

## INDEX OF AUTHORS

- Agathopoulos, A. 35  
Aherne, W. 278  
Alman, C. 17  
Althausen, T. L. 243  
Anderson, T. 242  
Ashworth, M. A. 205  
Assan, R. 210, 220  
Atchley, W. A. 60
- Barron, D. H. 98  
Beere, A. 9  
Betke, K. 77  
Beutler, E. 74  
Bickel, H. 163, 183, 294, 295  
Bitter, K. 83  
Blair, M. 244  
Blatherwick, N. R. 263  
Bloor, W. R. 244  
Boillot, J. 210  
Boyd, E. 165  
Bradshaw, P. J. 263  
Brosan, J. T. 4  
Bruyne, J. I. de 232  
Burget, G. E. 243
- Cahill Jr., G. F. 124  
Carey, B. W. 243  
Christensen, N. H. 97, 124  
Clark, C. M. 283  
Constantsas, N. 35  
Cori, C. F. 243  
Cori, G. T. 243  
Cornblath, M. 240, 285  
Cross, K. W. 288  
Csáky, T. Z. 263  
Cupertovic, M. 268  
Czerny, 178
- Danon, Y. 75  
Davis, J. A. 205  
Dawkins, M. J. R. 227, 283
- De Gasparo, M. 200  
De Meyer, R. 38, 233, 281, 292, 293, 294  
Delage, A. 210  
Dent, 97  
Diamondstone, T. I. 27  
Dickerson, J. W. 131  
Diczfalusy, E. 106  
Dost, F. H. 273  
Dressler, M. 165  
Ducloux, J. 210
- Eggermont, E. 242, 296  
Estabrook, R. A. 4  
Ewing, M. E. 263
- Fenton, P. F. 243  
Feyder, S. 243  
Filer Jr., L. J. 144  
Fomon, S. J. 142, 144, 147, 163, 164,  
175, 186, 188, 242
- Garfinkel, D. 14  
Gaull, G. 27  
Gepts, W. 200  
Gerard, P. 281  
Ghadially, F. M. 244  
Ghadimi, H. 115  
Goldberg, M. L. 60  
Grodon, H. H. 128  
Gorski, J. 61  
Greengard, O. 28
- Halmi, N. S. 244  
Hansman, C. 165  
Hardman, M. J. 222  
Haven, F. L. 244  
Heding, L. G. 211  
Hehir, P. 254  
Henssen, S. G. H. 187  
Hindmarsh, J. T. 255, 257, 258, 263  
Ho, P. M. 263

- Holt Jr., L. E. 271  
 Hommes, F. A. 3, 11, 12, 13, 24, 25, 90,  
 91, 92, 189, 220  
 Hooper, C. S. 244  
 Hopkins, L. 107  
 Horne, E. A. 243  
 Hugget, A. St. G. 245  
 Hull, D. 176, 189, 220, 222, 227, 233,  
 280, 292, 293, 296  
 Hunter, D. J. S. 283
- Jonxis, J. H. P. 89, 189  
 Josso, N. 210
- Keller, 178  
 Kerpel Fronius, E. L. 178  
 Kerr, G. R. 35  
 Kershaw, T. G. 250, 256  
 Kilby, D. 263  
 King, E. L. 17  
 Kleihamer, E. 77  
 Klopper, A. 106
- Lamprecht, W. 4  
 Larson, H. W. 263  
 Larralde, J. 243  
 Lassen, U. V. 263  
 Levin, S. Z. 128  
 Leyton, G. B. 254  
 Lin, H. M. 193  
 Lindblad, B. S. 38, 111, 127, 143, 175,  
 186, 188, 268  
 Lindroos, M. 27  
 Lloyd, R. 243  
 Lowy, C. 198  
 Lubchenco, L. O. 165
- McCance, R. A. 109, 163, 177, 183, 184,  
 185, 187, 188, 294  
 McCarthy, T. E. 245  
 McDougall, E. J. 243  
 McFadyen, I. 98, 107  
 McPherson, H. T. 245  
 Maddock, S. J. 243

Wright, A. D. 195
- Young, M. 24, 90, 97, 100, 102, 104,  
105, 109, 110, 186, 187, 208, 296
- Zellerström, R. 38  
Ziegler, E. E. 144  
Zinkham, W. H. 79

## INDEX OF SUBJECTS

- $\alpha$ -amylase activity 238
  - development of 238
- $\alpha$ : $\beta$  cells ratio in foetal pancreas 193
- Active placental transport 107
- Adelynate kinase activity 4, 6
- Adenine nucleotides 5
  - during glycolysis 5
- Adrenal cortex 43
  - permissive role of 43
- Adrenal hormones 61
- Aerobic glycolysis 5
- Alanine 127, 186
- Alanine/valine ratio 123
  - and malnutrition 123
- Albumin in plasma 156
  - and nutrition 156
- Aldolase activity 93, 296
  - in dysmature rats 93
  - in praemature infants 296
- Aminoacids 97, 102, 119, 139, 186
  - active placental transport of 109
  - cord vein plasma level of 119
  - foetal plasma level of 102
  - maternal plasma level of 102
  - parenteral nutrition 186
  - placental transport 97
  - and praemature infants 139
- Aminoacid metabolism 26
  - and enzyme systems 26
- Aminoacids in plasma 102, 104, 110, 111-125, 133-135, 142, 143, 164, 180, 187
  - of cord vein blood 116
  - disappearance rate 143
  - during pregnancy 116
  - in full term infants 134
  - and gestational age 110
  - light for dates infants 104
  - in low socio-economic group 120
  - and malnutrition 122, 142
  - maternal-foetal relationship 104
  - in the newborn 119
  - in normal non-pregnant women 115
  - and nutritional status 164
  - and placental transport of amino acids 102
  - in postmaturity 104
  - in praemature infants 135
  - and small for date infants 111
- Aminoacid requirement 138
  - in praemature infants 138
- Amylase 238
- Anaerobic glycolysis 5
- Androgens 59
- Anencephaly 200
  - and insulin secretion 200
- Anoxia 12, 22
- Arginine 135, 203, 216
- ATP synthesis 4, 17
  - in adult rat liver 4
  - in foetal rat liver 4
  - rate of 17
- Biological information 54
- Blood flow 99
  - and placental transport 99
- Brain 168, 172, 183
  - insufficient development of 183
- Brown adipose tissue 222, 227, 229, 230
  - development in newborn rabbits 222
  - and free fatty acids 227
  - and hormones 230
  - and starvation 229
  - and thermogenesis 222
- Caloric intake 154
  - and gain in weight and length 154
- Calorie deficiencies 179
- Carbohydrate composition 283
  - of the rat embryo 283

- Carbohydrate metabolism 281  
  in the newborn rat 281  
Carbohydrate storage 285  
Carbohydrate tolerance 234, 238, 242  
  development of 234, 238  
  in the newborn 242  
Casein-based formula 152  
Catechol-O-methyltransferase 38  
Chromatin 72  
  and template activity 72  
Condon 54  
Cold exposure 223, 226, 232  
  and thyroxin 232  
Computer representation 14  
  of glycolysis 14  
Corticosterone 61  
Cortisol 61  
Cow milk 128  
Culture of foetal liver cells 27, 44  
Cyclic AMP 204, 220  
Cystathionase 33  
Cystathionine synthase 33  
Cysteine 31  
Cystine 139, 143  
Cytochrome oxidase 24
- Detoxicating enzyme systems 43  
Development 3, 26, 28, 40, 53, 73, 193,  
  234, 236  
  of  $\alpha$  and  $\beta$  cells in foetal pancreas 193  
  of carbohydrate tolerance 234  
  of disaccharidases 236, 237  
  of enzyme systems 53  
  of enzymes 28  
  of enzymes of aminoacid metabolism  
  26  
  of erythrocyte enzyme systems 73  
  of foetal and newborn liver 40  
  of glycolytic enzymes 3  
  of insulin secretion 193  
  of liver enzyme activities 40  
  of muscle fibers 172  
  of transsulfuration pathway 31  
Diabetic mother 197  
  the infant of 197  
Dibutyl cycli AMP 204  
Diet during pregnancy 112  
Disaccharidase activity 236  
  development of 236  
DNA 55  
  DNA in organs of guinea pigs 172  
  DNA in organs of pigs 169  
Drug susceptibility 77  
  of erythrocytes in newborn infants 77  
Dysmaturity 92
- Endogenous D-glucose in intestinal wall  
  264  
Energy expenditure 290  
  in newborn rat 290  
Energy production 3  
Enzyme 26  
  of aminoacid metabolism 26  
Enzyme activity, 28, 30, 40, 53, 93  
  and hormones 40, 53  
  and hydrocortisone 30  
  induction of 28  
  and phenobarbital 93  
Enzyme development 28  
  induction of 28  
Enzyme systems 3, 26, 40  
Erythroblastosis foetalis 198  
  and hyper insulinaemia 198  
Erythrocytes 73, 83  
  enzyme systems of 73  
  life span of 73  
  membrane of 83, 86  
Erythrocytes in newborn infants 86  
  high susceptibility to oxidizing agents  
  86  
  shortened life span of 86  
Estrogens 59  
Exchange transfusion 199  
  and hypoglycaemia 199
- Fat emulsions 271  
  and parenteral feeding 271  
Fatty acids 22  
  synthesis of 22  
Foetal haemoglobin 89  
Foetal insulin release 204  
Foetal liver 40, 44  
Foetal pancreas 201, 210, 220  
  and glucagon 210  
  histology of 220  
  insulin secretion in vitro 201  
Foetal undernutrition 112  
Free fatty acids 176, 227, 275  
  and brown adipose tissue 176  
  in dysmature infants 176

- Fructose 240, 295  
 and newborn infants 295  
 and premature infants 240  
 Fructose-6-phosphate 24
- Galactosuria 238  
 Gene 54  
 Gestational age 110  
 and amino acids in plasma 110  
 and placental transport 110  
 Glucagon 204, 210, 211, 216, 220  
 and cyclic AMP 220  
 in foetal pancreas 210  
 and hypoglycaemia 220  
 immunoassay of 211  
 in plasma 210  
 Glucagon like immuno-reactive material  
 212, 216  
 Gluconeogenic enzymes 292  
 induction of 292  
 Glucose 203, 275, 285, 292, 294  
 intestinal transport of 294  
 in newborn rat 285  
 utilization of 292  
 Glucose absorption 235, 250  
 in the human foetus 235  
 and undernutrition 250  
 Glucose-6-phosphatase 48, 93  
 in explants of foetal liver 48  
 and hydrocortisone 48  
 Glucose-6-phosphate 7, 20, 24, 48, 92  
 Glucose tolerance 197  
 intravenous 197  
 Glucuronyl-transferase 44, 93  
 Glutathione 78  
 Glycerol 275  
 Glycine 127, 134, 135, 137, 186, 189  
 Glycine/valine ratio 122  
 and malnutrition 122  
 Glycogen 7, 22, 283, 285, 292, 294  
 in muscle 294  
 in newborn rat 285  
 in newborn rabbits 292  
 Glycogen content 285  
 Glycolysis 3, 5, 14  
 and adenine nucleotides 5  
 and computer representation 14  
 and glycolytic intermediates 5  
 and kinetic model 14  
 Glycolytic enzymes 3, 15, 92  
 in dysmature rats 92  
 of liver 3, 15  
 Glycolytic intermediates 5  
 during glycolysis 5  
 Glycolytic flux 7, 19  
 Growth hormone 57, 208  
 Growth promoting effect of RNA 64
- Haemoglobin 89  
 Heat production 277  
 Hepatocytes 11  
 isolation of suspensions 11  
 Heterogeneity 73  
 of erythrocytes in newborn infants 73  
 Hexokinase 13, 20  
 Histidine absorption 250  
 and undernutrition 250  
 Hormonal stimuli 43  
 and maturity of liver 43  
 Hormones 40, 53, 230  
 and brown adipose tissue 230  
 and induction of enzyme activity 40,  
 53  
 Human foetal pancreas  $\beta$  cell 201  
 secretory behaviour of 201  
 Human milk 128  
 Hydrocortisone 30, 47, 48  
 on glucose-6-phosphatase 48  
 and induction of enzyme activity 30,  
 47  
 Hydroxyacyl-CoA-dehydrogenase 269  
 p-Hydroxyphenylpyruvate hydroxylase  
 36  
 Hydroxyproline 137, 179  
 Hydroxyproline peptide excretion 137  
 Hydroxyproline peptides in the urine  
 179  
 Hyperglycinaemia 188  
 Hyperinsulinaemia 196, 198  
 and erythroblastosis foetalis 198  
 and maternal diabetes mellitus 196  
 Hyperplasia of foetal islets 196  
 Hypoglycaemia 196, 197, 198, 199, 220  
 and erythroblastosis foetalis 198  
 and exchange transfusion 199  
 and glucagon 220  
 and maternal diabetes mellitus 196
- Immaturity 43, 51, 92  
 Inadequate nutrition status 142

- Induction of enzyme development 28,  
30, 53, 93, 292  
and hydrocortisone 30, 47  
and phenobarbital 93
- Infant of diabetic mother 196
- Infantile malnutrition 177
- Influence 237  
of dietary 237
- Infusions of fat emulsions 269, 277,  
278, 280  
and acid-base balance 280  
dosis 278  
and free fatty acids 280  
side effects 277
- Insulin 195, 198, 202  
plasma level 195, 198
- Insulin content 194, 198  
of pancreas 194, 198
- Insulin secretion 193, 194, 195, 200, 201,  
208  
and anencephaly 200  
development of 193  
in the newborn 195  
and perfusing of the pancreas 208  
in utero 194  
in vitro 201
- Intercurrent infection 183
- Intestinal transport 243  
and undernutrition 243
- Intravenous glucose tolerance 197
- Islets of Langerhans 193, 194, 196  
histology 194  
hyperplasia 196
- Isolation of hepatocytes 11
- Isolation of RNA 65
- Isoleucine 116
- Isomaltase 236
- Jejunal and ileal response to under-  
feeding rats 254
- Ketone bodies 273
- Ketotic hyperglycinaemia 189
- Kinetic model 14  
of glycolysis 14
- Krebs' cycle 22, 289
- Lactacidaemia 283
- Lactase 178, 236
- Lactase deficiency 184
- Lactate 289
- Lactate pool 289  
in newborn animals 289
- Lactic acid 285  
in newborn rat 285
- Lactosuria 237
- Length 154  
and caloric intake 154  
and protein intake 154
- Leucine 99, 105, 121, 202, 268
- Lipolysis 273
- Life span of erythrocytes 73
- Lysine 135
- Malnutrition 111, 122, 177  
and aminoacids in plasma 122
- Marasmic children 183
- Marasmus 179, 183  
and infection 183
- Maternal diabetes mellitus 196  
and hyperinsulineamia 196  
and hypoglycaemia 196
- Maternal undernutrition 111, 175
- Maturity 43, 175
- Methemoglobinemia 78
- Methionine 31, 38, 136
- Milk 128
- Milk-based formulas 150
- Muscle fibers 172
- Nitrogen balance 129, 142
- Noradrenaline 222
- Nutritional performance 156
- Organ culture 27, 44
- Ornithine 99
- Oxidizing agents 77
- Oxydative phosphorylation 3
- Oxygen consumption 24, 90, 288  
in newborn rat 288
- Oxygen deficiency 12, 22
- Pancreas 201  
insulin release in vitro 201
- Pancreatic glucagon 212
- Pancreatic insulin content 194
- Parenteral feeding 269, 271, 295  
with fat emulsions 269, 271, 295
- Parenteral feeding with aminoacids 187
- Parenteral nutrition 186  
with aminoacids 186

- Pasteur effect 22  
 Permissive role 43  
   of adrenal cortex 43  
 Phenobarbital 93  
   and induction of enzyme activity 93  
 Phenylpyruvate tautomerase 36  
 Phosphofructokinase 13, 21  
 Placental transport of aminoacids 97, 99,  
   102, 109, 110  
   and aminoacids in plasma 102  
   and blood flow 99  
   and gestational age 110  
 Plasma 119, 216  
   during the first hours of life 119  
 Plasma aminogram 113, 114, 120, 133,  
   135  
   of cord blood 120  
   of mother 120  
   of non-pregnant women 114  
   of pregnant women 114  
   of praemature infants 135  
 Plasma level of insulin 195, 199  
 Polypeptides 109  
   and placental transport 109  
 Postnatal undernutrition 113  
 Praemature infant 128  
 Production of carbondioxyde 288  
   in newborn rat 288  
 Proline 127, 135, 186  
 Protein from cow milk 158  
 Protein deficiencies 180, 183  
   and heart failure 183  
 Protein/DNA ratio 170, 173  
   in organs of guinea pigs 173  
   in organs of pigs 170  
 Protein in organs of guinea pigs 171  
 Protein in organs of pigs 168  
 Protein intake 154  
   and gain in weight and lenghts 154  
 Protein requirement 128, 144, 157, 163  
   in normal infants 144  
   in praemature infants 128  
 Protein status 165  
   of 'small for date' animals 165  
 Protein synthesis 55  
 Pyruvate kinase 25  
  
 Requirement of aminoacids 138  
   in praemature infants 138  
 Requirement of protein 128, 144, 157,  
   158, 163  
   in normal infants 144  
   in praemature infants 128  
 Reticulocytes 89  
 Ribosome 54  
 RNA 54, 63  
   isolated from the seminal vesicle 63  
  
 Secretion of aminoacids 109  
 Serum concentrations of albumin 156  
 Sheep 98  
 Side effects of triglyceride infusions 277  
 Siderophilin 180  
 Small for date animals 165  
 Small for date guinea pigs 170  
 Small for date infants 111, 268, 296  
   and aminoacids in plasma 111  
   and leucine 268  
   and starvation 296  
 Small for date pigs 167  
 Starch 242  
   digestion in the newborn 242  
 Starvation 229, 232, 263, 293, 296  
   and brown adipose tissue 229  
   and glycogen 293  
   and intestinal transport 263  
   and small for date infants 296  
 Stimulation 28  
   of enzyme development 28  
 Sucrase 236  
 Sulphonylurea 196  
 Synthesis of RNA 62  
  
 Testosterone 57, 63, 64  
 Theophylline 204  
 Thermal control 226  
 Thermogenesis 222, 224, 233  
   and brown adipose tissue 222  
   and insulin 233  
   onset after birth 224  
 Thyroxine 57  
 Tolbutamide 197, 203  
   treated with 197  
 Transferrine 180  
 Transsulfuration pathway 31  
   development of 31  
 Triglycerides 271

Rat hepatocytes 11  
   isolation of suspension 11

- Tyrosine 136, 139
- Tyrosine transaminase 26, 27, 35, 36, 47, 51
- in explants of foetal liver 47
  - in foetal human liver 27
  - in foetal rat liver 27
  - and hydrocortisone 35
- Underfeeding 264
- Undernutrition 111, 122, 175, 177, 243, 254, 264
- and aminoacids in plasma 122
  - during pregnancy 175
  - and intestinal function 254
  - and intestinal transport 243
  - and thinning of intestinal wall 264
- Valine 127
- Weight 154
- and caloric intake 154
  - and protein intake 154
- Weights of organs of guinea pigs 171
- Weights of pancreas 211
