

## Index

- 14-3-3 proteins, 136, 146, 153, 156, 240  
2D-PAGE, 7, 10  
3-dimethylsulfonipropionate, 111  
ABA, 18, 19, 23, 25, 26, 28, 29, 30, 31, 32, 37, 82, 85, 86, 91, 96, 97, 114, 117, 118, 119, 195, 196, 197, 198, 199, 200, 201, 202, 203, 214, 216, 217, 224, 225, 226, 227, 228, 237, 239, 242, 245, 246, 247  
abiotic stress, 81  
abscisic acid, 195, 238, 240  
activation tagging, 24  
active oxygen, 149  
adaptation, 250  
aequorin, 222  
AFLP, 13, 20, 41, 44, 54, 55, 56, 70, 107, 136  
*Agrobacterium tumefaciens*, 21  
alcohol dehydrogenase, 32  
aluminium, 160, 250, 259  
*Alyssum lesbiacum*, 163, 164, 165  
antibody, 12  
antifreezes, 218, 220  
antimicrobial proteins, 139  
antioxidant defense, 182  
antioxidant responsive element, 194, 195  
antisense suppression, 27, 110, 233  
aquaporins, 115, 125  
*Arabidopsis*, 9, 17, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 32, 33, 34, 35, 36, 65, 66, 67, 72, 105, 109, 110, 113, 114, 115, 116, 117, 118, 119, 135, 136, 137, 138, 140, 142, 143, 147, 148, 150, 160, 161, 192, 213, 214, 215, 216, 217, 218, 220, 221, 222, 223, 224, 225, 227, 229, 230, 231, 232, 233, 235, 237, 253, 255, 256, 257, 258, 259, 262, 263, 264  
ARE motif, 194, 200  
*arsenate*, 164, 166, 188  
arsenic, 160, 162, 164, 165, 166, 177, 188  
*arsenite*, 162, 164, 166, 188,  
ascorbate peroxidase, 29, 113, 149, 182,  
ascorbate-glutathione cycle, 192  
*Astragalus bisculatus*, 166  
atrazine, 186  
avirulence gene, 142, 144  
avirulent, 133  
BAC, 20, 66  
betaine, 19, 111, 233, 235  
biochemistry, 4, 72, 211  
bioinformatics, 65, 159, 264  
biotransformations, 184  
biotrophs, 132, 141  
*Brassica campestris*, 162  
*Brassica juncea*, 162, 164, 172  
cadmium, 160, 161, 162, 164, 165, 167, 168, 170, 172,  
calcium, 28, 116, 117, 137, 219, 221, 222, 223, 226  
calcium dependent protein kinases, 116  
calcium signaling, 117

- callose ( $\beta$ -1,3-glucan), 138  
 CaMV 35S promoter, 24, 119  
 candidate gene approach, 93, 98  
 carbon fixation, 251  
 catalases, 182, 183, 191, 192  
 cation diffusion facilitator, 169  
 CBF regulon, 235  
 cDNA AFLPs, 9  
 cDNA-AFLP, 54–56  
 cDNA-RDA, 50, 52  
 cDNA-respresentational difference analysis, 50–52  
 cell death, 132, 137, 181, 183, 187  
 cell-membrane stability, 87  
 chaperones, 19, 104, 115, 219, 239  
 chemiluminescence, 198  
 chilling, 18, 24, 25, 26, 209, 210, 211, 213, 218, 219, 220, 221, 222, 230  
 chilling stress, 209  
 chloroplast, 186, 190, 216  
 chromosome maps, 66  
*cis*-elements, 198, 204  
 citrate synthase, 172, 260  
*Citrus*, 92  
 coated glass slides, 70  
 cold acclimation, 19, 210, 214, 223  
 cold-regulated, 18, 74  
 cold-stress, 18  
 compartmentalisation, 112, 113, 173  
 compatible, 133, 134, 140, 210, 212, 213, 219, 230, 231, 232, 233, 235  
 confocal fluorescence microscopy, 70  
 constitutive immunity, 137  
 copper, 160, 161, 164, 165, 167, 170  
*COR* gene, 27  
*Craterostigma plantagineum*, 116  
 crop productivity, 61, 75  
 CRT/DRE regulon, 231, 232  
 cryopreservation, 212  
 defence response, 132, 134, 135, 143, 144, 145, 146  
 dehydration-responsive element, 18, 26, 119  
 dehydrins, 106, 114, 215  
 desaturases, 218  
 desert, 5  
 detoxification enzymes, 19  
 differential cloning, 43, 170  
 differential colony hybridisation, 43  
 differential display, 9, 44, 52, 53, 54, 52–54, 56, 70, 263  
 differential expression, 10, 13, 52, 56, 57, 204  
 differential screening, 44, 45, 56, 65  
 dioxygen, 181, 203  
 DNase footprinting, 204  
 drought, 6, 17, 18, 19, 25, 31, 62, 65, 83, 84, 85, 87, 88, 89, 90, 91, 97, 103, 104, 105, 106, 107, 109, 110, 112, 113, 114, 115, 116, 118, 119, 120, 121, 189, 194, 211, 212, 223, 224, 226, 227, 228, 232, 235,  
 drought tolerance, 87, 88, 90, 106, 120  
 ecological niches, 3  
 ecological range, 2  
 efflux, 137, 161, 163, 169, 173, 255, 259, 260, 261  
 elemental *sulfur*, 138, 139  
 elicitors, 132, 133, 142  
 EMS mutagenesis, 26  
 enhancer, 23, 34  
 environmental stresses, 18, 29, 32, 43, 61, 64, 74, 82, 189, 192, 194, 204, 210  
 EST, 9, 10, 66, 73, 74, 162, 169, 170, 264  
 EST collections, 66  
 ethylene, 118, 134, 135, 139, 146, 148,  
 expressed sequence tag, 9  
 flowering, 251  
 freezing, 18, 23, 26, 31, 110, 119, 209, 210, 211, 212, 213, 214, 215, 218, 219, 220, 221, 222, 224, 225, 226, 228, 229, 230, 231, 232, 233, 234, 235, 236  
 freezing stress, 210, 219  
 freezing tolerance, 26, 31, 210, 211, 212, 213, 219, 220, 221, 225, 226, 229, 230, 231, 232, 233, 234, 235, 237  
 functional expression, 257  
 functional genomic approaches, 62  
 gain-of-function, 24, 63  
 $\gamma$ -glutamylcysteine synthetase, 172  
 gel retardation, 198, 201, 204  
 gene families, 116, 135, 145, 191, 230, 256  
 gene silencing, 35  
 gene trap, 23, 34  
 gene-for-gene hypothesis, 133, 144  
 genetic redundancy, 22

- genome, 1, 9, 10, 21, 22, 23, 32, 33, 35, 36, 61, 65, 66, 67, 70, 71, 72, 75, 90, 97, 135, 142, 150, 169, 230, 255, 256, 257, 258, 262, 263
- global response, 204
- Glomus versiforme*, 261
- glutathione, 165, 171, 172, 182, 184, 185, 186, 188, 190, 192, 194
- glutathione S-transferases, 184
- glutathione synthetase, 172
- glycine betaine, 19, 111, 232, 233, 235
- green revolution, 63
- H<sub>2</sub>O<sub>2</sub>, 112, 118, 138, 148, 149, 150, 181, 182, 183, 186, 187, 190, 192, 193, 194, 201, 202, 203
- heat-shock, 74
- heavy metal tolerance, 74
- high temperature, 18, 24, 46
- high throughput, 20, 62
- homology cloning, 168
- hyperaccumulator, 160, 162, 163, 164, 165, 168, 169
- hypoxia, 32, 189, 218
- immunolabelling, 257
- immuno-localisation, 11
- in situ* hybridisation, 12, 257, 262
- in situ*-PCR, 11
- in vitro* translation, 7, 10
- incompatible, 133, 134, 140, 149, 215
- induced systemic resistance, 134, 148
- insertion mutagenesis, 25, 34
- insertional knockout mutagenesis, 21–22
- interspecific variation, 92
- invertase, 90, 93, 94, 96
- ion transport, 92, 107, 113
- iron, 113, 161, 164, 167, 169, 175, 186, 250, 259
- IRT1*-like genes, 161
- jasmonate pathway, 148
- jasmonates, 146
- kinases, 116, 118, 143, 146, 219, 223, 255
- knockout mutations, 21, 22, 33
- late embryogenesis abundant (LEA) proteins, 114
- late embryogenesis abundant proteins, 74
- leucine-rich repeats, 145
- lignin, 138, 140, 190
- linkat concept, 97
- localised acquired resistance, 134
- loss-of-function, 22, 24, 226
- low-temperature C-repeat, 18
- luciferase, 30, 198, 225, 226
- maize, 20, 21, 33, 59, 74, 82, 85, 88, 89, 90, 93, 94, 98, 106, 111, 140, 186, 191, 192, 194, 195, 196, 197, 198, 201, 203, 204, 244
- MALDI-TOF, 10
- MAP kinases, 219
- marker assisted selection, 17, 90, 106
- Medicago truncatula*, 74, 257, 262
- membranes, 109, 112, 113, 115, 187, 209, 213, 215, 220, 221, 256, 257, 258, 261
- mercury, 164, 174
- metabolism, 3, 5, 9, 13, 26, 73, 85, 94, 95, 96, 97, 98, 104, 110, 111, 170, 172, 181, 182, 184, 185, 187, 189, 194, 249, 254, 255, 263
- metabolome, 36, 62
- metal efflux, 160, 161, 169
- metal exclusion, 161
- metal stress, 159
- micro-array, 9, 32, 36, 57, 67, 68, 73, 75, 132, 135, 263
- microvariants (SNPs), 63
- mitochondria, 187, 190
- mitochondrial electron transport chains, 185
- mitogen-activated protein kinase, 116, 118
- mRNA, 7, 8, 9, 10, 11, 43, 44, 45, 46, 47, 48, 50, 56, 57, 65, 68, 70, 94, 105, 108, 115, 116, 119, 162, 167, 169, 170, 192, 196, 202, 214, 258, 263
- multiparallel, 63, 67
- multiparallel techniques, 63
- mutagenesis, 19–24, 21, 33, 40, 41, 70  
chemical, 20
- mutant analysis, 170
- mutant complementation, 27, 63
- mutants, 19, 24, 29, 30, 31, 41, 138, 230
- mutation, 3, 19, 20, 21, 22, 24, 31, 32, 35, 70, 108, 111, 116, 117, 139, 140, 143, 182, 220, 224, 225, 226, 227, 228, 229, 230, 231, 258, 259
- myo*-inositol O-methyltransferase, 109
- necrotrophs, 141

- nickel, 12, 160, 162, 163, 164, 165, 167, 168, 169, 173
- nitrate, 6, 7, 64, 110, 189, 263
- nitric oxide, 146, 149, 150, 181, 189
- nitrite, 189
- nitrogen, 74, 110, 111, 162, 189, 250, 258, 263
- non-host resistance, 133, 137
- normalisation, 47
- Northern analysis, 11
- Nramp genes, 161
- nutrient availability, 6, 267
- nutrient stresses, 9, 10, 249, 250, 263, 264
- nutrition, 6, 117, 141, 263
- organic acids, 64, 160, 253, 257, 259
- osmolytes, 19, 210, 212, 213, 231, 232, 235
- osmoprotectant, 19, 109, 111
- osmoprotectants, 74, 109
- osmotic adjustment, 84
- osmotic stress, 18, 211
- osmotically responsive genes, 30
- output traits, 62
- oxidative burst, 149
- oxidative stress, 6, 109, 112, 113, 118, 181, 183, 185, 186, 187, 189, 190, 192, 193, 194, 203, 204, 219, 237
- oxygen paradox, 182
- pathogen, 23, 64, 117, 131, 132, 133, 135, 136, 137, 138, 139, 140, 141, 142, 144, 145, 146, 147, 148, 149, 150, 182, 194
- pathogenicity factor, 133
- PCR, 11, 12, 20, 33, 34, 35, 44, 45, 47, 48, 50, 52, 54, 56, 68, 70, 71, 169, 170, 198
- Phaseolus*, 252
- phenotypic coning, 168
- phenotypic plasticity, 3
- phosphatases, 31, 116, 118, 255, 257, 263
- phosphate, 6, 7, 46, 47, 64, 94, 97, 188, 250, 251, 253, 254, 255, 256, 257, 258, 261, 262, 263
- phosphate deficiency, 6, 7, 250, 251
- phospholipase, 19, 105, 149
- phospholipase D, 116
- photoactivation, 192
- photoinhibition, 112, 113, 209
- photosynthesis, 29, 95, 104, 112, 181, 182, 186, 220
- photosynthetic capacity, 203
- phytoalexin, 139, 140, 141
- phytoalexins, 132, 139
- phytoanticipins, 139
- phytochelatins, 162, 165, 166, 171, 172
- phytoremediation, 159, 171, 172
- plant transformation, 12
- polyols, 109
- poplar, 66, 78, 112, 122, 174
- positional approach, 93
- powdery mildew, 132, 134, 136, 137, 138, 146, 149
- profiling, 67, 70, 75, 263, 264
- proline, 19, 27, 28, 31, 105, 109, 110, 210, 216, 217, 219, 220, 231, 232, 233
- promoter trap, 23, 34
- promoterless reporter genes, 71
- protein kinase, 28, 105, 117, 137, 145, 146, 217
- protein kinases, 19, 116, 117, 118, 143, 146, 219, 223
- protein phosphorylation, 148, 223, 255, 262
- protein quantity loci, 97
- protein-protein interactions, 75, 145
- proteoid roots, 253
- proteome, 10, 36, 62, 99
- QTLs, 13, 63, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 94, 95, 96, 97, 98, 106, 107, 213
- QTLs for enzyme activity, 94–96
- QTLs from 2-D protein analysis, 97
- Q-TOF, 10
- quality, 45, 61, 62, 74, 135, 249
- quantitative trait loci, 13, 63, 81, 89, 98, 106, 213, 229
- race specificity, 133, 144
- race-cultivar, 133
- reactive oxygen species, 31, 74, 112, 181
- receptors, 5, 142
- redox balance, 181, 182
- regulatory mechanisms, 78, 191, 205, 250, 256, 263
- regulatory motifs, 194
- representational difference analysis, 44, 51

- resistant, 17, 24, 27, 29, 31, 32, 43, 84, 88, 91, 112, 133, 134, 136, 150, 168, 174, 186, 191
- reverse genetics, 25, 34
- RFLP, 85, 87, 90, 91, 92, 96, 106
- rhizosphere, 64, 134, 148, 160, 169, 172, 255, 259
- rice, 9, 20, 23, 33, 35, 66, 73, 83, 84, 86, 87, 92, 105, 106, 107, 110, 114, 119, 142, 161, 169, 192, 222
- root architecture, 6
- root hair, 253
- root morphology, 7, 83
- root proliferation, 6, 260
- roots, 7, 8, 25, 28, 110, 114, 117, 119, 139, 146, 148, 160, 161, 162, 163, 164, 165, 167, 169, 171, 173, 221, 250, 251, 252, 253, 257, 258, 259, 260, 261
- RT-PCR, 11
- SA binding proteins, 148
- salicylic acid, 134, 135, 140, 146, 147
- salinity, 3, 17, 18, 25, 27, 28, 29, 32, 62, 91–93, 98, 103, 106, 107, 108, 110, 112, 113, 114, 119, 120, 189, 212
- salt stress, 27–29, 106, 108
- SDS-PAGE, 8, 10, 12
- Sebertia acuminata*, 164
- seed formation, 251
- selenium, 160, 164, 166, 169, 172
- selenium accumulator, 166
- serine acetyl transferase, 168
- shotgun approach, 135
- signal transduction, 5
- signal transduction pathways, 18, 118, 131, 133, 141, 143, 146, 147, 181, 189, 194
- site selected insertion mutagenesis, 33
- SOD, 29, 112, 182, 183, 186, 190, 192, 203, 204
- sorghum, 74, 90, 91
- SOS1* gene, 28
- SOS2* gene, 28, 117
- SOS3*, 38, 117
- SOS3* gene, 28
- soybean, 27, 50, 60, 66, 74, 150, 164, 170
- species range, 4
- staygreen, 90, 91
- steady-state mRNA, 192
- stress adaptation, 62, 75
- stress response mutants, 24
- stress tolerance, 61
- structural genomic approaches, 62
- Stylosanthes hamata*, 252, 269
- subtractive hybridisation, 44, 45, 46, 47, 48, 49, 50, 45–50, 51, 56
- subtractive library, 9, 263
- sugars, 19, 109, 184, 220, 230
- sulfate, 64, 111, 172, 258, 263
- sulfate assimilation pathway, 172
- sulfur, 74, 162, 166, 172, 186, 188
- sulfur supply, 8
- superoxide dismutase, 29, 112, 149, 186, 203, 219
- superoxide dismutases, 182, 183, 191
- superoxide radicals, 29
- suppression subtractive hybridisation, 48
- susceptible, 43, 85, 88, 90, 133, 150
- sustainable agriculture, 61, 103
- symbiotic association, 261
- systemic acquired resistance, 132, 134, 147
- Take-all, 140
- targeted approach, 135
- T-DNA, 21, 22, 23, 24, 25, 26, 28, 29, 33, 34, 71
- temperature Stress, 25–27
- The Arabidopsis Genome Initiative, 142
- Thlaspi arvense*, 160, 164
- Thlaspi caerulescens*, 163
- tobacco mosaic virus (TMV), 134
- TOGA (total gene expression analysis), 57
- tomato, 8, 9, 20, 33, 74, 81, 92, 93, 105, 106, 137, 138, 143, 144, 145, 148, 164, 256, 257, 260, 262
- toxins, 138, 141, 183
- transcript profiling, 70
- transcription factors, 5, 13, 19, 106, 116, 118, 119, 118–20, 121, 182, 193, 194, 195, 205, 223, 224, 226, 227, 230, 231, 232, 236
- transcriptional activators, 225, 226, 227, 237
- transcriptome, 9, 10, 62, 135
- transformation, 20, 21, 27, 35, 61
- transgenic plant lines, 233

- transgenic plants, 30, 106, 108, 109, 110, 111, 112, 113, 114, 115, 118, 119, 147, 150, 171, 172, 173, 174, 190, 231, 232, 260
- transient assays, 202
- transport, 18, 92, 104, 105, 107, 112, 113, 115, 161, 163, 164, 165, 167, 169, 185, 186, 187, 190, 255, 256, 258, 259, 261, 262
- transporter, 6, 10, 64, 105, 112, 113, 160, 161, 163, 167, 185, 216, 256-259, 261-263
- transposon, 21, 24, 33, 34, 35, 71
- transposon tagging, 21
- transposons, 21, 22, 23, 33, 71
- vacuolar accumulation, 165
- virulence determinant, 133
- virulent, 133, 137, 144
- viviparous mutants, 196
- volatilisation, 174
- water channel proteins, 19
- water stress, 40, 83, 84, 85, 86, 88, 94, 95, 96, 97, 110, 116
- Western blotting, 11
- wounding, 18, 56, 132, 136, 183, 189, 201
- xenobiotics, 183, 184, 185, 189, 194, 195
- X-ray absorbance spectroscopy, 162, 164
- xylem, 38, 82, 85, 86, 96, 115, 162, 163, 164, 259
- YAC, 20, 66
- yield, 17, 22, 52, 57, 62, 74, 82, 87, 88, 89, 90, 91, 95, 97, 103, 106, 107, 111, 114, 121, 122, 149, 182, 237, 251
- zinc, 118, 119, 160, 161, 162, 163, 164, 165, 167, 171, 173, 175, 250, 258
- zinc transport, 161, 167
