

Index

Bold type signifies major sections or chapters

- Acetic acid, 44, 55, 69
- Acid hydrolysis, 143
- Action plans
 - burning, 32
 - feed, 180
 - incorporation, heavy soil, 111, 113, 115
 - light soil, 106, 108
- ADAS, 38, 50, 56, 60, 64, 75, 77, 81
- Alkali treatment, 143
- Alternative treatments (chemical), 143, 164
- Ammonia, **148**
- Anhydrous ammonia, 150
- Aphids, effects of straw burning, **23**
- Aqueous ammonia, 149
- Ash absorption, 30
- Ash content of straw, 140
- Ash incorporation, **13**, 35
- Automatic feed furnaces, 198, 204

- Bale density, 120, 192
- Bale handling costs, 117
- Bale handling systems, 121
 - accumulator 4 × 2, 127
 - accumulator fork, 126
 - automatic trailer, 129
 - bale burners, 195
 - bale burning, 192
 - bale carrier, 132
 - double flat eight, 126
 - flat ten, 124
 - round bale, 131
 - square bale, 129
 - strapped package, 128
 - system costs, 123
 - time costs, 122
- Baler costings, 119
- Blackgrass, **26**, 72, 99
- Boilers, **195**
- Briquettes, **135**
- Brome, 26
- Buffer feed, 165
- Burned off seedbeds, 48
- Burning, 10, **13**
 - benefits, 34
 - byelaws, 18
 - code of practice, 14
 - consequences, 13
 - controlled, 22
 - effects on fauna, 23
 - effects on flora, 26
 - legal controls, 16
 - NFU code, 13
 - penalties, 17, 18
- Byelaws, model, 18
- BXDV, 75, 80

- Caustic soda, **154**
 - solid, 156
- Cereal production in UK, 2
- Chemical composition, 2, 142
- Chemical control of weeds, **99**
- Chemical treatments, 142
 - alkali, 143
 - ammonia, 148
 - ammonium hydroxide, 143
 - calcium hydroxide, 143
 - caustic soda, **154**
 - cocktails, 157, **160**
 - costs, 144 *et seq.*
 - labour, 144 *et seq.*

- nutritive values, 144
- sodium hydroxide, 143
- Strawmix, 144
- urea, 147
- Chemicals from straw, 7
- Chisels, 82
- Chop length, 41, **59**, 60, 116
- Chopping
 - power consumption, 116
 - variety differences, 60
- Clean Air Act*, 17
- Cocktail diets, 175
- Cocktail treatment, 157, **160**
- Code of practice (caustic soda handling), 159
- Compaction, 88, 89
- Combustion process, 191
- Composition of straw, 2, 142
- Control of weeds, 72
- Conventional bales, 121
- Cost effectiveness in weed control, **99**
- Cost of straw, 185
- Cost per kWh, 183
- Costs
 - and returns, **93**, 95
 - of bale handling, **117**
 - of cultivation, **97**
 - of furnaces, 201
 - of spraying, **98**
 - of straw chopping, 59
- Cubing of straw, 135
- Cultivation depth, 39, 60, **61**
- Cultivation, power and output, 52
- Cultivation rotation, **86**
- Cultivations and diseases, 75, 76

- Danish field trials, 43
- Decision planners
 - burning, 12
 - feed, 181
 - fuel, 208
 - harvesting, 136
 - incorporation, heavy soil, 110, 112, 114
 - light soil, 107, 109
 - overall, 12
- Denmark, technology from, **41**, 66
- Densification of straw, **135**
- Densities compared, 190
- Density of bales, 120, 190
- Depth of cultivation, 39, 50, 61, 83
- Diets
 - design, **162**, 165
 - practical, **165**
 - supplementation, 158, **179**
- Digestibility of straw, 138
- Discs, 83
- Disease control, **75**, 77
- Distribution of straw in UK, 4
- DOMD values, **163**
- Drills, 50, 86
- Dry matter, 139

- Earthworms, effects of burning on, **23**
- Economics of straw fuel, **201**, 207
- Efficiency of bale handling, 121
- Energy inputs, 52, 56, 64
- Energy values of fuels, **182**, 183
- Equipment for burning bales, **195**
- Experimental Husbandry Farm results, **38**

- Farm cost of straw, 185
- Feed supplements, 158
- Feed value of straw, 4, 5, **138**, 162
- Feeding, **137**
- Financial considerations (fuel), 201
- Forage harvester, 154
- Fuels, 6, **182**
 - effects of moisture, 184
 - efficiency of use, 183
 - energy values, 182
 - financial considerations, 201, 207
 - monetary values, 183
- Furnaces, **195**

- German field trials, 42
- Germany, technology from, **39**, 56, 82
- Gleadthorpe feeding trials, 174
- Glyphosate, **102**
- Gramoxone, 49, 74, **102**
- Grass v. straw as feed, 137
- Green Bridge, 49, 77
- Gross margins, 95

- Handling costs, **116**, 186
- Harvesting, 116
 - handling and storage, **116**
- Health and Safety, burning, 17
- Heifer diets, 169
- Height of cutting, 140
- Herbicides, 49, 72
 - ash absorption, 30
- High Mowthorpe diets, 169
- Horsch system, 39

- Incinerators, 195
- Incorporation, 8, **34**, **55**

- and nitrogen, **65**
- EHF results, 38
- machinery, 80
- Large bales, 121
- Leonard Farms, 175
- Letcombe, 34, 44, 49
- Machinery costings, **97**
- Margins, 95
- ME
 - of straw, **138, 162**
 - of varieties, 139
- Mechanization systems, 38, 52, 56, 62, **68, 80**
- Methane production, 4
- Minerals, supplementation, 158, **179**
- MOC, 137
- Moisture content of fuels, 184, 200
- NIAE, 52, 53, 61, 75, 96, 135
- Nitrogen
 - and incorporation, **65**
 - content of straw, 71
- Nurse stubbles, **53**
- Nutrients from straw, 47
- Nutritive value as a feed, 139
- Oil, 182
 - equivalent of straw, 194
- Organic matter residues, 47
- Oven method of treatment, 152
- Paraquat, 49, 74, 102
- Pelleting of straw, 135
- Performance of cattle, **170**
- Pests, effects of burning, 26
- Physical properties of straw, 142
- Plant populations, 48
- Plough design, 81
- Ploughing, 39, 41, 62, **81**
 - depth, 41, **61, 63, 81**
- Power and output, cultivations, 52, 55
- Practical diets, **165, 168, 175**
- Protein, 139
- Quantities of straw produced, 1
- Returns from cropping, 93
- Rhynchosporium, 78
- Rotation of cultivations, 86
- Rumen conditioner, 166
- Safety (chemical treatments), 142 *et seq.*
- Saving silage, 165
- Schleswig Holstein, 39
- Seedbed preparation, 51, 53
- Seedbeds, 48, 51
- Septoria, 78
- Shallow cultivation, 50
- SIAE research, 90
- Single pass boilers, 195
- Sodium hydroxide, 143
- Soil types, 64
- Solid caustic soda, 156, 178
- Sowing date, 141
- Spraying costs, **98**
- Stack treatment, 150
- Straw
 - as a food, **137**
 - as a fuel, **182**
 - breakdown, **45**
 - chop length, 41, **59**
 - nitrogen content, 71
 - residue values, 47
- Straw production, **1**
 - building material, 8
 - composition, 2
 - disposal, 9
 - incorporation, 8
 - raw material, 1
 - surplus, 3
- Straw treatments, **143**
 - ammonia, 148
 - caustic soda, 154
 - cocktails, 157, **160**
 - Granstock, 147
 - Strawmix, 144
 - urea, 147
- Strawgon, 84
- Stubble, 36, 49, 52, 103
 - management, 52, 103
- Stubbles, nurse, **53**
- Subsoiler design, 83
- Supplements (feed), 158, **179**
- Swath burning, 22
- System potential, 52
- Take-all, 79
- Tilth, 91
- Timeliness, 95
- Toxins, 44, 55, 69
- Tractor costs, **97, 118**
- Trash borne diseases, 78
- Triple pass boilers, 196
- Turbo burners, 199
- Updraft furnaces, 202, 203

Urea,
 as a processor, 147
 Granstock, 147
Urination, 154
Use of straw as a fuel, **186**

Value as a fuel, **182**
Variety
 differences, 60, 139
 diseases, 75
Vitamin supplementation, **179**

Wafers, 135
Wastes as fuels, **187**

Weed control, **72**
 by burning, 26
Weed control costs, **95**
 by cultivation, **97**
 by spraying, **97**
Weed control options, 101
Wild Oats, 26, 29, 34
Worms, effects of burning, **23**
WRO, **72, 99**

Yield, **37, 38, 43, 47, 49, 62, 99, 101**
 and compaction, 89
 losses, 34, 37, **93**

Zero traffic cultivation, 89
