

Index

A

Accompany Metals, 42
Artificial deposit, 4
Artificial resources, 4

C

Collection system, 35
Consumption of metals, 7
Consumption per capita, 15
Cumulative consumption, 7

D

Dissipated stock, 20
Domestic potential of urban mine, 18
Domestic urban mining potential, 25

E

Electrical disintegration, 38
End-of-life, 20
End-of-life flow, 18
End-of-life products, 19
Environmental problems, 2
EoL, 11
EOL recycling rate, 14

F

Final demand, 10

G

Global warming, 1
Grade, 8

H

High voltage electric pulse, 38
Human's techno-sphere, 9

I

Input/Output analysis, 22
In-use-stock, 19
I/O Tables, 21

L

Laser Induced Brake Down Spectroscopy, 40
Life cycle, 11

M

Maximum possibility of urban mining, 21
Metal, 15
Mineral resources, 4
Minor metals, 3

N

NdFeB magnet, 35

O

Old scrap collection rate, 14
Old scrap ratio, 14
On-surface stock, 9, 10

P

Platinum group metal (PGM), 2
Primary stock, 9

R

Recoverability rate, 14
Recycled content, 14
Recycling input rate, 14
Recycling process efficiency rate, 14
Recycling rate, 14, 26
Reserves, 7
Reserve to Stock, 35
3 Rs, 2

S

Scrap recovery per capita, 15
Secondary stock, 9
Semi-processed materials, 10
Small electric appliances, 18
Sorting techniques, 40
System boundary, 21

U

Underground stock, 9, 10
United Nations Environment Programme
(UNEP), 2
Urban mines, 8
Used scrap, 10
Used stock, 20

W

Waste Electrical and Electronic Equipment
(WEEE), 33
