
Index

A

Acanthamoeba, 97–99
Acinic cell carcinoma, 706–707
Acne rosacea, 451–452
Actinic keratosis, 478–479
Adenocarcinoma, retinal pigment epithelium, 391
Adenoid cystic carcinoma, 686–689
Adnexal tumors, 56–58
Adult-onset xanthogranuloma, 577
Age-related macular degeneration (AMD), 329–338
Alveolar soft part sarcoma, 664–666
Amniotic membrane transplantation, 109–110
Amyloidosis, 166, 292–293, 463–464, 584–585
Angiolympoid hyperplasia, 614–615
Angiosarcoma, 524–525, 614
Aniridia, 207–208
Anophthalmia, 16
Anterior cleavage syndrome, 21
Anterior segment abnormalities
 Axenfeld-Rieger syndrome, 85
 Peters' anomaly, 85–87
Arteriovenous hemangioma, 611–612
Arteriovenous malformation, 611–612
Artificial eye, 34–35
Asteroid hyalosis, 293–294
Astrocytic (glial) hamartoma, 360–362
Astrocytoma, 360–362
Atopic/vernal keratoconjunctivitis, 91–92
Atrophy, 447–448
Axenfeld and Rieger anomaly, 206
Axenfeld-Rieger syndrome, 85

B

Bacterial infections, 456–457
Bacterial keratitis, 93–94
Bacterial pyogenic endophthalmitis, 24
Band keratopathy, 121
Basal cell adenocarcinoma, 707–708
Basal cell adenoma, 482–486, 680–682
Basal cell carcinoma, 482–486
Battered child syndrome, 27–29
Bilateral diffuse uveal proliferation
 (BDUMP), 416–418
Blepharitis, 449–450

Blue nevi, 494–496
Blunt trauma, 102–103
Bowen disease, 479–481
Bullous keratopathy, 115–117
Buphthalmia, 21–22

C

Calcinosis cutis, 460–461
Capillary hemangioma, 521–523
Carcinoma ex pleomorphic adenoma, 690–691
Castleman disease, 659–660
Cataract
 cortical, 190
 nuclear, 190–193
 subcapsular, 193
Cavernous hemangioma, 61–62, 523, 610
Cellular blue nevus, 69
Cestodes, 277–278
Chalazion, 450–451
Chemical injury, cornea, 99–100
Cholesterol granuloma, 568–570
Chordoma, 638–639
Choristomas, 556–559
Choroidal osteoma, 424–425
Ciliary epithelial tumours, 433
Climatic droplet keratopathy, 121–122
Coenurus, 565–566
Cogan's syndrome, 93
Collagen vascular diseases, 358
Coloboma, 446
Combined hamartoma, retina and retinal pigment
 epithelium, 388–389
Combined nevi, 495
Compound nevus, 492
Congenital abnormalities, eye
 anophthalmia, 16
 anterior cleavage syndrome, 21
 buphthalmia, 21–22
 congenital cystic eye, 16
 cryptophthalmia, 17
 cyclopia, 17–19
 iris coloboma, 20
 microphthalmia, 16–17
 with cyst, 20–21

- Congenital abnormalities, eye (*cont.*)
 nanophthalmia, 17
 optic disc coloboma, 20
 retino-uveal coloboma, 20
 synophthalmia, 17–19
- Congenital anomalies, retina, 310–316
- Congenital anterior staphyloma, 87
- Congenital cystic eye, 16
- Congenital hereditary endothelial dystrophies (CHED), 140
- Congenital hypertrophy of the retinal pigment epithelium (CHRPE), 389, 436
- Congenital lacrimal fistulas, 714
- Congenital nasolacrimal duct obstruction, 713–714
- Congenital stromal corneal dystrophy (CSCD), 134–135
- Congenital vitreous cyst, 267–269
- Congenital vitreous liquefaction, 269
- Conjunctiva
 anatomy, 41–42
 congenital abnormalities, 42–43
 development, 41–42
 embryology, 41–42
 inflammation, 43–46
 injuries, 46–49
 neoplasm, 43, 66
- Conjunctival amyloidosis, 49
- Conjunctival intraepithelial neoplasia, 54
- Conjunctival melanoma, 71–74
- Conjunctival papillomas, 50–53
- Conjunctival xerosis, 49
- Cornea, 79–141
 anatomy, 80–84
 chemical injury, 99–100
 congenital abnormalities
 of anterior segment, 85–87
 congenital anterior staphyloma, 87
 congenital keratectasia, 87
 cornea plana, 84–85
 megalocornea, 84
 microcornea, 84
 sclerocornea, 85
 degenerations, 113–122
 band keratopathy, 121
 bullous keratopathy, 115–117
 climatic droplet keratopathy, 121–122
 haematocornea, 121
 keratoconus and keratoglobus, 113–115
 pannus, 117–118
 pellucid marginal, 115
 peripheral hypertrophic subepithelial, 118–120
 pterygium, 117
 Salzmann's nodular, 120–121
 dystrophies, 122–140
 congenital hereditary endothelial dystrophies, 140
 congenital stromal corneal dystrophy, 134–135
 epithelial basement membrane dystrophy, 123–124
 epithelial recurrent erosion dystrophy, 124–125
 fleck corneal dystrophy, 135–136
 Fuchs' endothelial corneal dystrophy, 136–137
 GCD (*see* Granular corneal dystrophy (GCD))
 gelatinous drop-like corneal dystrophy, 126
 lattice corneal dystrophy, classic and variants, 128–130
 Lisch epithelial corneal dystrophy, 126
 macular corneal dystrophy, 131–134
 Meesmann's corneal dystrophy, 125–126
 posterior amorphous corneal dystrophy, 136
 posterior polymorphous corneal dystrophy, 137–140
 pre-descemet corneal dystrophy, 136
 Reis-Bücklers' corneal dystrophy, 126–128
 Schnyder's corneal dystrophy, 134
 subepithelial mucinous corneal dystrophy, 125
 Thiel-Behnke corneal dystrophy, 128
 X-linked endothelial corneal dystrophy, 140
 embryology and development, 80
 gas injuries, 101
 general description, 79–80
 inflammation, 87–99
 injury, 103–105
 neoplasms, 141
 physical injury, 101–104
 postsurgical pathology
 amniotic membrane transplantation, 109–110
 corneal collagen cross-linking, 105–106
 epikeratoplasty, 107–108
 intrastromal ring implants, 106
 keratoprosthesis, 112–113
 lamellar keratoplasty, 111–112
 laser in situ keratomileusis, 108–109
 limbal stem cell transplantation, 110
 penetrating keratoplasty, 110–111
 phototherapeutic and photorefractive keratectomy, 108
 radial keratotomy (RK), 106–107
 thermal injury, 100–101
 Corneal abrasion, 102–103
 Cortical cataract, 190
 Cryptophthalmia, 17, 446
 Cutaneous diffuse large B-cell lymphoma, 530–531
 Cutaneous follicular lymphoma, 529–530
 Cycloopia, 17–19, 156
 Cystadenocarcinoma, 705–706
 Cysticercosis, 566–567
- D**
- Dacryoadenitis, 671–673
- Dacryocystitis, 714–715
- Degenerations
 lens, 189–193
 optic nerve, 242–243
 vitreous, 290–295
- Demyelination, 360
- Dermal nevus (intra-dermal nevus), 492–493

Dermoid cyst, 473–475
 Dermolipoma, 558
 Diabetes, eye, 32–33
 Diabetic retinopathy, 348–352
 Distichiasis, 447
 Dry eye syndrome, 90–91
 Dry socket, 36–37
 Ductal adenocarcinoma, 695–696
 Dysplastic nevus, 497–498

E

Eales' disease, 356–358
 Ectopic brain tissue, 560–561
 Ectopic lacrimal gland (Cyst), 558–559
 Endodermal sinus tumor, 617
 Endophthalmia, 23–24
 Ephemelis, 490
 Epidermal inclusion cyst, 469–470
 Epikeratoplasty, 107–108
 Epiretinal membranes, 283–284
 Episcleral osseous choristoma, 167
 Episcleritis, 158–159
 Epithelial basement membrane dystrophy, 123–124
 Epithelial–myoepithelial carcinoma, 702–705
 Epithelial recurrent erosion dystrophy, 124–125
 Epithelioid hemangioendothelioma, 614
 Epithelioid hemangioma, 613–614
 Erdheim–Chester disease, 577, 657–658
 Ewing sarcoma/primary peripheral primitive neuroectodermal tumor, 627–629
 Extraretinal neovascular membranes, 285–286
 Eye, 1–37
 anatomy, 6
 congenital abnormalities (*see* Congenital abnormalities)
 embryology, 3–5
 external layer, 6–9
 eyeball development, 14–15
 general description, 1
 injuries, 26–31
 battered child syndrome, 27–29
 irradiation damage, 29
 phacoanaphylactic endophthalmitis, 30–31
 sympathetic ophthalmia, 29–30
 wounds, 26–27
 inner layer, 11–12
 lens, 13–14
 middle layer, 9–11
 optic nerve, 12–13
 vitreous body, 14
 Eyeball, 14–15
 Eyelid
 congenital, 446, 449, 494, 496, 522
 degeneration, 447–448, 467
 inflammation, 449–450, 458, 466, 471, 514
 neoplasm, 481–482, 490, 503, 518
 normal anatomy, 444
 normal histology, 444–446

F

Familial exudative vitreoretinopathy, 288–289
 Fat/lacrimal gland prolapse, 583–584
 Fibroma, 60
 Fibrous dysplasia, 631–632
 Fibrous histiocytoma (FH), 60, 519, 593–594
 Fleck corneal dystrophy (FCD), 135–136
 Freckle, 69
 Fuchs' endothelial corneal dystrophy, 136–137
 Fungal infection, 24–25, 457
 Fungal keratitis, 97

G

Ganglioglioma, 256
 Gas injuries, cornea, 101
 Gelatinous drop-like corneal dystrophy (GDL), 126
 Giant cell angiofibroma, 591–593
 Glaucoma
 acute primary angle-closure glaucoma, 209–210
 anatomy, 200–203
 chronic angle-closure glaucoma, 210
 congenital glaucoma, 206
 description, 197–200
 developmental, 205–208
 embryology, 203–205
 neovascular, 210
 open-angle glaucoma, 208–209
 pigmentary, 214–215
 secondary angle-closure glaucoma, 220–229
 secondary open-angle glaucoma, 210
 Glomus tumor, 607–608
 Granular cell tumor, 620–621
 Granular corneal dystrophy (GCD)
 type 1, 130–131
 type 2, 131
 Granulocytic sarcoma, 654–655
 Granulomatosis with polyangiitis (Wegener's granulomatosis), 468–469
 Granulomatous inflammation, 25–26

H

Haemangioma, 167
 Haematocornea, 121
 Hemangioblastoma, 257
 Hemangiopericytoma, 257, 591–593
 Hemorrhage, 280–282
 Herpes simplex viral keratitis, 95–96
 Herpesvirus infection, 455–456
 Hydrocystoma, 470–473
 Hordeolum (Stye), 450
 Hydatid cyst, 562–565
 Hypertensive retinal disease, 355–356

I

Idiopathic orbital inflammatory, 573–574
 IG4-related orbital disease, 574–582

Infantile capillary hemangioma, 61
 Infantile fibrosarcoma (IF), 595
 Infection, 238
 Infectious endophthalmitis, 269–272
 Inflammation, 22–26, 238–240
 conjunctivitis, 43–46
 cornea, 87–99
 eye
 bacterial pyogenic endophthalmitis, 24
 endophthalmitis, 23–24
 fungal infection, 24–25
 granulomatous inflammation, 25–26
 panophthalmia, 23–24
 viral infection, 25
 lens, 183–187
 uvea, 409–411
 Inflammatory myofibroblastic tumor, 589–591
 Injuries
 blunt trauma, 102–103
 cornea, 101–104
 optic nerve, 242
 sharp injury, 103–105
 uvea, 411–413
 Invasive malignant melanoma, 499–503
 Inverted follicular keratosis, 477–478
 Iridocorneal endothelial syndrome, 211–212
 Iris coloboma, 20

J

Junctional nevus, 492
 Juvenile hemangioma, 608–610
 Juvenile xanthogranuloma (JXG), 58, 60, 464–466

K

Kaposi sarcoma, 525–526
 Keratoconus, 113–115
 Keratoglobus, 113–115
 Keratitis, 87–99

L

Lacrimal drainage system, 547–719
 anatomy, 713
 embryology, 712
 neoplasms of, 716–719
 Lacrimal gland, 547–719
 anatomy, 670–671
 embryology, 670
 neoplasms, 685–686
 Langerhans cell histiocytosis, 655–657
 Large cell carcinoma, 710–711
 Laser in situ keratomileusis, 108–109
 Lattice corneal dystrophy, classic and variants, 128–130
 Leiomyoma, 598–600
 Leiomyosarcoma, 600–602
 Lens, 13–14
 anatomy, 175–183
 degeneration, 189–193

 description, 173–175
 development, 175–183
 embryology, 175–183
 inflammation, 183–187
 trauma, 187–193
 Lentigo maligna, 498–499
 Lentigo simplex, 490–491
 Limbal stem cell transplantation, 110
 Lipoma, 596–597
 Liposarcoma, 597–598
 Lisch epithelial corneal dystrophy, 126
 Low-grade mucinous carcinoma, 509–511
 Low-virulence bacterial endophthalmitis, 271–272
 Lymphangioma, 523–524, 612–613
 Lymphoepithelial carcinoma, 699–701
 Lymphoid hyperplasia, 526–527, 645–646
 Lymphoma, 65–66, 646–653
 conjunctiva, 65
 cutaneous anaplastic large cell lymphoma, 528–529
 cutaneous lymphomas, 527
 eyelid, 527–530
 intraocular lymphomas, 296–300
 orbit, 646–651

M

Macular corneal dystrophy (MCD), 131–134
 Malignant melanoma
 conjunctiva, 449, 500, 503–504
 Malignant peripheral nerve sheath tumor (MPNST),
 621–624
 Medulloepithelioma, 256–257, 433
 Meesmann's corneal dystrophy (MECD), 125–126
 Melanocytic tumors, 67–74
 Melanocytoma (magnocellular nevus), 256, 415
 Melanoma-associated spongiform scleropathy (MASS),
 164–165
 Melanoma in situ, 498
 Membranous proliferations, 282–289
 Meningioma, 250–259, 639–642
 anaplastic (malignant) meningioma, WHO Grade III,
 643–645
 atypical meningioma WHO Grade II, 642–643
 Meningoencephalocele, 560–561
 Merkel cell carcinoma (MCC), 515–518, 711–712
 Metastases, conjunctival, 66–67
 Metastatic tumours, 531
 to retina, 391–394
 uveal, 433
 Microblepharon, 446
 Microphthalmia, 16–17, 156–157
 with cyst, 20–21, 560
 Molluscum contagiosum, 453–454
 Mooren's ulcer, 92–93
 Mucinous adenocarcinoma (MA), 708–709
 Mucoepidermoid carcinoma (MEC), 55, 692–695
 Multiple myeloma/Waldenström macroglobulinemia,
 653–654
 Mycosis fungoides, 527–528

Myoepithelioma (MYO), 683–685
 Myofibroma/myofibromatosis, 587–589
 Myopia, 165, 166, 342–347
 Myxofibrosarcoma (MFS), 594–595
 Myxoma, 60

N

Nanophthalmia, 17
 Nanophthalmos, 156–157
 Necrobiotic xanthogranuloma (NBX), 467–468, 578–579
 Neoplasms, 674–712

- conjunctiva, 682, 709, 712
- cornea
 - primary tumours, 141
 - secondary tumours, 141
- lacrimal gland, 685–711
- orbital, 674, 675, 679, 686, 688–690, 710
- retina, 360–362
- sclera, 167–170
- uvea, 414–436
- vitreous, 296–303

 Neovascularisation glaucoma, 210–211
 Nerve sheath tumours, 167
 Neuroblastoma/ganglioneuroma, 624–627
 Neurofibroma, 62, 519–520, 617–619
 Nevoid basal cell carcinoma syndrome, 486–487
 Nodular fasciitis, 586–587
 Nuclear cataract, 190–193

O

Ochronosis, 157–158
 Ocular melanocytosis, 69–70, 496–497
 Ocular melanosis, 158
 Ocular surface squamous neoplasia (OSSN), 53–56
 Oculodermal melanocytosis, 158
 Onchocercoma, 568
 Oncocytic adenocarcinoma (OCA), 709–710
 Oncocytoma, 682–683
 Optic disc coloboma, 20
 Optic nerve, 12–13

- anatomy, 234–237
- choristoma, 257
- congenital abnormalities, 237
- degenerations, 242–243
- description, 233–234
- development, 234–237
- embryology, 234–237
- gliomas, 243–250
- injuries, 242
- meningiomas, 250–259
- tumors, 243–259

 Optic neuritis, 237–238
 Orbital implants, 35–36
 Orbit, 547–719

- anatomy, 553–555
- congenital abnormalities, 555–561

- degeneration, 673–674
- description of, 547
- embryology, 548–553
- infectious, 561–562
- injury, 547, 673
- neoplasm, 585–589

 Osteogenesis imperfecta, 157
 Osteoid osteoma, 634–635
 Osteoma, 636–637
 Osteopetrosis, 633–634
 Osteosarcoma, 637–638

P

Paget's disease, 629–631
 Pannus, 117–118
 Panophthalmia, 23–24
 Paraffinoma/sclerosing lipogranuloma, 570–571
 Parasitic infections, 457–458
 Parasitic keratitis, 97–99
 Pellucid marginal degenerations, 115
 Perforating corneal wounds, 104–105
 Peripheral hypertrophic subepithelial degenerations, 118–120
 Persistent hyperplastic primary vitreous, 267
 Peters' anomaly, 85–87, 206–207
 Phacoanaphylactic endophthalmitis, 30–31, 184
 Phacoantigenic uveitis, 279–280
 Phacolytic glaucoma, 216–218
 Phakomatous choristoma, 447
 Phthisis bulbi, 166
 Pigmentary glaucoma, 214–215
 Pilar cyst, 473
 Pilomatrixoma, 513–515
 Pingueculum, 49
 Pleomorphic adenoma, 508–509, 675–679
 Polymorphous low-grade adenocarcinoma, 701–702
 Posterior amorphous corneal dystrophy, 136
 Posterior polymorphous corneal dystrophy, 137–140
 Pre-Descemet corneal dystrophy (PDCD), 136
 Primary acquired melanosis (PAM), 70
 Primary adenocarcinoma, 691–692
 Primary synovial sarcoma, 660–661
 Proliferative vitreoretinopathy, 284–285
 Pseudotumor, 573–574
 Pseudoexfoliation glaucoma, 212–214
 Pterygium, 49, 117
 Purulent endophthalmitis, 269–270
 Pyogenic granuloma, 452–453

R

Radial keratotomy (RK), 106–107
 Radiation retinopathy, 356
 Reactive hyperplasia of the retinal pigment epithelium, 389–390
 Reactive lymphoid hyperplasia, 64
 Reis-Bücklers' corneal dystrophy, 126–128

Retina

- age related macular degeneration, 329–338
 - anatomy, 307–310
 - congenital anomalies, 310–316
 - description, 307
 - embryology, 307
 - inflammation, 310, 317–320, 322–324, 338, 344, 346, 380
 - neoplasms, 360–362
 - and related degenerations, 347–348
 - vasoproliferative tumor of, 368–371
- Retinal arteriovenous (AV) communication (retinal racemose hemangioma), 367–368
- Retinal cavernous hemangioma, 365–367
- Retinal degenerations, 329–348
- Retinal detachment, 339–342
- Retinal hemangioblastomas, 362–365
- Retinal holes, 347–348
- Retinal inflammatory conditions, 317–324
- Retinal injury, 324–329
- Retinal pigment epithelium (RPE) adenoma, 390–391
- Retinal vascular occlusions, 352–355
- Retinoblastoma, 371–386
- Retinoma/retinocytoma, 371–387
- Retinopathy of prematurity, 286–289, 358–359
- Retino-uveal coloboma, 20
- Rhabdomyoma, 602–603
- Rhabdomyosarcoma, 61, 603–607
- Rosai–Dorfman disease, 658–659

S

- Salzmann's nodular degenerations, 120–121
- Sarcoidosis, 461–463, 581–582
- Schisis, 347–348
- Schnyder's corneal dystrophy, 134
- Schwannoma, 62, 520–521, 619–620
- Sclera
- anatomy, 155–156
 - description, 155
 - development, 155–156
 - embryology, 155–156
 - injuries, 164
 - inflammation, 158–159
 - neoplasms, 167
- Scleral plaques, 166
- Scleritis, 159–164
- Scleropachynsis, 165
- Sebaceous adenoma, 504
- Sebaceous carcinoma, 504–506, 697–699
- Sebaceous gland hyperplasia, 56–57
- Sebaceous hyperplasia, 503–504
- Seborrheic keratosis, 475–477
- Secondary optic nerve tumors, 257–258
- Secondary orbital tumors, 666–667
- Sickle retinopathy, 359–360
- Simple hamartoma, retinal pigment epithelium, 388
- Sjögren syndrome (SS), 672–673
- Smooth muscle tumors, 598–600
- Solar elastosis, 447–448

- Solar lentigo, 491–492
- Solitary fibrous tumor, 591–593
- Spindle cell carcinoma, 55
- Spitz nevus, 69, 493–494
- Squamous cell carcinoma (SCC), 54, 487–490, 696–697
- Squamous papilloma, 481–482
- Staphylococcus-associated
- blepharokeratoconjunctivitis, 92
- Steroid-induced glaucoma, 218–219
- Subcapsular cataract, 193
- Subepithelial mucinous corneal dystrophy, 125
- Sympathetic ophthalmia, 29–30
- Synchysis scintillans, 294–295
- Synophthalmia, 17–19, 156
- Syphilitic stromal keratitis, 93
- Syringoma, 506–508
- Systemic mucopolysaccharidosis, 158

T

- Tears, 347–348
- Teratoma, 559, 614–617
- Thermal injury, cornea, 100–101
- Thiel-Behnke corneal dystrophy (TBCD), 128
- Thyroid eye disease, 571–572
- Toxocara endophthalmitis, 274–275
- Trabecular glaucoma causes, 215–216
- Trauma (angle recession), 219–220
- lens, 187–193
 - uvea, 411–413
- Traumatic neuroma, 582–583
- Trichilemmoma, 512–513
- Trichoepithelioma, 511–512
- Trichofolliculoma, 513
- Tumors
- adnexal, 56–58
 - eyelid, 506–508, 511–512, 519
 - lacrimal gland, 674, 675, 678, 681, 683, 685, 690, 699, 705,
 - melanocytic, 67–74
 - metastatic uveal, 433
 - optic nerve, secondary, 257–258
 - primary tumours, 141
 - secondary tumours, 141
 - uvea, 416, 419, 423

U

- Uvea
- anatomy, 403–408
 - congenital abnormalities, 408–409
 - degenerative conditions, 413–414
 - description, 403
 - development, 403–408
 - embryology, 403–408
 - inflammation, 409–411
 - injuries and trauma, 411–413
 - lymphoma, 431
 - neoplasms, 414–436

Uveal extranodal marginal zone B-cell lymphoma, 429–431
Uveal leiomyomas, 428
Uveal leukaemia, 431–433
Uveal lymphoma, 428–429
Uveal melanoma, 418–424
Uveal naevi, 414–416
Uveal schwannoma, 425–428

V

Varicella zoster virus keratitis, 96–97
Varix, 559–560
Vasculitis, 581, 582
Vasoproliferative tumor, retina, 368–371
Verruca vulgaris, 454–455
Viral endophthalmitis, 270–271
Viral infection, 25
Viral keratitis, 94–97
Vitreous
 anatomy, 265–266
 degenerations, 290–295
 embryology, 266–267

inflammation, 269–278
metastases, 300, 301
neoplasms, 296–303
ophthalmomyiasis, 278

W

Warthin's tumor, 679–680
Wegener's granulomatosis, 579–582
Whipple's disease, 272–274
Wounds, eye, 26–27

X

Xanthelasma, 459–460
Xanthogranulomatous inflammatory diseases, 576–582
Xeroderma pigmentosum, 447
X-linked endothelial corneal dystrophy, 140

Y

Yolk sac tumor, 617
