

# INDEX

## Symbols

2D CNC Technology 175  
3D cutting 147  
3D modelling 62  
3D ornament 221  
3D printer 78  
3ds Max 166

## A

acrylic glass 214  
adhesives 99  
aerosol paint 105, 120  
amorphous shapes 114  
Antoni Gaudi 29, 33  
Archimedean solids 136  
architectural representation 23, 27  
assembly 98  
AutoCAD 166

## B

bounding box 238  
bronze scale model 52  
brushes 121

## C

CAD/CAM technologies 163, 164  
Calatrava 33, 34  
Catalan's surfaces 139  
ceramic scale model 25

Cinema 4D 167  
circular saw 89  
city models 48, 71  
clay 114  
clay tools 102  
CNC routers 170  
COFFEE 168  
colour-changing materials 116  
conceptual model 58, 59, 63, 80  
concrete formwork 221, 232  
cone 133, 203  
conoids 140  
contemporary architectural design 137  
cork 109  
cross-section 235  
curved folding 187, 196  
cutting boards 93  
cutting knives 94  
cutting tools 110  
cylinder 91, 133  
cylindrical surfaces 135, 223

## D

Decker Yeadon LLC 118  
density method 212  
detail models 49  
developable surfaces 108, 137  
development scale models 63  
Diagonal pattern 197  
Diamond pattern 196  
digital scale models 76  
digital techniques 62  
directrix 138, 222

discretisation 126, 134, 135, 212  
double curved surfaces 126, 134, 140  
drawing tools 92  
drilling tools 89  
dynamic relaxation 76, 212

## E

electrorheological 116  
electrotropic 116  
engraving 90, 144  
EPS (expanded polystyrene) 113, 222  
exhibition scale models 65

## F

Felix Candela 32  
final design study 127  
folding pattern 188, 195, 196  
folding structure 187  
folding techniques 60  
Foster + Partners 45  
Frank Lloyd Wright 30  
Frederick Kiesler 31  
free-form geometries 235  
free-form shell structure 76  
Frei Otto 33, 34  
fused deposition modelling 177

## G

gas dusters 104  
generators lines 138  
geodesic lines 246  
glass 111  
Grasshopper 167, 221, 237

## H

helicoids 132, 139  
hot-wire foam cutters 96  
HygroScope 116  
hyperbola 137  
hyperbolic paraboloid 134

## I

icosahedron 135  
inclinations 138

## J

jig saw 89  
Jørn Utzon 31

## K

Kazimir Malevich 30

## L

landscape models 71  
laser beam 90, 146  
laser cutter 145, 146  
laser cutting 62  
Le Corbusier 31  
light-emitting material 116  
linear systems 75  
Ludwig Mies van der Rohe 30, 53

## M

magnetorheological 116  
massive (solid) bearing systems 73  
master plan models 48  
Maxscript 168  
Maya 166  
MDF 109  
Membrane 24 215  
membrane structures 213, 216  
mesh 31, 35, 212, 213  
metal rods/bars 112  
Meteorosensitive Morphology 119  
micro-structural orientation 116  
minimal surfaces 132, 213  
Miura-Ori Pattern 198  
monochrome scale models 120

## N

nails 100  
non-standard architecture 38, 167  
NURBS modelling 38, 63, 166  
nylon fibre 112

## O

one-sheet rotational hyperboloid 132, 137  
organic form 32

origami pattern 60  
ornament 232

## P

p4 group 232  
paper 108  
paper folding 60  
paper model 192  
parabola 138, 215  
parabolic cylinder 139  
parametric modelling 228  
pattern 25, 60, 133, 145  
Penrose tiling 230  
photochromic 121  
photographing 158  
phototropic 116  
physical models 7, 76, 163  
Pier Luigi Nervi 32  
planar bearing systems 74  
plastic 110  
plastic cutters 101  
Platonic solid 135  
pliers 96  
plywood 109  
polyhedron 135  
polystyrene 98, 107, 110, 113, 114, 156  
presentation model 47  
prestressing 213  
Projectfinder 212  
prototype 38, 163, 164

## R

rapid prototyping 174  
reverse engineering 34, 182, 219  
reverse folding 203  
revolving 137  
Rhinoceros 63, 133, 204, 212, 227, 237  
rigid folding 188  
robot 224  
robot arm 219, 220, 222, 228  
robot control code 221  
Ron Resch pattern 199  
rotary cutters 101  
Ruby Console 168  
ruled surfaces 28, 140

## S

sandpaper 98  
scale stage and theatre design models 53  
scissors 96  
scribers. *See also* plastic cutters  
sectioning 235  
self-assembling material 116  
shape memory 116  
sheet metal 111  
Shigeru Ban 34, 36  
single curved surfaces 133, 134  
site models 48  
SketchUp 62, 165, 168  
Smart Screen 118  
solar shading system 118  
soldering iron 104  
sphere 31, 134, 136  
spray paint 105  
static equilibrium 213  
stereolithography 177  
strategic projects 50  
stretch fabric 213  
styrofoam 113, 114  
symmetry group 225, 232

## T

tensile structure 214  
terrain modelling 128  
thermochromic 121  
thermotropic 116  
thin-shell structures 75  
training models 56  
tweezers 98

## U

uniform tiling 226

## V

veneer 107, 119  
volumetric modelling 113

## W

wallpaper groups 225, 226  
water jet cutting 169

white styled models 64  
wood 113  
wood strips 112  
working models 44

## **X**

XPS (extruded polystyrene foam) 113

## **Z**

Zaha Hadid 79, 142
