

INDEX

Chapter 1

Aldosterone 3f, 31f, 38
Angiotensin I 5, 12f, 31f
Angiotensin II 3f, 12f, 32f
Angiotensin III 5, 7
Angiotensin Converting Enzyme 3f, 8f,
12f, 33f
Angiotensinogen 5
Arterial Wall Renin 35
Bothropos Jararaca 8
Bradykinin 5, 7f, 31f, 36
BPP_{9a} 9
Capoten
Captopril 3, 9f
Chronic Renal Failure
Congestive Heart Failure 32f
DOCA-Salt Hypertensive Rats 24
Essential Hypertension 3, 16f, 24f
Hemorrhagic Shock 33
Hydralazine 17, 21
Hypertension 11, 16f, 33f, 39
Kallidin 5, 8
Kallikrein 3f, 7f, 31
1-Kidney, 1-Clip Renal Hypertensive
Rats (1K-RHR) 19f, 31
2-Kidney, 1-Clip Renal Hypertensive
Rats (2K-RHR) 16f, 31, 34, 35, 39
Kinin 3f, 31
Kininase 5, 7f
Kininogens 7f
Prostaglandin 3f, 14, 38
Renin 3f, 24f, 30f, 35
Renovascular Hypertension 6f, 24f
Saralasin 34
Spontaneously Hypertensive Rats (SHR)
21f, 34
SQ 14,225 11
SQ 20,881 35
Teprotide 3, 9f, 19, 21, 32
Zinc 5, 11

Chapter 2

Somatostatin 56-97 inclusive
Analogues 93f
Duration of Activity 93f
Molecular Configuration 93f

Potency 94f
Selectivity 94f
Synthetic Approach 96f
Effects on:
ACTH 62
Behavior 58
Blood; Blood Clotting 65
Calcitonin 62
Cardiovascular Function 65
FSH 62
Gastrointestinal Function 63f
Glucagon 63, 65f
Glucose 68f
Glycerol 72
Growth Hormone (GH) 56, 61
Insulin 65f
Ketone Body Levels 69f, 72
Lactate Levels, Plasma 72
LH 62
Nervous System 60f
Parathyroid Hormone 62
Posterior Pituitary Hormones 61
Prolactin 62
Renal Function 64f
Thyroid 62f
TSH 61f
Mechanism of Action
Calcium Mediation 73f
Cyclic Nucleotide Metabolism 73f
Membrane Binding 73
Protein Synthesis 72
Metabolism
Half-Life 77
Inactivation, Sites of 77
Degradation 77
Physiological Role
Neurohormones 77f
Neurotransmitters 77f
Parahormones 78
Secretory Control
Acetylcholine 84
Amino Acid Substrates 81
Calcium Modulation 83
Catecholamines 83f
Glucose Stimulation 79f
Monoamines 83f

- Opioids 86
- Pancreatic D Cells 63, 87
- Peptide Hormones 86f
- Serotonin 84
- Therapeutic Use
 - Diabetes 87, 89f
 - Hypoglycemia, Reactive 90
 - Ulcers 90
- Tissue Distribution 58f

Chapter 3

Fertility regulating botanicals

Animal species in which investigated/
in which effects of, reported,

- Bat 186
- Cattle 175, 196
- Dog 171, 186
- Gerbil 186
- Guinea pig 171, 175-176
- Hamster 160, 169
- Human 156, 169, 171-185, 189-192, 197
- Monkey 157, 175-178, 191
- Mouse 159-160, 166, 168-169, 175, 177-179, 185-186, 196
- Rabbit 154, 160, 168-169, 171-178, 191
- Rat 155-156, 160-169, 171-175, 179-187, 191-193
- Sheep 151-155, 175
- Swine 196

Compounds investigated for/
reported as having,

- Antifertility effects in females,
 - Aristololic acid 160
 - Aristololic acid methyl ester 160
 - Colchicine 169
 - p*-Coumaric acid 160
 - Daturalactone 160
 - Desacetylmethylcolchicine 168-169
 - Embelin 163, 165
 - Maytansine 169
 - Miroestrol 155-156
 - Podophyllotoxin 168
 - Vinblastine 168-169
 - Vincristine 169
 - Zearalenone 196

See also: Fertility regulating botanicals, compounds investigated for/reported as having, uterine stimulant activity
See also: Plants, estrogenic

Antifertility effects in males,

- Colchicine 197
- Gossypol 189-193
- Gossypol acetic acid 191
- Vinblastine 185-186
- Vincristine 185-186
- m*-Xylohydroquinone 189
- Zearalenone 196

Spermicidal activity,

- Lebbekinin-E (see Table 3) 180-181
- Lemmatoxin 182
- Lemmatoxin-C 182
- Oleanoglycotoxin-A 182
- Samanin-D 184
- Scheffleroside 182
- See also: Table 3 (pp 180-181)

Uterine stimulant activity,

- Albitocin 175
- Leonurine 172
- Montanol 176
- Plumbagin 171
- Serotonin 174
- Trichosanthin 177-179
- Zoapatanol 176

Plant species investigated for/reported as having,

- Antifertility effects in females,
 - Aristolochia indica* 159-160
 - Aristolochia triangularis* 169
 - Butea monosperma* (*Butea frondosa*) 163
 - Claviceps purpurea* (ergot) 170, 196
 - Cuminum oyminum* 167
 - Curcuma longa* 167
 - Datura quercifolia* 160
 - Daucus carota* 167
 - Embelia ribes* 163-166
 - Hibiscus rosa-sinensis* 162-163
 - Hyptis suaveolens* 167
 - Pinus ponderosa* 196-197
 - Pueraria mirifica* 155-156
 - Pueraria tuberosa* 156

- See also: Fertility regulating botanicals, plant species investigated for/reported as having, uterine stimulant activity
See also: Plants, estrogenic
- Antifertility effects in males,**
Aristolochia indica 186
Catharanthus rossus 185
Gossypium hirsutum 189
Hibiscus rosa-sinensis 186-187
Malva viscosa 186
Momordica charantia 186
Pisum sativum 189
- Spermicidal activity**
Calendula officinalis 182
Phytolacca americana 182
Phytolacca dodecandra 182
Pithecellobium saman 184
Schefflera capitata 182
See also: Table 3 (pp 180-181)
- Uterine stimulant activity**
Albizia chinensis 175
Albizia grandibracteata 175
Albizia gummifera 175
Gloriosa superba 171
Leonurus artemisia 172
Montanoa tomentosa 176
Oldenlandia affinis 172-174
Plumbago zeylanica 171
Trichosanthes kirilowii 176-179
- Plants,**
Abortifacient 169-179
Antiovolatory 157
Antispermato-genic 184-193
Estrogenic 151-156
Interceptive 157-169
Spermicidal 179, 180-182, 184
See also: Fertility regulating botanicals
- Chapter 4**
Conceptive Effects 229f
Contraceptive, LHRH and Analogues as 236f, 259f
Downregulation of Gonadal Steroidogenic Function 253f, 262, 265
Estrogen Response 253
Extrapituitary (Direct Gonadal) Effect
Female 246f
Male 262f
Female Contraception 247f
Gonadotropin (LH and FSH) Inhibition 267
Gonadotropin (LH and FSH) Release 253f
Human Studies
Female 229f, 258f
Male 233f
Infertility, Treatment of
Female 229f
Male 233f
LHRH Agonists 228f, 246f, 260, 273f
LHRH Antagonists 228f, 235f, 273f
Luteolysis 232f
Male Contraception 262f, 269f
Mechanism of Anti-Reproductive Effect
Female 246f
Male 262f, 265f
Ovulation Induction 230f
Ovulation Inhibition 269
Paradoxical Antifertility Effects
Female 247f
Male 262f
Placental (rPL) Response 254
Pregnancy Termination
Claudogen Effect 247f
Interceptive Effect 247f
Progesterone Response 253
Prolactin Response 253
Reversibility of Antifertility Effect
Female 257f
Male 267f
Safety Studies
Preliminary Toxicology 270f
Secondary Pharmacology 270f
Spermatogenesis 263f
Synthesis of LHRH Analogues 236f
Testicular Function 235
Testosterone Response 263
