PREFACE

Since the very first edition of the *St. James's Place Tax Guide* was published, I have been involved with people responsible for providing high-quality, long-term, financial advice. Each year the *Guide* has proved invaluable, as it continues to be a handy and reliable source of reference for our advisors, as well as a valuable gift for our clients.

Being a wealth management business it is no surprise that for most clients of St. James's Place, tax management is a vital part of any financial planning. As a taxpayer myself, however, I also appreciate and benefit from the information that Walter Sinclair, together with Barry Lipkin, provides – and I am sure that you will too.

I cannot be sure which areas will be most relevant to you, but I am sure that you will find Chapters 1, 3, and 5 of interest. Each provides some detail on the proposals that were announced this year, to introduce a 50 per cent income tax band for those with earnings exceeding £150,000, the reduced personal allowances for those earning over £100,000 and an increased tax rate to be levied against dividends. Furthermore, Chapter 8 refers to the increase of the annual ISA allowance, which becomes effective in October of this year for those aged 50 and over and from April 2010 for everybody else.

Of course, in an ideal world, the *Guide* would be very much shorter, because our tax system would be very much simpler. If we all paid a pound less tax for every time a Government minister or Treasury official deplored the system's complexity, our tax liabilities would be a good deal lower.

But for as long as our system remains as complicated as it is, dealing with its implications will continue to be a critically important challenge for millions of individuals looking for advice. The information contained within this *Guide*, and the St. James's Place Partnership, is therefore more important than ever in helping you take the necessary steps to preserve and grow your wealth.

INTRODUCTION

Originally establishing itself as the *Hambro Tax Guide* 37 years ago, this book has appeared annually ever since, more recently being called the *J. Rothschild Assurance Tax Guide*. The book has been designed to be used both by the professional and non-professional. Solicitors, accountants and company secretaries will find it especially useful as a concise ready reference. Many others, company directors and executives, partners and sole-traders, employers and employees, will find in it much helpful information and advice when dealing with problems of personal and company taxation.

It illustrates the working of income tax, capital gains tax, corporation tax, inheritance tax and VAT in the UK. It is intended to continue revising the book annually in order to keep it up to date in accordance with the annual changes to the law.

This, the 38th edition, deals with the tax system at the time of writing for the 2009–10 fiscal year and in some cases for subsequent years. Every chapter has been amended to reflect the many tax changes which have been made since the previous edition, including those relating to income tax and personal reliefs, investments, pensions, National Insurance, capital gains tax, corporation tax, inheritance tax, VAT, stamp duty and many, many others. To help keep track of the changes, Chapter 1 summarises this year's tax changes and is referenced to the relevant paragraphs in the *Guide*. In addition, tax planning pointers relative to this year's tax changes are included in this chapter.

This book has been appearing since 1972–73 and it is interesting to consider some of the tax changes over its life, comparing that year with 2009–10.

		1972–73	2009–10
Income tax	Standard/Basic rate	38.75%	20%
	Top rate – at taxable income		
	£15,000 including surtax	88.75%	
	£37,400		40%
	Single personal relief	£460	£6,475
Capital gains tax rates (individuals)		30%	normally 18%
Estate duty/inheritance tax threshold		£15,000	£325,000
	Top rate at £500,001	75%	
	Only rate in most cases		40%
VAT from 1 April 1973		10%	15%/17.5%

Thus successive editions of the book have recorded falling rates for most taxes, apart from National Insurance contributions. What is more, many reliefs and taxes have come and/or gone, such as:

- ▶ Capital transfer tax.
- ▶ Development gains tax and development land tax.
- ▶ Surtax.
- ▶ Earned income relief.
- ▶ Investment income surcharge.
- ▶ Stock relief.
- ▶ Life assurance relief on new policies.
- ▶ Mortgage interest relief.
- ▶ Married couples allowance (unless born before 6 April 1935).
- ▶ Stakeholder pensions.
- ▶ Advance corporation tax and the imputation system.
- ▶ Working tax credits and child tax credits.
- ▶ Income tax starting rate going from 6 April 2008.

But what of the future? We already know about the introduction of an additional rate from 6 April 2010 and the reduction of pension relief for high earners from 6 April 2011. But of one thing we can be sure, there will be very many tax changes to include in the pages of subsequent editions. Furthermore, other tax increases have been indicated in view of the poor economic climate.

Due to the volume of changes, it is not possible to retain in each new edition full information for previous years. Thus for the tax rules for previous years, reference to past editions is occasionally necessary.

Because the book concisely covers a very wide field, it has been necessary to omit some of the exemptions and qualifications with which tax law abounds: to adopt a familiar saying, ‘When I say never, I mean hardly ever and when I say always, I mean almost always.’ The book is intended to be only a general tax guide. If it cannot solve a problem, the time has come to look at one of the multi-volume tax textbooks or to consult a tax specialist.

Ideas on tax saving appear throughout the book. However, Chapter 26 deals with *tax-saving hints* and has many references to the other chapters for easy location of topics. Furthermore, this chapter contains particular reference to future tax planning in a section entitled ‘The way ahead’ (26.8).

A particular feature to note is that all indexing and cross-referencing uses chapter and topic numbers. Thus 7.6 means the sixth-numbered topic in Chapter 7. Similarly 7.6.3 would mean the third subsidiary topic within that main heading. Cross-references to related chapter and topic numbers appear throughout the *Guide* in brackets and you will also find references to tax legislation where relevant under the appropriate topic title. Also, a glossary to help with the meanings of certain terms appears at the end of this book.

Since its inception, the *Guide* has included references to the tax legislation. Over the years, this has been consolidated into a number of Acts such as the Inheritance Tax Act 1984 (IHTA), Value Added Tax Act 1994 (VATA), Capital Allowances Act 2001 (CAA), Income and Corporation Taxes Act 1988 (TA), Income Tax (Trading and Other Income) Act 2005 (ITTOIA) and Income Tax Act 2007 (ITA). The book is now referenced mainly to the consolidating Acts, using the abbreviations shown above and following the Preface.

The *St. James's Place Tax Guide 2009–2010* brings together in a single volume all of the main taxes which are operating at present, enabling their total effect to be borne in mind. In planning for the future, however, account should be taken of the various avenues for short-term reform, as well as the longer term possibilities for capital gains tax, inheritance tax, income tax etc. As new developments are crystallised, they will be covered in the future annual editions of this book.

We are most grateful to all those who have written to us with kind and helpful comments concerning the previous editions, some of which have been taken into account in the preparation of this volume.

We gratefully acknowledge the help given to us on this edition by Malcolm Cooper-Smith of St. James's Place and Rob Gaines LLB.
