SUBJECT INDEX

- approximations, 231
- asymptotically distribution-free test, 51
- asumptotic expansions, 75

- bivariate distribution, 241
- bivariate exponential, 169
- bivariate logarithmic series distribution, 57

- censored samples, 1, 203
- characteristic function, 271
- characterization, 289
- characterizations, 327
- chi-square statistics, 25
- chi-square tests, 35
- chi-squared goodness-of-fit, 57
- coherent system, 309
- combination of tests, 157
- competing risks, 335
- complementary risks, 335
- component life, 309
- consistent tests, 193
- convexity, 387
- Cramér-von Mises type tests of independence, 141

- degree of uncertainty, 363
- dependence concepts, 349
- dependent model, 309
- detecting a change point, 181
- digraphs, 397
- discrete distributions, 259
- distributions, 397
- distributions of minimum and maximum, 335
- distribution of test statistics, 181
- distribution tables and rates of convergence for both, 141
- distributional tests, 1

- EDF tests, 1
- empirical processes, 141
- estimating n , 75
- estimation, 127

- evaluation of distribution functions, 241
- exact slopes, 157
- exponential distribution, 289
- exponential families, 87
- exponential family, 95
- extreme value distribution, 309

- failure rate, 319, 327
- families of statistical distributions, 51
- feature selection discrepancy, 363
- fractional Brownian motion, 349

- gaussian mixtures, 111
- geometrical probability, 387
- gestation model, 271
- goodness-of-fit tests, 35, 51
- graphs, 397

- hazard rate, 289, 309
- hypothesis testing, 193

- identifiability, 335
- independence between two sets of variates, 219
- inequalities, 309
- inference discrepancy, 363
- inferential tasks, 363
- information gain index, 363
- invariance principles, 141
- isoprobability contour, 289

- Johnson's system, 231

- Kendall's tan, 169

- least squares, 231
- life testing, 169
- likelihood ratio test, 25
- likelihood ratio test and estimate, 181
- linear processes, 35
- locally most powerful rank test, 169

- logarithmic transform, 289
- logarithmic transformation, 133
- logistic normal distributions, 363
- maximum likelihood, 87, 111
- maximum likelihood estimators, 25,
- maximum likelihood estimators, 95
- mean residual life function, 327
- mixing, 349
- mixing distributions, 95
- mixture, 327,
- mixtures, 95
- mixtures of distributions, 111
- modes of genesis, 57
- modified maximum likelihood estimators, 203
- moments, 231
- multivariate Cramér-von Mises statistic, 141
- multivariate distribution, 309
- multivariate distributions, 289
- multivariate exponential distribution, 271
- multivariate exponential extensions, 271
- multivariate gamma distribution, 271
- multivariate IFR distributions, 271
- multivariate IFRA, 271
- multivariate logarithmic series distribution, 57
- multivariate mean, 181
- multivariate NBU distributions, 271
- multivariate NBUE distributions, 271
- multivariate outliers, 203
- multivariate Weibull distribution, 271
- noniterative estimation, 87
- normal mixtures, 111
- normative models, 363
- nuisance parameters, 51
- numerical approximation, 127
- objective grouping, 57
- parameter estimation, 133
- Pareto distribution, 127
- Pearson system, 241
- performance analysis, 363
- Pitman relative efficiency, 169
- Poisson process, 319
- power-law spectra, 349
- power study, 169
- power transform, 289
- probabilistic data, 363
- quadrature, 241
- random secants, 387
- rational fraction, 231
- reliability, 335
- renewal process, 327
- robust estimators, 203
- sample size estimation, 75
- second order efficiency, 75
- self-similarity, 349
- series and parallel systems, 335
- shock models, 271
- shock model, 319
- Spearman's rho, 169
- sphericity, 219
- statistics, 397
- stepdown procedure, 157
- stochastic expansion, 25
- stochastic failure rate, 319
- stochastic processes, 349
- strictly stationary and strong mixing processes, 35
- subject inference, 363
- survival analysis, 327
- system life, 309

t-distribution, 193
test for lognormality, 133
test of independence, 169
threshold model, 271
transformation, 231
transformations, 259
truncated samples, 75
t-tests, 193

unbiased tests, 193
weak convergence, 319
Weibull, 279, 280
Weibull distribution, 309, 319
weighed Cramér-von Mises
test, 51
W tests, 1
