, 248, 280, 301
cardol 34
- carotene 8
Cartagena cypress 407–423
Carya illinoensis 50–75
casein hydrolysate 144, 280
cashewnut 31–49
Casuarinaceae 76
Casuarina species 76–94
catkin 50, 407
caulogenesis 363
cell suspension 283, 301
Cephalotaxaceae 359
cephalotaxine 361
Cephalotaxus harringtonia 359–373
clonal forestry 273
 propagation 10, 196, 323
Coffea species 95–119
coffeenut 194
common ash 172–193
conventional propagation 99, 121, 140, 157,
 172, 196, 206, 219, 233, 247, 296, 310, 322,
 347, 376
cotyledon culture 23
culture of anthers 112, 150, 167, 253, 283,
 301, 318
 buds 38, 111, 144, 300
 callus 83, 248, 280, 301, 362
 cotyledons 23
 epicotyl 300
 hypocotyl 24
 internode 25
 meristem 11, 111
 nodule 281
 pollen 253
 shoot tip 144
 stem segment 27
 zygotiic embryo 300
cryogenics 63
cryopreservation 333
Cupressaceae 407
Cyphomandra betacea 120–137
cytokinin 62, 416
- 2,4-D 44, 107, 125, 213, 264, 334
date palm 9
differentiation 113, 125

- diseases 34, 122, 195, 377, 391
drought resistance 308, 374
durango pine 374
- effect of auxin 224
 cytokinin 224
 inositol 223
 light 222
 medium 222
- electroporation 379
ELISA 260
embryo culture 10, 175, 220, 252
embryogenesis 280, 333
embryogenic callus 127
embryoid 301
epicotyl culture 300
Ericaceae 231
Eugeissona 217
European beech 138–154
- Fagaceae 138
Fagus sylvestris 138–154
fatty acids 6
Feijoa sellowiana 155–171
field performance 150
fir 345
Fraser fir 345–358
Fraxinus excelsior 172–193
- GA 62, 211, 263, 294, 315
gene transfer 89, 285
genetic diversity 378
 engineering 114
 improvement 101
 stability 134
 transformation 64, 114, 135, 355
 variability 53, 114, 122
germplasm 10, 63, 101, 332
 preservation 101, 332
grafting 100, 248, 310
Gregg pine 374
ground layering 34
growth regulators 299
guava 308–320
GUS expression 285
Gymnocladus dioicus 194–204
- histogenesis 107
histology 351
HPLC 264
hypocotyl culture 24
- IAA 44, 159, 263, 324
IBA 35, 125, 159, 237, 274
internode culture 25
interspecific hybridization 3
- in vitro flowering 239
 studies 10, 36, 55, 123, 141, 157, 174, 197,
 208, 220, 233, 248, 274, 297, 312, 323, 349,
 361, 378, 392, 410
- japanese plumyew 359–373
Juglandaceae 50
- kanamycin resistance 64, 91, 135
Kentucky coffee tree 194–204
- lauric acid 5, 15
leaf culture 27, 297
Leguminosae 194
Leptospermum species 205–216
Lotus corniculatus 91
- Macauba palm 3
media 58, 123, 143, 158, 161, 208, 234, 311,
 380, 392, 412
meristem culture 11
Metroxylon sagu 217–230
micrografting 298
micropropagation 19, 69, 144, 147, 176,
 206, 254, 274, 319, 324, 363, 397
microshoots 146, 237
mixoploidy 281
molecular biology 114
monoterpene 264
morphogenesis 19, 43
multicellular pollen 303
multiple shoot 220, 293, 314
mycoplasma-like organisms 271
mycorrhiza 182
Myrtaceae 155, 308
- NAA 63, 83, 107, 127, 159, 395, 416
nematode 101
nodal culture 115, 314
nodulation 86
nodule culture 281
nurse culture 158
nut production 53
- oak 321–341
oil 6
oil palm 3
oncogenes 89
opines 89
Orbignya species 5
organogenesis 27, 55, 85, 126, 165, 274, 324,
 363, 385
Oxydendrum arboreum 231–243
- paclobutrazol 299
Paeonia species 244–268

- Paeoniaceae 244
paeoniflorin 246
Palmae 217
palmitic acid 5
Paulownia × *taiwaniana* 269–290
PCR 114
pesticidal activity 54
pests 34, 122, 377
petiole culture 297
phenols 38
picloram 11, 62, 159
Pinaceae 345
pineapple guava 155–171
Pinus durangensis 374–388
P. greggii 373–388
P. halepensis 389–406
P. pinea 389–406
pistillate flowers 50
plant regeneration 125, 163
pollen culture 253
polyphenols 332
Pouteria species 291–307
proembryoid 107
propagation 53, 77, 99, 140, 157, 173, 206, 219,
233, 247, 296, 347, 377, 392, 410
protoplast culture 110, 133, 150, 283
fusion 101
Pseudomonas savastoni 173
Psidium guajava 308–320
purine alkaloids 112
- Quercus robur* 321–341
- RAPD 114
regeneration 183, 379
RFLP 114
root culture 78, 365
cuttings 311
rooting 27, 41, 146, 179, 201, 237
Rubiaceae 95
rutin 35
- Sago palm 217–230
salt resistance 308
- Sapotaceae 291
scanning electron microscopy 160
Scrophulariaceae 269
secondary metabolites 21, 264
shoot multiplication 163
regeneration 83
tip culture 144, 168, 314
Simaroubaceae 18
Solanaceae 120
Solanum mauritianum 122
somaclonal variation 100, 113
somatic embryogenesis 98, 107, 127, 148, 157,
160, 174, 183, 280, 333, 402
sourwood 231–243
sterilization 233, 321, 379, 392
suckers 219
symbiosis 409
- Taiwan paulownia 269–290
tamarillo 120–137
Tetraclinis articulata 407–423
thidiazuron 144, 184, 297, 355
Thuja articulata 407
tobacco tree 122
transformation 22, 89, 285, 355
transgenic chimeras 64
plants 54
transplanting to soil 43, 318
tree of heaven 18–30
tree peonies 244–268
tree tomato 120–137
- ultrastructural studies 158
- vegetative propagation 99, 140, 247, 248, 273,
323, 348
vener grafting 35
- whip grafting 35, 100
witches' broom disease 270
- zeatin 234
zygotic embryo 161
