

## INDEX

- Angle correction, 2.
- Annular array transducer, 23-25, 27, 36.
- Apical window, 59.
- Aortic flow, in normals, 62-64.
- Aortic regurgitation, 115-135.
- Aortic stenosis, 85-92.
- Aortic valve area, 93-96.
- Aortic valve prostheses, 173-180, 184-189.
- Atrial fibrillation, 170, 174-175.
- Atrial septal defect, 209-212, 217.
- Audio signal, 9, 84.
- Audio aliasing, 9, 12.
- Autocorrelation, 21.
  
- Backscattering, 3.
- Baseline study, 171.
- Beam to flow alignment, 9.
- Bernoulli equation, 46-47, 83-85.
- Blood flow dynamics, 37-55.
- Blood flow measurement, 45-46.
  
- Coarctation of the aorta, 232-235.
- Conduit flow, 237.
- Congenital aortic stenosis, 228-230.
- Congenital mitral stenosis, 237-238.
- Continuous mode, 14-16.
- Color flow mapping, principles of, 19-23, 25, 28.
- Color M-mode, 26.
- Color scale, 21.
  
- Dilated cardiomyopathy, 195.
- Discrete Fourier transform, 6.
- Doppler effect, 6.
- Doppler equation, 6.
- Doppler transducer, 18-19.
  
- Endocarditis, 122, 179.
- Entrance flow, 38-39.
- Examination windows, 56.
  
- Far field, 4.
- Fast Fourier transform,
- Fisher's method, 206.
- Flow contamination, 131.
- Flow imaging, 30-33.
- Flow velocity integral, 48.
  
- Frame rate, 19-20.
- Fraunhofer zone, 4.
- Frequency aliasing, 11.
- Frequency spread, 35.
  
- Gain settings, in color flow mapping, 25.
- Grey scale assignment, 7.
  
- Hepatic veins, 79, 156, 165-167.
- High pulse repetition frequency mode, 12, 32, 104.
- Hypertrophic obstructive cardiomyopathy, 190-195.
  
- Idiopathic dilatation of the pulmonary artery, 154, 226.
- Inferior vena cava, 80.
- Infundibular flow velocity, 234-235.
- Instrumentation, 17-19.
  
- Jet eccentricity, 85, 136.
- Jet width, in aortic regurgitation, 118, 127-128.
  
- Laminar flow, 39.
- Lateral resolution, 12.
  
- Mean gradient, 87, 105-106.
- Mean velocity, 52.
- Mitral flow, in normals, 70-71.
- Mitral regurgitation, 136-147.
- Mitral stenosis, 97-111.
- Mitral valve area, 100-101, 105, 107.
- Mitral valve commissurotomy, 145.
- Mitral valve output, 51-54.
- Mitral valve prostheses, 171-173, 176, 182-184.
- Modified Bernoulli equation, 83.
  
- Near field, 4.
- Normal blood flow, 60-62.
- Normal examination, 62-76.
- Nyquist velocity, 9.
  
- Parasternal window, 59.
- Paravalvular leakage, 176.
- Patent ductus arteriosus, 212-214

Poiseuille model, 39.  
 Pressure gradient, 83-85, 162-164.  
 Pressure half time, 97-100, 116.  
 Pulmonary artery pressure, 222-227.  
 Pulmonary flow, in normals, 65-67.  
 Pulmonary hypertension, 155-164.  
 Pulmonary regurgitation, 147-155.  
 Pulmonary stenosis, 219, 235-237.  
 Pulmonary output, 51.  
 Pulsatile flow, 40.  
 Pulsed mode, principles of, 8-10  
 , 15, 21-23.

Quadrature demodulation, 6.

Rainbow flow map, 24.  
 Red/blue flow map, 24.  
 Range ambiguity, 12.  
 Range gate, 8.  
 Range resolution, 9, 12.  
 Range velocity product, 11.  
 Regurgitant flow extension, 120-121  
 , 123-127.  
 Reynold's number, 41.  
 Right parasternal window, 59.  
 Right ventricular-right atrial  
 gradient, 85-87.  
 Ring array, 35.

Sample volume, 8-10.  
 Scan lines, 19-20.  
 Septal defect repair, 211-212.  
 Signal transmission, 8.  
 Spectral analysis, 6-8.  
 Spectral envelope, 174.  
 Spectral plot, 7.  
 Spectral unwrapping, 9.  
 Superior vena cava, 80.  
 Suprasternal window, 59.

Transducer, 1, 18, 23-25.  
 Tricuspid flow, in normals, 66, 75-76.  
 Tricuspid regurgitation, 158-161.  
 Tricuspid stenosis, 111-113.  
 Tricuspid valve prostheses, 184-185.  
 Turbulent flow, 141.

Ultrasonic beam, 4-5.  
 Ultrasonic attenuation, 22, 142, 173.

Valvulotomy, 229.  
 Variance, 22-23.  
 Velocity profile, 40-42, 47-48.  
 Velocity resolution, 7.  
 Ventricular septal defect, 206-209, 215.  
 Viscosity, 37.

Wavelength, 1-3.  
 Wave propagation, 1-2.  
 Windkessel model, 43-44.

X-Y plot, 7.
