

# Index

- absorption peak(s)
  - Bordoni peak, Hasiguti peak .... 31, 32
- amorphous films ..... 239, 265
  - grain boundary..... 232
- Andrade creep..... 65, 93
- anhydrous mantle magma ..... 187
- Arrhenius dependence ..... 50
- assimilation..... 179, 189
- basaltic lava ..... 39, 42
- Birch-Murnaghan equation..... 147
- bulk viscosity..... 158
- Burgers body ..... 56, 60
- calc-alkaline magma ..... 180, 202
- capillary vector ..... 71, 73, 76
- Caputo-body ..... 33, 59
- cavitation ..... 4, 12, 18, 21
- Cole-Cole diagram..... 35, 59
- Cole-Davidson function..... 60
  - relaxation..... 35
- compaction ..... 150
  - Boussinesq approximation ..... 150
  - length..... 156
  - velocity..... 160, 168
- complex shear modulus ..... 30, 35, 54
- complex shear viscosity..... 35, 45
- compression viscosity..... 50
- conjugate veins ..... 209, 212, 215
- connectivity ..... 86-88
- contact aureole..... 210, 214
  - metamorphism..... 179, 187, 194
- convecting mantle..... 142
- convective derivative ..... 155
- creep
  - activation energy for creep.....6
  - activation volume for creep.....6
  - Coble creep .....21
  - creep equation.....6
  - creep strength.....20
  - diffusion creep .....6
  - dislocation creep .....6
  - power-law creep equation.....17
- crustal anatexis..... 189, 195, 207
- crystal-melt aggregate .....36, 51
- dacite Mount St. Helens .....29, 39, 42
- Darcy's law..... 133, 149, 164
- Debye relaxation .....58
- decompression.....143
- decompressional melting.....144
- degree of depletion.....157
- diffusion creep .....*See* creep
- dihedral angle.....
  - ..... 67, **70**, **79**, 93, 99, 105, 121
- dilatancy.....33
- dilatation .....149
- dislocation creep .....*See* creep
  - resonance mechanism .....32
- ductile contacts.....217
- dynamic viscosity.....48
- effective capillary force.....73
- elastic moduli.....5
- enstatite .....22
- equation of state .....152

- flow law ..... 8, 15, 18  
 fluid film ..... 254  
 fractional crystallisation .... 179, 185, 189  
   exponent ..... 58  
 fractionation path ..... 182  
 fugacity ..... 8  
   fugacity exponent ..... 8, 14, 17  
   water fugacity ..... 8  
 gas-medium high-pressure apparatus... 12  
 glass-ceramics ..... 36  
 grain boundary .....  
   .....29, 36, 51, 57, 62, 72, **78**, 83  
   diffusion ..... 6  
   sliding ..... 5, 12, 19  
   melting ..... 229, 233  
   migration ..... 32  
   plucking ..... 119  
   viscous sliding ..... 31  
   energy .....  
   .....67, 73, 75, 88, 97, **98**, 106, 127  
   wetting ..... 117  
 grain growth ..... **78**, **83**  
 grain size exponent ..... 18  
 Harker-diagrams ..... 259  
 hartzburgite ..... 147  
 homophase interface ..... 238  
 hot spot tracks ..... 143  
 hybrid magma ..... 182, 191  
 hydrous mantle magma ..... 187, 194, 201  
 interconnection of melt ..... 95  
   threshold ..... 93, 109, 115, 125  
 intergrain slip ..... 50  
 intergranular layers ..... 229, 232, 238  
   thermoelasticity ..... 32  
 interfacial curvature ..... 74, 76, 79  
 internal friction ..... 30, 40, 43, 53  
 intracrystalline glass ..... 231  
 island model ..... 255  
 latent heat ..... 184  
 lattice fringe image ..... 234, 240, 248  
   mismatch ..... 80  
   preferred orientation ..... 89  
 liquid-line-of-descent ..... 180, 202  
 log-log plot of stress ..... 22  
 leucosomes ..... 215, 219, 223  
 magma waves ..... 160  
 magmatic fractionation ..... 184  
 mantle flow ..... 155  
   plumes ..... 145  
   wedge ..... 6  
 Maxwell liquid ..... 35, 50, 53  
 melanosomes ..... 215, 217, 220  
 melt  
   channels ..... 94, 109, 119, 132  
   distribution ..... 94, 106, 119, 130  
   films ..... 229, 239, 250  
   generation ..... 164, 176  
   percolation ..... 154  
   pockets ..... 95, 107, 119, 132, 156  
   pools ..... 229, 253, 260  
   retention number ..... 154  
   segregation ..... 148, 210, 220  
   tubules ..... 152  
 microcracking ..... 21  
 microfracturing ..... 5, 19  
 migmatite(s) ..... 210, 215  
   "zebra" ..... 215  
 misorientation ..... **67**, **81**  
   angle ..... 81  
   axe ..... 82  
 momentum equation ..... 153  
 normalised frequency ..... 51  
 oceanic crust ..... 142  
   plate ..... 26  
 olivine ..... 146  
   aggregates ..... 19  
   -basalt aggregates ..... 4, 21, 27  
   San Carlos ..... 9  
 orthopyroxene activity ..... 7, 10  
 Ostwald ripening ..... 83  
 oxide activity ..... 6  
 oxygen fugacity ..... *See* fugacity  
 parent magma ..... 181  
 permeability ..... 93, 107, 118, 131, 152  
 perovskite ..... 146  
 plastic flow ..... 6  
 plume ..... 141, 143, 157  
 Poisson's ratio ..... 49  
 porosity wave ..... 159  
 potential temperature ..... 146  
 pressure-release melting ..... 25  
 protolith ..... 119, 122, 131, 209, 213, 219  
 pyrolyte ..... 148  
 pyroxene gabbro ..... 29  
 Q power-law body ..... 59  
 radiogenic heating ..... 145  
 relaxation spectrum ..... 33, 54  
 restite ..... 209, 218

- segregation velocity ..... 141, 161, 166  
 seismic wave attenuation ..... 30, 64  
 shear modulus ..... 38  
 solidus temperature ..... 147  
 spinel lherzolite ..... 42  
 squirt of melt ..... 33  
 syenite ..... 212, 217  
 standard anelastic solid ..... 35, 56  
 stress exponent ..... 4, 14, 18, 20  
 stretched exponential relaxation ..... 58  
 surface energy ..... 69, 73, 83, 97, 107  
     chemical potential ..... 102, 107  
 textural equilibrium ..... 95, 100, 114, 125  
 thermal diffusivity ..... 153  
     expansion ..... 5  
 tonalite ..... 189, 206  
 tonalitic crustal rocks ..... 194  
 torsion oscillation ..... 38, 45  
     pendulum ..... 36  
 transient rheology ..... 30, 34  
 triple junction ..... 12, 78, 86, 113, 116, 127  
 T-X diagrams ..... 186  
 viscoelasticity ..... 29, 35, 49  
 viscosity ..... 6, 22, 25  
 viscous compaction ..... *See* compaction  
     dilatation ..... 159  
     stress tensor ..... 149  
 Voigt/Kelvin model ..... 38  
 von Schweidler law of relaxation ..... 60  
 water fugacity ..... *See* fugacity  
 wetting angle ..... 233, 254  
 Wulf construction ..... 70, 73, 77  
 Wulf plot ..... 98
