

Index

A

- Abel method, 37, 54, 55
- Absolutely-convergent series
 - convergent double series, 83
- Analytic continuation, 1
- A-transform, 2, 22, 85, 117

B

- Banach-space
 - algebra, 27, 31, 34, 35
- Bounded-sequence
 - double sequence, 94, 99

C

- Cauchy-sequence
 - double sequence, 94–96
 - multiplication, 63, 65, 73, 77, 80, 81, 126
 - product, 65
- Closed-subspace
 - convex semigroup, 27, 31
 - convex set, 27
- Comparison theorem, 111, 116
- $(c, 1)$ method, 1, 2, 18, 19
- Consistent, 37, 50, 61, 101–104, 120, 121
- Convergent-sequence
 - double sequence, 83, 94
 - double series, 83, 95
- Convolution product, 27, 34, 35
- Core of a sequence, 27

D

- Defranza, 63
- Double-sequence
 - series, 83–86, 102, 108, 124

- Double sequence complete, 83, 95
- ds -complete, 95, 96, 99

E

- Equivalence theorem, 37, 53
- Equivalent, 30, 37, 38, 43, 48, 49, 53, 73, 102, 107, 120, 124, 127
- Euler method, 37, 55

F

- Fourier-series
 - transforms, 1

G

- Generalized α -core of a sequence, 27
- Generalized semiperiodic sequence, 1, 19

H

- Hardy, 37, 44, 52

I

- Inclusion, 66, 67, 101
- Inclusion theorem, 37, 51, 111, 116
- Infinite chain, 63, 69
- Invertible, 37, 56
- Iteration product, 63, 69

K

- Knopp's core theorem, 27, 28, 30

L

ℓ -equivalent, 64
 Linear span, 1, 17, 18
 ℓ -stronger, 63

M

Matrix-infinite
 conservative, 1, 3
 convergence preserving, 1, 3
 lower triangular, 22
 regular, 1, 3, 12, 13, 17, 18
 Schur, 8, 12, 18, 96, 99
 Mercerian theorem, 27, 35
 (M, λ_n) method, 37, 48, 49, 51, 54–56, 120
 Móricz and Rhoades, 37, 44

N

Natarajan's method, 37, 48, 49, 54, 63, 69, 101, 120, 121, 127, 128
 Natarajan's theorem, 28
 Non-trivial method, 49
 Nörlund method, 101–105, 107
 Norm, 3, 17, 22, 31, 34, 46, 95

P

Pringshiem, 83, 85, 107
 Product theorem, 37, 55, 56, 60

S

Schur's theorem, 1, 3, 13, 83
 Schur's theorem for 4-dimensional infinite matrices, 83, 94
 Sequence-convergent
 almost convergent, 17
 Cauchy, 12
 divergent, 18
 eventually periodic, 1, 17
 generalized semiperiodic, 1
 non-periodic, 1
 of zeros and ones, 17

space, 3

Sequence space Λ_r , 1, 13
 Series-convergent
 absolutely convergent, 65, 83
 divergent, 1
 Fourier, 1
 Sherbakhoff, 27, 28
 signum (sgn.), 11, 30, 88, 91, 96, 98
 Silverman-Toeplitz theorem, 1, 3, 83, 85
 Silverman-Toeplitz theorem for 4-dimensional infinite matrices, 83, 85
 Steinhaus theorem, 1, 3, 13, 15, 17, 18, 46, 83, 94
 Steinhaus theorem for 4-dimensional infinite matrices, 83, 94
 Steinhaus type theorem, 1, 13, 16, 19, 21, 25
 Strictly ℓ -stronger, 64
 Summability field, 67
 Summability method- $(c, 1)$
 Abel, 37, 54, 55
 Euler, 37, 55
 (M, λ_n) or Natarajan, 37
 non-trivial, 49
 Nörlund, 128
 translative, 37, 51
 weighted mean, 37, 38, 108, 128
 Y , 3, 37, 49, 55
 Symmetric product, 63, 65, 67, 68

T

Tower, 16
 Translative, 37, 51

W

Weighted Mean method, 37, 38, 44, 101, 107–109, 111, 116, 120

Y

Y -method, 37, 49, 55, 61
