

Index

Absorption	247, 248, 365-370, 380-382
Absorption, two-photon	339-342
All-optical switching	264-292, 327, 350-356
Bandgap changes, quantum well disordering	189-190, 195-197
Beam propagation method	35-51
Birefringence in fibres	277-279
Bistability in lasers	143, 164-1636, 216
Bistability, absorptive	145-148
Bistability, dispersive	149-154
Bistability, modal	154-158, 159
Bistability, polarisation	159-162
Bistability, pulse-position	163
Bragg reflector	46
Cavities, waveguide	63-69
Characterisation, MBE, in situ	113-116
Chemical beam epitaxy (CBE)	118-121
Coherent receivers	214
Contra-directional coupling	55
Coordinate transformations	231-233
Coupling into waveguides	61-63
Coupled mode theory	51-60
Coupled waveguides	31-33, 52-54, 211
Crystal growth	362
Crystal optics	14-15
Czochralski technique	362
Demultiplexing, via wavelength	58-60
Device configurations	77-81
Devices, lithium niobate	75-81, 83
Discontinuities in waveguides	40-43
Distributed Bragg reflector (DBR) lasers	186, 206, 211, 212-213
Distributed feedback (DFB) lasers	186, 206, 211-213
Doping of crystals	362
Doping of materials	2
Doping in fibres	292-294
Doping of silica	7-8
Effective index method	24-27
Electrical properties of disordered MQWs	186
Electroabsorption effects	173-176, 179-181
Electrooptic effects	14-15, 179

Electrooptic modulation	75-77
Electrooptical devices	75-81, 83, 91-93
Energy levels	365-368, 380-382
Erbium, in fibres	297-307
Erbium, in LiNbO_3	362-363, 372, 378-391
Excited state absorption (ESA)	380
Excitons	171, 245-247, 248-251
Extended cavity laser	198-201
Fabrication, waveguide	73-75
Facet, AR-coated	50
Femtosecond techniques and studies	327-338, 343-345
Fibre amplifiers	289, 292-323
Fibres, optical	259-260, 266-288, 289, 346-350
Finite difference method	27-31
Fluorescence	365-368, 380-382
Functional integration	215-220
Gain in lasers	123-127, 128-130, 135, 136
Gain in waveguides	40
Gain, nonlinear	138-139
Gas source MBE	117
Grating couplers	58-59
Gratings in waveguides	55-56, 191
Group velocity dispersion (GVD)	266-271, 271-274
Growth, AlGaAs/GaAs	116
Growth, GaInAsP	105-107
Growth, MBE	99-100, 110-116, 116-121
Growth, MOCVD	99-100, 101-109
Growth, quantum wells	107-109
Harmonic oscillator model	3, 233-235
HBTs	206, 207-208
HEMTs	207-208
Hydride sources	102
Impurity induced disordering (IID)	185, 186-189, 195-197, 197-198
Indiffusion	9, 362-363, 364-365
Ion exchange	10
Ion implantation	186, 189, 195-196, 197, 362-363
Kramers-Kronig relations	4-6
Lasers, extended cavity	198-201
Lasers, fibre	292-299
Lasers, Nd:YAG and Ti:sapphire	296-297

Lasers, quantum well	123, 198-201
Lasers, quantum wire and quantum box	134-139
Lasers, semiconductor	91, 123, 134-139, 143, 198-201, 206, 207, 211-215, 296-297
Lattice mismatch	210
Lithium niobate (LiNbO ₃)	8-10, 73, 266-271, 361
Local area networks (LANs)	206
Logic, optical	219, 220, 264-271, 283-286, 286-287
Low dimensional structures	87
Lossy waveguides	40
Manley-Rowe relations	235-2348
MBE growth	99-100, 110-116, 116-121
MBE growth, gas source	117
MESFETs	206, 207-208
MgO:LiNbO ₃	362, 364-365, 376
MOCVD growth	99-100, 101-109
MODFETs	206
MSM devices	207-208
Modal analysis of optical waveguides	22-34
Modelling of optical waveguides	21-22
Modulation bandwidth	77, 128-130
Modulation dynamics	128-130, 136
Modulation, electrooptic	75-77
Modulators	83, 171-184, 213
Multiple quantum well (MQW) modulators	171-184
Multiple quantum well waveguides	171-184, 346-350
Neodymium doping	362, 365-378
Noise, spectral properties in lasers	131-133
Non-absorbing mirrors (NAMs)	186
Nonlinear optical devices	91-93, 327, 346-350
Nonlinear Schrödinger equation	271-274
Nonlinear susceptibility	226-229
Nonlinear optical waveguides	39, 225-251, 329-338, 339-342
One-dimensional (1D) devices	93-97
Optical amplifiers	217, 289, 291-292, 368-374, 382-391
Optical bistability	143
Optical fibres	259-260, 264-288, 289, 292- 296, 346-350
Optical gates	219
Optical interconnection/signal processing	206
Optical logic	220, 266-271, 283-286, 286- 287

Optoelectronic integrated circuits (OEICs)	185-186, 205, 205-210
OEIC receivers	207-208, 214
OEIC transmitters	206
Organo-metallic sources	102
Perturbation theory	274-277
Photodiodes	207-208
Photoelastic effect	14
Photoluminescence	189, 196
Photonic integrated circuits (PICs)	189, 205, 210-214
Polymer waveguides	34, 42
Propagation loss measurements	190, 197
Proton exchange, in lithium niobate	10, 364-365
Pulse width determination	256-258
Pump-probe technique	330
Pumping of fibres	296-297, 318
Pumping of waveguide lasers	365-368, 374-378, 380-382, 382-391
Quantum box lasers	134-139
Quantum confined Stark effect (QCSE)	173
Quantum wells	87-93, 243-245
Quantum well disordering/intermixing	185-203
Quantum wells, growth	107-109
Quantum well lasers	123
Quantum wells, linear optical properties	87
Quantum well modulators	171-184
Quantum wells, nonlinear optical properties	88-90
Quantum wire lasers	134-139
Raman amplification	307-323
Raman scattering, stimulated	261-265, 307-323
Rare-earth doping	292-296, 297-307, 361, 362-363, 365-378, 378-391
Rate equations	368, 383
Reflections in waveguides	40-43
Refractive index, doped silica	7
Refractive index, lithium niobate	8
Refractive index, III-V semiconductors	11-14
Refractive index measurements	191
RHEED	113-116
Rib waveguides	31-33
Schrödinger equation, nonlinear	271-274
Second harmonic generation	255-256, 256-258
Second order nonlinearity	231-235, 238-240
Self electrooptic effect devices (SEEDs)	181

Self-phase modulation	259-260
Sellmeier equations	6
Signal processing	206
Solitons	266-271, 356
Spectral properties of lasers	138
Stimulated Raman scattering	261-265, 307-323
Stokes shift	307-312, 314-317, 318-323
Switches, electrooptic	43-46, 217
Switching, all-optical	266-288, 346-350
Third order susceptibility	240-243
Threshold current	123-127, 135
Time division interferometry (TDI)	331
Titanium indiffusion	9, 364-365, 378
Two-photon absorption	339-342
Wave equation	252-255
Waveguide amplifiers	361, 368-374, 382-391
Waveguide coupling	31-33, 51-54, 211
Waveguide fabrication	73-75
Waveguide lasers	361, 374-378, 391
Wavelength conversion	218-219
Wavelength demultiplexing	58-59
Wavelength filtering	219
Wavelength multiplexing	214
Wavelength tunability	212-213
Zero-dimensional (0D) devices	93-97
