

Index

- acid-citrate-dextrose 10, 19, 20, 27, 28, 38
- acute leukemia
 - management of 38, 43
 - and platelet transfusion 11, 27, 37-42
 - and prophylactic platelet transfusion 43-52
- albumin 1 concentrates 25
- American Association of Blood Banks Technical Manual 10
- American National Red Cross 11, 25
- anticoagulants 10, 15, 19, 20, 27, 28
- anti-haemolytic factor 12
- aspirin, effect on platelet-phoresis 16, 22
- bleeding time, Duke's method 32-34
 - see also* platelet transfusion, bleeding time following
- blood
 - collection of 11-12, 13
 - components of 11,12
 - groups, platelet collection and 20-22
 - whole 11
- bone marrow 15
 - and malignant cell infiltration 37
- buffy coat 14, 19, 20
- cancer *see* acute leukemia
- factor VIII concentrates 19, 25, 38
- Fenwal packs 20
- granulocyte transfusion 30, 48-50
- Haemonetics cell separator 14, 24, 27
 - yield from 27
- haemorrhage
 - causes of
 - decreased fibrinogen 37
 - disseminated intravascular coagulation 37
 - fibrin degradation 37
 - platelet consumption 37
 - thrombocytopenia 13, 16, 32, 37, 39, 43
 - control of *see* platelet transfusion and platelet count 43-44
- hepatitis, screening for 22
- HLA histocompatibility antigens 40
- hypotonic stress test, for platelet viability 28, 31
- immunoglobulin, specific 22, 24
- Latham bowl 14
- National Blood Transfusion Service 27

PLATELET TRANSFUSION

- neutropenia 32
- plasma
 - cryoprecipitate-poor 12
 - fresh frozen 24
 - platelet-poor 12, 13
 - platelet-rich 12, 13, 19, 26, 38
 - separation from whole blood 10, 14
- plateletpheresis 11, 14-16
 - aspirin and 16, 22
 - cell separators for 11, 24, 26
 - choice of donor 15, 16
 - comparative expense 24
 - and immunoglobulin production 24
 - multiple bag 11, 14
 - oxygen tension during 14
 - platelets, numbers obtained 15-16, 25, 37-38
 - sterility during 22-24
 - technique of 14
- platelets
 - aggregation of 28-31
 - aspirinated 16
 - collection of 9-16, 19-26, 27
 - cell separators in 11, 24, 26, 27-34
 - comparison of methods 27-34
 - comparative expense 24
 - differential centrifugation 10, 11-12, 13, 19, 21
 - plastic bag systems 10, 11
 - by plateletpheresis 11, 14-16, *see also* plateletpheresis
 - siliconized glass bottles 10
 - sterility during 22-24
 - yield 24, 27, 34, 37
 - concentrate of 16-17, 19, 24, 28
 - sterility 22-24
 - storage 20
 - pH of 14
 - quality control of 16-17, 22-24
 - respiration of 14
 - response to temperature extremes 14
 - separation from whole blood 10, 11, 16
 - size alteration of 28
 - storage of 10, 11, 12-14, 15, 20, 37, 38
 - survival 9
 - post transfusion 12, 13, 40-41, 47
 - viability 11, 12, 28, 38-39
- platelet transfusion
 - bleeding time following 31, 32-34, 44-45
 - histocompatibility in 11, 40, 45, 49
 - historical aspects 9-11, 12
 - immediate 10, 12
 - and infection 40
 - in leukemia patients 11, 27, 37-42, 43-52
 - patient response to 16
 - and platelet function 31-34
 - platelet increment following 31-32, 39, 40, 47
- prophylactic 43-52
 - and granulocyte transfusion 30, 48-50
 - platelet sensitization resulting from 45, 47, 48, 50-51
 - cf.* therapeutic 45-46
 - resistance development 37, 40
 - single donor 27-28, 38
 - and splenomegaly 40-41
 - of stored platelets 10, 11, 12-14, 38-39, 41
- polycythaemia 10
- radioimmunoassay, for hepatitis B surface antigen 22
- red cells
 - loss during plateletpheresis 15
 - separation from whole blood 14
- syphilis, screening for 22
- thrombocytopenia 13, 16, 32, 37
