

Index

Symbols

n -commodity market model, 65

A

Absolute Percentage Error (APE), 202

Acceleration principle, 354
relation, 354

Adibi, Esmael, 57

Aggregation problem, 49, 231

Allen, R. G. D., xii, 377

Annual Percentage Rate (APR), 418

Annuity, 419

Anti-logarithm, anti log, 273

Average and marginal curves, 176

Average cost pricing, 171

B

Balance sheet, 19

Baumol, W. J., 355

Baumol, William, 377

Behavioral equation, 53

Binary, 17

Black Swan, 193

Bond, 395

coupon bonds, 395

coupon payments, 395

coupon rate, 395

current yield, 400

discount bond, 401

face or par value, 395

traded at a discount, 397

traded at a premium, 397

yield, 397

yield to maturity, 399

zero coupon, 401

Break-even point

cubic cost function, 145

quadratic cost function, 131

Bureau of Economic Analysis, 355

C

Cantor, George, 28

Chiang, Alpha C., 377

Cliometrics, xi

Cliometrics, xi

Cobb–Douglas production function, 314

Co-domain, 35

College fund, 421

Comparative static analysis, 347

Competitive firm's supply function, 225

Compound interest, 385

continuous compounding, 388

periodicity of compounding, 387

Constraint optimization, 111, 123, 157

Consumption bundle, 1

Continuity, 85

Continuous, 18

Contour map, 314

Convex or concave function, 110

Correspondence, 35

Council of Economic Advisors, 355, 360

Cross section, 19

Cubic cost function, 140

in competitive industry, 141

profit maximization, 144

restriction on coefficients, 141

D

- Demand
 - log-linear demand, 245
 - nonlinear function, 251
- Derivative, *see* Differentiation, 86
- Dichotomous, 17
- Difference equation, 347
 - first order linear, 349
 - autonomous, 349
 - non-autonomous, 349
 - with constant coefficients, 349
 - homogeneous, 349
 - non-homogeneous, 349
 - stationary value, 364
 - steady state, 364
- Differentiability, 86
- Differentiation, 86
 - partial derivatives, 113
 - rules of differentiation, 87
- Discounted value, 395
- Discrete, 18
- Dislocated demand, 212
- Dislocated demand curve, 152, 244
- Doti, James, 57
- Durand, David, 321
- Dynamic analysis, 347
- Dynamic national income model, 367

E

- Economic dynamics, 347
- Elasticity function, 158
- Elasticity of a function, 158
- Elasticity of demand, 160
 - cross-price, 163
 - income, 163
 - own price, 163
- Endogenous variable, 56
- Energy Information Administration, 368
- Envelope, 136
- Euler, 274
- Euler's theorem, 318
- Exogenous variable, 56
- Exponential function, 279
 - derivate of, 291
 - natural, 280
- Extremum of bivariate function, 118

F

- Feasible consumption, 6
- Fed Fund rate, 71
- Federal Reserve Bank, 71

- Financial debt instruments, 395
 - maturity, 395
 - short, intermediate, and long term, 395
- Firm homogeneity, 231
- First-order condition (FOC), 103
- Fixed mortgage loan, 408
- Fixed payment loan, 407
- Fixed propotion production function, 479
- Flow variable, 19
- Fogel, Robert, xi
- Function, 36
 - algebraic, 39
 - bivariate, 36
 - cubic, 39
 - domain, 35
 - exponential, 40
 - linear, 38
 - logarithmic, 39
 - multivariate, 37
 - polynomial, 38
 - quadratic, 39
 - range, 36
 - rational, 39
 - transcendental, 39
 - trigonometric, 40
 - univariate, 36
- Future value, 393

G

- Galileo Galilei, 93
- General equilibrium, 61
- Global maximum or minimum, 102
- Global or absolute extremum, 102
- Graves, Philip P., 244

H

- Haavelmo, Trygve, 475
- Harrod, Roy Forbes, 355
- Hicks, R. J., 314
- Holding period rate of return, 403
- Homogeneous function, 318
 - linear, 318
- Hoy, Michael, 377
- Hyperinflation, 372

I

- Impact of monopoly, 239
- Income-consumption path, 7
- Income statement, 19
- Inflationary spiral, 372
- Inflection point, 110

Instantaneous rate of change, 80
 Internal rate of return, 405
 Investment holding period, 402
 Isoquant, 314
 Isoquant map, 314

J

Joint production, 206

K

Keynes, John Maynard, 65
 Keynesian income determination model, 65
 Klein, Lawrence, 49
 Krugman, Paul, 56

L

Lehman Brothers, 65
 Limit, 83
 Linear approximation, 200
 first degree, 200
 first order, 200
 second order, 200
 Linearization, 198
 Local maximum or minimum, 102
 Logarithm, 273
 binary log, 274
 change of base, 278
 characteristic and mantissa, 278
 common log, 274
 logarithmic function, 278
 Napierian log, 274
 natural log, 274
 semi-log or log linear demand function, 301
 Logarithmic function
 derivate of, 291
 Long run equilibrium
 cubic cost function, 147
 monopolistically competitive firm, 152
 Long-run level of output, 137
 Long-run price, 136
 cubic cost function, 147
 minimum ATC function, 138
 Long-run total cost LRTC, 136

M

Maclaurin Series, 200
 Maple, 188, 202
 Mapping, 36
 Marginal physical product, 312

Marginal rate of technical substitution MRTS, 315

Marginal revenue product, 312

Marshallian approach, 62

Matrix, 429

 applications in economics, 465
 n-commodity market model, 468
 national income models, 470
 national I-O models, 475
 columns, 429
 comformable for, 432
 addition and subtraction, 432
 multiplication, 433
 determinant, 444
 properties, 450
 elementary row operations, 453
 elements, 429
 input-output coefficients, 477
 input-output model
 close, 477
 open, 477
 inter-industry transactions, 477
 inversion, 443
 the Gauss-Jordan method, 453
 method of adjoint, 448
 invertible, 444
 leading diagonal, 440
 lower triangular, 442
 main or principle diagonal, 440
 non-singular, 444
 operations
 using EXCEL, 457
 using Microsoft Mathematics, 458
 using R, 460
 using WolframAlpha, 459
 postmultiply, 433
 premultiply, 433
 rows, 429
 scalar multiplication, 432
 size, dimension, order, 430
 square, 430
 symmetric, 441
 technical coefficients, 465, 478
 transpose, 438
 unit or identity matrix, 441
 upper triangular, 442
 Matrix representation, 442
 a linear system, 442
 Mean Absolute Forecasting Error (MAFE), 375
 Mean Absolute Percentage Error (MAPE), 286, 355, 374
 Mean Forecasting Error (MFE), 374

Measures of Estimation Accuracy, 374
 Microsoft Mathematics, 189
 Mixed variables, 19
 Money market instruments, 401
 Monopolistically competitive firm, 150
 Monopolizing a Competitive Market, 239
 Marotto, Frederick, 377
 Mortgage refinancing, 411
 Multi-plant monopolist, 214
 Multinomial, 17
 Multiplier-accelerator, 354

N

Naseem Talib, xiv
 Necessary condition, 86, 103
 Newton-Raphson method, 197
 Nonlinear demand and optimal price, 209
 Nonlinear models, 193
 Nonlinear national income model, 216
 North, Douglas, xi

O

Offer function, 205
 Open Market Operation, 71
 Optimal time horizon for
 mortgage refinancing, 415

P

Panel data, 19
 Parameter, 56
 Partial equilibrium, 62
 Partition, 30
 Peak oil, 368
 Period analysis, 347
 Periodicity, 18
 Polyroot function in \mathbb{R} , 209
 Power series expansion, 199
 Present value, 393
 Price elastic, 160
 Price inelastic, 160
 Price unit elastic, 160
 Product homogeneity, 231
 Production function, 311
 Profit maximization
 cubic cost function, 144
 multi period, 149
 noncompetitive firm, 149
 non-competitive market, 148
 single period, 149
 Prorated capital gain, 399
 Prorated capital loss, 399

Q

Quadratic approximation, 200
 Quadratic cost function, 127
 firm's break-even point, 131
 legitimate, 128
 restrictions on parameters, 128
 Qualitative variable, 17
 Quantitative variable, 17

R

Ramanathan, Ramu, 52
 Rate of change of a function, 77
 Rates for advantageous
 mortgage refinancing, 415
 Real number system, 20, 21
 Reduce form parameter, 57
 Relation, 35
 Relative extremum, 102
 Returns to scale, 318
 constant, 318
 decreasing, 321
 increasing, 321
 Revenue maximization, 168
 Root Mean Square Error (RMSE), 374
 Rosa, Robert, 57
 Russell, Bertrand, 19

S

Saddle point, 118
 Sample space, 33
 Samuelson, Paul, 354
 Scalar, 431
 Second-order condition (SOC), 104
 Sequence, 379
 arithmetic, 380
 common difference, 380
 geometric, 383
 common ratio, 383
 term generating function, 380
 Series, 379
 Set, 25
 cardinality, 26
 Cartesian product, 31
 complement, 28
 description, 25
 disjoint, 28
 element, 25
 empty or null, 27
 enumeration, 25
 finite, 27
 intersection, 28
