Acknowledgements

I would like to thank the many friends, colleagues and community organisations who have contributed their support, ideas and time towards the successful completion of this work. I must particularly thank the Women of Little Hulton Unite and Salford Women's Centres for allowing me access to their facilities and all the women who were generous with their time and shared their ideas during the course of my observations, interviews and discussions in these two centres. I also wish to thank all the Board members and volunteers of Boulder Community Network who were so generous with their time and ideas during my stay in Boulder, Colorado. I wish them all the luck in their future endeavours and work within their neighbourhoods.

Many people and organisations helped me financially and practically with this work. I would like to thank GEMISIS for their financial contribution to the research in the UK and the Economic and Social Research Council, together with the University of Liverpool for supporting my extended stay overseas. I would particularly like to thank Professor Michael Tracey, Director of the Centre for Mass Media Research, for his helpful comments while he was visiting professor at the University of Salford, for hosting my time at the University of Colorado at Boulder and for extending me such a warm welcome for the entire time I worked in the US.

Inevitably my friends have taken much of the burden of this work and I would like to thank all those who have stuck with me for their continued patience and support. I will not name these friends – they know who they are and do not ask for thanks, but I have been advised that if I do not mention Chris Leary in particular he will stop paying me his rent!

I would like to extend further thanks to those academics who have commented on my work and research especially Brian Loader from the University of Teesside, I hope I have been able to take his extremely useful comments on board.

Finally I would like to thank all those with whom I worked and played whilst at the University of Colorado and especially my good friends and advisors, Mia Lövheim, Anna Maria Russo Lemor, Nadia Kaneva and Eric Gertler.

This work is dedicated to all these people.
