

SUBJECT INDEX

A

Acidic polymers, 136
Acidophile, 9, 13–16, 32, 36, 38, 39,
64, 83–93, 204, 205, 207, 252, 570,
590, 613
Acidophilic, 13–15, 32, 33, 37, 83–85, 90,
91, 93, 203–211, 299, 557, 588, 590,
603, 613
Acidophilic haloarchaea, 207–211
Acidophily, 33, 204, 573
Acid saline lake, 205–207
Adaptation, 8, 64, 83, 112, 123–163, 183,
203, 223, 236, 250, 251, 274, 385,
403–419, 427–434, 469, 506, 519, 535,
553–561, 600, 613
Aerobe, 10, 21–22, 128, 133, 149, 278, 281,
282, 533, 543, 615
Aerobiology, 400
AFP. *See* Antifreeze protein (AFP)
Algae, 14, 64, 108, 127, 187, 204, 219, 345,
370, 390, 427–434, 543, 558, 569–577,
599, 613
Alkaline, 15, 64, 103, 123, 181, 204, 217,
274, 341, 367–379, 443, 479, 583
Alkaline-stable enzymes, 376
Alkaliphiles, 9, 64, 123, 275, 371, 570, 613
Alkaliphilic, 13, 110, 123, 203, 276, 372,
479, 540, 583
Allopatric evolution, 506–513
Alpine lake ice, 393, 396
Aminosugar-1-phosphate acetyltransferase,
307–312
Anaerobe, 10, 21–22, 129, 130, 132–135,
149, 188, 193, 195, 278, 281, 282, 490,
507, 539
Anoxia, 65, 194, 494, 507, 602
Anoxic, 21, 22, 38, 65, 129, 181, 183,
186–190, 192–195, 341, 346, 487–494,
501–513, 519–528, 538, 586, 613, 614

Antarctica, 65, 67, 69–71, 74, 218, 228–229,
323, 338, 343, 344, 350, 352, 373, 383,
386, 389–391, 393, 395, 410, 427–431,
433, 459, 571
Antifragility, 555, 561
Antifreeze protein (AFP), 354, 415, 418,
429, 572
Antioxidant complexes, 259, 260, 263
Antiporter, 9, 15, 36, 156–159, 161, 221, 282
Archaea, 10, 64, 83, 105, 125, 189, 204,
219, 235, 251, 275, 299, 318, 343, 371,
443, 487, 509, 520, 533, 577, 603
Arginine, 15, 350, 354, 538, 539, 544
Astaxanthin, 408, 409, 573
ATPase, 16, 150, 302
ATP synthase, 9, 149–153, 282, 283, 430, 539

B

Barophiles, 64, 613
Biodistribution of extremophiles, 66–67
Biologically activated enhanced oil
recovery (Bio-EOR), 443, 456–459
Biominaleralization, 588, 590
Bioprospecting, 287, 443, 451, 458
Biotechnology, 8, 284–288, 376, 386, 459,
478–479, 576
Brine, 16, 64, 104, 123, 182, 217, 323, 338,
383, 418, 501, 519, 533, 571, 601
Brine lakes, 192, 193, 501, 504, 506, 507

C

Calcium chloride (CaCl₂), 218, 222, 225,
228–229
Canadian High Arctic, 338, 342–345, 350,
352, 354, 355
Carotenoids, 67, 106, 109, 110, 112, 162,
204, 403, 404, 408–411, 432, 554, 572
CCCRyo, 405, 409–418
CFA. *See* Cyclopropane fatty acids (CFA)

- Chaetothyriomycetidae, 555
 Chaophilic, 218, 229
 Chaotolerant, 229
 Chaotropic, 34, 217–229, 614
 Ciliates, 371, 490, 492, 494, 495, 509–511, 523, 524, 526, 527
 Cold adaptation, 353, 431, 434
 Cold adapted enzymes, 378, 429, 430, 434
 Cold saline springs, 341
 Cold-shock proteins, 19, 350, 354, 384
 Compost piles, 280
 CRISPR, 86–87, 89, 93
 Cryoconite holes, 387, 388, 393
 Cryoenvironments, 337–357, 613
 Cryophile, 64, 357, 406
 Cryosphere, 383–391, 393–395
 Cyanobacteria, 19, 66, 67, 73, 109, 110, 127, 138, 139, 146, 147, 158, 161, 204, 219, 228, 229, 238, 244, 259, 343, 346, 372, 386, 388, 391, 415, 560, 570, 615
 Cyclopropane fatty acids (CFA), 130–132, 135
 Cytochrome *c*, 131, 132, 153, 162, 227
- D**
 Dead Kangaroo Lake, 206, 207
 Dead Sea, 16, 64–66, 218, 220, 221, 223–226, 274, 323, 533, 535, 541, 577, 614
 Deep hypersaline anoxic basins (DHABs), 501–513, 519–528
 Denitrification, 184, 534–535
 Desert soda lakes, 66, 127
 Desiccation, 8, 16, 18, 20–21, 38–40, 66, 75, 136, 143, 203, 226, 235–245, 251–256, 259, 261, 263, 337, 383, 407, 414, 427, 433, 434, 503, 556, 557, 560, 570, 573, 599, 601, 603, 605, 614
 Desiccation stress, 137, 244, 407–408, 415, 419
 DHABs. *See* Deep hypersaline anoxic basins (DHABs)
 Diatoms, 183, 229, 345, 371, 378, 391, 406, 408, 415, 418, 571–575, 577, 599
 Dimethyl sulfoxide (DMSO), 535–538, 544
 DMSO. *See* Dimethyl sulfoxide (DMSO)
 Don Juan Pond, 218, 228–229, 343, 344
 Dormant, 68, 74, 75, 236–238, 243, 245, 273, 347, 600, 602, 604, 605
 Dothideomycetes, 555, 560
- E**
 Eastern (E.) Mediterranean, 226, 501, 503, 519–522, 526, 527, 538
 Ectoine, 17, 112, 113, 116, 138, 141–147
 Endoxylanase, 277, 278
 Environmental selection, 494, 501–513, 523, 524
 Epibionts, 527
 Eukaryotes, 17, 22, 63, 64, 66, 75, 127, 138, 155, 159, 251, 252, 260, 281, 371, 412, 487–495, 509, 519–528, 553, 558, 572, 576, 577, 603, 613, 614
 Europa, 8, 69, 71–75, 195, 354, 355, 357, 386
 Extraterrestrial halite, 244–245
 Extraterrestrial life, 8, 64, 69, 74, 75, 245, 275, 601, 613
 Extreme environment, 7, 63–65, 67, 68, 83, 86, 87, 204, 228, 244, 251, 262, 280, 281, 356, 367, 384–386, 391, 396, 397, 419, 427–434, 510, 555, 557, 558, 561, 570, 577, 583, 584, 588–592, 613
 Extremophiles, 7, 63, 84, 103, 123, 181, 203, 229, 251–263, 273, 318, 458, 469, 507, 576, 599–605, 613
 Extremophilic, 13, 40, 64, 67–69, 113, 123, 124, 156, 273, 274, 288, 569, 570, 576, 577, 583–592
 Extremophily, 273, 570, 576
 Extremotrophs, 273
 Extremotrophy, 273
- F**
 Fatty acid, 9, 11, 12, 14, 18, 33, 35, 129–136, 283, 284, 374, 410–411, 427, 431, 433, 572
 Fermentation, 116, 276, 282, 288, 389, 479, 538–539, 556
 Fermentative bacteria, 149, 454–457
 Firmicutes, 19, 128, 141, 146, 150, 204, 277, 278, 342–345, 372–375, 378, 446, 448, 453
 FISH. *See* Fluorescence in situ hybridization (FISH)
 Flagellar motor, 9, 15, 155

- Fluorescence in situ hybridization (FISH),

A

- Acaryochloris marina*, 23
Acetobacterium, 350
Acidianus, 23, 83, 205, 276, 300, 326, 329
 A. ambivalens, 23
 A. infernus, 23, 83
 A. manzaensis, 23
 A. tengchongensis, 23
Acidilobus, 300
 A. aceticus, 23
Acidimicrobium ferrooxidans, 91
Acidiphilium, 89
 A. cryptum, 91
 A. multivorum, 91
Acidithiobacillus, 83, 89, 92
 A. ferrooxidans, 14, 23, 86, 89, 91
 A. caldus, 23, 89, 91, 93
 A. ferrivorans, 23, 91
 A. thiooxidans, 23, 89
Acidobacterium capsulatum, 91
Acidomyces acidophilus, 557
Actinopolyspora halophila, 147
Adineta vaga, 254
Aeribacillus pallidus, 23
Aeropyrum
 A. camini, 23
 A. pernix, 23, 303
Agrobacterium tumefaciens, 192
Alicyclobacillus, 204, 300, 326
 A. acidocaldarius, 23, 91
 A. acidoterrestris, 23
 A. cycloheptanicus, 23
Alkalibacillus, 113, 132
 A. haloalkaliphilus, 113
 A. filiformis, 139
Alkalibacter saccharofermentans, 23
Alkalibacterium
 A. olivoapovliticus, 23
 A. psychrotolerans, 23
Alkalilactibacillus ikkensis, 374, 377
Alkalilimnicola
 A. ehrlichii, 130, 158, 160, 189
 A. halodurans, 23
Alkalimonas
 A. amylolytica, 23, 157–159, 161
 A. collagenimarina, 23
 A. delamerensis, 23
Alkaliphilus, 151
 A. halophilus, 133
 A. metalliredigens, 157
 A. oremlandii, 157
Alkalispirillum mobile, 24
Altererythrobacter, 207
Alteromonas, 455
 A. marina, 227
Alvinella pompejana, 68
Ammonifex degensii, 277
Amorphotheca resinae, 557
Amphibacillus, 150
 A. jilinensis, 128
 A. tropicus, 160
Amphora, 573, 575
Anabaena, 161, 183
Anacystis, 228
Anaerobacter polyendosporus, 244
Anaerobaculum, 446
Anaerobranca
 A. gottschalkii, 286
 A. horikoshii, 24, 280
Ancylonema nordenskiöldii,
 403, 572
Anoxybacillus, 276, 278
 A. eryuanensis, 278
 A. flavithermus, 276
 A. tengchongensis, 278
 A. thermarum, 277
Aphanothece halophytica, 139, 150,
 158, 159
