

Rethinking International Development Series

Series Editors:

Andy Sumner, Fellow of the Vulnerability and Poverty Research Team, Institute of Development Studies, UK.

Ray Kiely, Professor of International Politics, Queen Mary University of London, UK.

Palgrave Macmillan is delighted to announce a new series dedicated to publishing cutting-edge titles that focus on the broad area of 'development'.

The core aims of the series are to present critical work that:

- is cross disciplinary;
- challenges orthodoxies;
- reconciles theoretical depth with empirical research;
- explores the frontiers of development studies in terms of 'development' in both North and South and global inter-connectedness;
- reflects on claims to knowledge and intervening in other peoples lives.

Titles include:

Simon Feeny and Matthew Clarke
THE MILLENNIUM DEVELOPMENT GOALS AND BEYOND
International Assistance to the Asia-Pacific

Niamh Gaynor
TRANSFORMING PARTICIPATION?
The Politics of Development in Malawi and Ireland

Xiaoming Huang, Alex C. Tan and Sekhar Bandyopadhyay (*editors*)
CHINA AND INDIA AND THE END OF DEVELOPMENT MODELS

Sue Kenny and Matthew Clarke (*editors*)
CHALLENGING CAPACITY BUILDING
Comparative Perspectives

Erik Lundsgaarde (*editor*)
AFRICA TOWARD 2030
Challenges for Development Policy

Sara C. Motta and Alf Gunvald Nilsen (*editors*)
SOCIAL MOVEMENTS IN THE GLOBAL SOUTH
Dispossession, Development and Resistance

Eric Rugraff, Diego Sánchez-Ancochea, Andy Sumner (*editors*)
TRANSNATIONAL CORPORATIONS AND DEVELOPMENT POLICY
Critical Perspectives

Rachel Sabates-Wheeler and Rayah Feldman (*editors*)
MIGRATION AND SOCIAL PROTECTION
Claiming Social Rights Beyond Borders

Jens Stilhoff Sørensen (*editor*)
CHALLENGING THE AID PARADIGM
Western Currents and Asian Alternatives

Andy Sumner and Meera Tiwari
AFTER 2015: INTERNATIONAL DEVELOPMENT POLICY AT A CROSSROADS

Rethinking International Development Series
Series Standing Order ISBN 978-0230-53751-4 (hardback)

You can receive future titles in this series as they are published by placing a standing order. Please contact your bookseller or, in case of difficulty, write to us at the address below with your name and address, the title of the series and the ISBN quoted above.

Tables

4.1	Population Growth Indicators in Africa and in Developing Countries	64
4.2	Population Growth Rate in Maghreb Countries by Period (in %)	76
4.3	Economic and Demographic Weight of Five Key Sub-Saharan African Countries	87
A4.1	Demographic Indicators by Region in Africa	95
A4.2	Population Size and Rate of Growth According to United Nations' Variants, 2005–2030	97
A4.3	Economic Growth and Demographic Growth by Country	98
6.1	Country Context and Innovation Challenges	142
6.2	Research and Development Indicators	148
6.3	Aggregate Access to Electricity in Africa in 2008	150
6.4	ICT Indicators for Africa in 2007	151
6.5	Internet Users and Population Statistics for Africa	152
7.1	World Governance Indicators: 'Voice and Accountability' and 'Government Effectiveness' 2000–2008	177
9.1	Average Growth Rates of African Regions	228
9.2	Profile of Sub-Saharan Africa's External Debt	237
9.3	Share of FDI for Developing Countries (%)	239
10.1	Main Uncertainties and Trajectories in Chapters on Drivers of Change	258
10.2	Overview of Scenario Storylines	261
10.3	Characteristics of Major Actors across the Scenarios	274
11.1	Key Messages from the Chapters on Drivers of Change	277

Figures

3.1	African Export Volumes and Major Trading Partners (2000–2008)	38
3.2	Aid to Africa (ODA disbursements from all donors to Africa)	40
3.3	Per Capita Aid to Africa (1990–2007)	41
3.4	Human Development in Africa in International Comparison (2007)	45
3.5	Numbers of Armed Conflicts in Africa and the World (1990–2007)	49
3.6	Political Regime Trends in Africa (Polity Score of African Countries 1990–2008)	53
4.1	Representation of Countries in the First Factorial Plane	74
4.2	Relationship between the TFR (2007) and the HDI (2005) for African Countries	80
A4.1	Representation of Variables in the First Factorial Plane	96
5.1	Major Climate Zones of Africa According to the Length of the Growing Period	108
5.2	Observed Climate Change Impacts in Africa	114
6.1	The System of Innovation (OECD1999)	143
6.2	Systemic Technological Innovation Scenarios for Africa 2030	161
7.1	Freedom House Rankings for Africa as a Whole (1990–2009)	176
7.2	The Consolidation of Political Regimes, 19 African Countries (2008)	178
10.1	Key Dimensions of Uncertainty	260

Boxes

5.1	Definitions of Climate, Climate Variability and Climate Change	106
5.2	The ENSO and the ITCZ and their Influences on Climate Variability in Africa	109
8.1	The Eight Principles Governing China's Foreign Aid	200

Acknowledgements

This volume represents a collective effort stretching back over two years. It was conceived within the framework of the research project ‘Development Policy: Questions for the Future’, for which funding from the German Federal Ministry for Economic Cooperation and Development is gratefully acknowledged. A main aim of the project was to apply future-oriented research methods to analyse how the global development landscape could evolve in the long term. This is an ambitious agenda to which this book offers a partial response, and I hope that the present work will inspire further reflection on this topic.

Many individuals and institutions helped to make the completion of this volume possible. Some 60 individuals participated in workshops organised in connection with this book project held in Bonn in February 2009 and September 2009 and in Johannesburg in December 2009. In addition, 45 individuals graciously contributed their time in answering exploratory questions during interviews in Bonn, Berlin, and Brussels in late 2008 and early 2009 and in Accra and Addis Ababa in May 2009. These individual inputs into the research process were greatly appreciated. I am especially grateful to Aidan Eyakuze and Arthur Muliuro from the Society for International Development for their valuable assistance in facilitating the February 2009 workshop, which played a key role in shaping the overall contours of this volume. That workshop also benefited from financial and organisational support from the European Association of Development Research and Training Institutes (EADI). The South African Institute for International Affairs (SAIIA) deserves thanks for its help in organising the December 2009 workshop in Johannesburg and for hosting the event. I also appreciated having an opportunity to present the project to an audience at the KfW Development Bank in Frankfurt in July 2010.

I would like to give my special thanks to all of the contributing authors to this volume for meeting the challenge of casting a gaze into the future of a large and diverse continent. This task has required both creativity and patience, and it has been a privilege for me to work together with this group of researchers, who have taught me a great deal during this process.

A number of individuals have volunteered their time to comment on different components of the text to help sharpen the analysis. Sincere thanks go to my colleagues at the German Development Institute Michael Brüntrup, Mark Furness, Markus Loewe, Davina Makhan, Dirk Messner, and Andreas Stamm as well as to Geci Keruri-Sebina, Garth Le Pere, and Rasigan Maharajh for their constructive feedback on various pieces of the text.

Gertrud Frankenreiter's administrative support throughout the course of this project was indispensable and merits special acknowledgment. I also thank Miriam Douiri and Greta Röber for their assistance in the project's final stages.

Finally, I am grateful to Andy Sumner for his encouragement of this project and to the publications team at Palgrave Macmillan for their friendly assistance as well as their patience in seeing the project through to completion.

Erik Lundsgaarde

Contributors

Raïmi Fassassi is a researcher and instructor at the Ecole Nationale Supérieure de Statistique et d'Economie Appliquée (ENSEA) in Abidjan, Côte d'Ivoire. A demo-economist by training, Dr. Fassassi has more than 15 years of experience in the collection and interpretation of data related to a variety of social and economic development topics. His research on demographic trends in the African context has covered several dimensions of demographic change, including studies of fertility, the prevalence of HIV/AIDS, and migration, especially in West African countries. Recent publications include a study on the demand for children in sub-Saharan Africa and a study of the demographic transition in sub-Saharan Africa.

Sven Grimm is the Director of the Centre for Chinese Studies at the University of Stellenbosch. Prior to assuming this position, Dr. Grimm worked as a research fellow at the German Development Institute / Deutsches Institut für Entwicklungspolitik (DIE). He has studied in Hamburg, Accra, and Dakar and has worked on the European Union's relations to developing countries since 1999. His research areas include European development policy, the linkage between foreign and development policy, and African governance. More recently, Dr. Grimm has undertaken research on the role of new donors in international development in his function as work package leader in the European Development Cooperation to 2020 (EDC 2020) research programme, and has focused especially on the role of China as a new donor in Africa as well as the influence of South Africa as a donor within Africa.

Natasha Grist holds PhD and MSc degrees from the School of Development Studies at the University of East Anglia. She currently serves as Head of Research for the Climate and Development Knowledge Network and as a research fellow in the Rural Policy and Governance group at the Overseas Development Institute, London, where her research focuses on development cooperation policy and adaptation to climate change. Prior to joining ODI, she worked as a senior research associate in the international development programme at the Tyndall Centre for Climate Change Research.

He Wenping is a professor and director of the Division of African Studies at the Institute of West Asian and African Studies (IWAAS) at the Chinese Academy of Social Sciences (CASS), Beijing. She obtained a Ph.D. in law and MA and BA degrees in International Politics from Peking University. Dr. He's main research areas include the modern relations between China and African countries, relations between China and other world powers,

the comparative study of African democratic transition, and South African politics. She has published extensively on African political development, African international relations, and Sino-African relations.

Chinwe Ifijeka Speranza is a geographer holding degrees from the University of Bern, the University of Zürich, and the University of Nigeria. She is a researcher at the German Development Institute in Bonn and at the Centre for Development and Environment of the University of Bern. Her research currently focuses on adaptation to climate change in African agriculture, African climate policy, and on the impacts of development interventions on rural livelihoods.

Francis Ikome is currently Head of the African Conflict Prevention Programme (ACPP) at the Institute for Security Studies (ISS) in Pretoria. Between 2008 and 2010, Dr. Ikome served respectively as Director of the Multilateral Programme and the Africa Programme of the Institute for Global Dialogue (IGD). From 2006 to 2008 he served as senior policy officer at the African Union's Economic, Social, and Cultural Council (ECOSOCC). He holds an MSc in Political Science from the University of Ibadan, Nigeria and a PhD in International Relations from the University of the Witwatersrand in South Africa. He is the author of *From the Lagos Plan of Action to the New Partnership for Africa's Development: The Political Economy of African Regional Initiatives*. He has also published widely on issues relating to conflict resolution, regional integration, the African Union, and governance and democracy in Africa.

Geci Karuri-Sebina is a research associate at the Institute for Economic Research on Innovation (IERI) at the Tshwane University of Technology, Pretoria. Ms. Karuri-Sebina is the chairperson of the South African Node of the Millennium Project, a global network of future-oriented researchers, and has contributed to numerous foresight projects on Africa, including scenarios on the future of the Southern African Development Community toward 2015, experimental work on South Africa's State of the Future Index and its potential contribution to the country's policy discourse, and the establishment of ForesightForDevelopment.org, an emerging knowledge management platform on foresight in Africa. Her current work focuses on applied research in development policy and practice, with an emphasis on social innovation policies, programmes, and systems. She is currently acting as a specialist advisor to South Africa's National Treasury for the national neighbourhood (township) development programme.

Garth le Pere is a Senior Partner of the consulting firm DAJO Associates and a Visiting Professor of International Relations at the University of Pretoria. From 1995 to 2009 he was Executive Director of the Institute for Global Dialogue in South Africa. He earned a PhD in Political Science at Yale University. Dr. le Pere's recent work has concentrated on globalisation and

emerging markets, normative approaches to global governance, the post-colonial state in Africa, and China's increasing role in Africa, a subject on which he has co-authored a book, *China, Africa, and South Africa: South-South Co-operation in a Global Era*. He is currently working on another book, *Reconfiguring Power after the Cold War: China's Relations with the US, the EU, and Russia*.

Erik Lundsgaarde has been a researcher at the German Development Institute/Deutsches Institut für Entwicklungspolitik (DIE), Bonn, since 2008, where his research has focused on applying future-oriented methods to explore how the global development landscape could evolve in the coming decades. His previous research has examined the domestic politics of foreign aid in donor countries, the linkages between trade and aid flows, and the role of private actors in global development. Dr. Lundsgaarde earned PhD and MA degrees in Political Science from the University of Washington.

Rasigan Maharajh is currently chief director of the Institute for Economic Research on Innovation (IERI) based at the Tshwane University of Technology. He is concurrently a Doctoral Research Fellow of the Research Policy Institute of Lund University in Sweden. He was previously the Head of the Policy Group at the Council for Scientific and Industrial Research (CSIR) following his deployment as National Coordinator of the Science and Technology Policy Transition Project for South Africa's first democratic government. Before 1994, he worked in the non-governmental sector while holding elected leadership positions within various structures of the mass democratic movement and the African National Congress. He is an active member of the Global Network for the Economics of Learning, Innovation and Competence-building Systems (GLOBELICS) and an alumnus of the University of Kwa-Zulu Natal, Wits Business School and Harvard Business School and has also been associated with Harvard University and University of Manchester.

Stefan Meyer is an independent author and consultant. Formerly he was a senior researcher at the Fundación para las Relaciones Internacionales y el Diálogo Exterior (FRIDE), an international relations think tank in Madrid. Having studied political science, governance, and development, he has worked as a consultant on aid instruments and conflict impact assessment for a number of NGOs and for the German Development Bank (KfW). Between 2000 and 2003, he was coordinator of the social sector of the reintegration programme for refugees and ex-combatants in Sierra Leone at the Deutsche Gesellschaft für Technische Zusammenarbeit (GTZ). Previously, he worked as a researcher in a consultancy firm for health sector reform and in an NGO providing civic education. His research at FRIDE focused on aid harmonisation, governance, and democratisation issues, with a special emphasis on West Africa.

Marthe Roch completed her MA in Political Science at University of Bonn. Her main research interests are international relations and development policy. In particular, she has studied how anchor countries influence the economic and security context of their neighbouring regions using the examples of Nigeria and South Africa. Between September 2009 and February 2010 she worked as a researcher at the German Development Institute (DIE) in Bonn.

Alioune Sall is executive director of the African Futures Institute, a pan-African, non-governmental organization established in early 2004 to promote prospective thinking in Africa. He holds a Doctorate in Sociology from Université de Paris VII. He has had a distinguished career with UNDP where he has held several senior positions at Headquarters in New York (deputy director of the NGO Division, Chief of the office of the Africa Bureau) and South Africa (chief of UNDP liaison office). Before joining UNDP, he conducted research and lectured in IDEP (African Institute for Economic Development and Planning) and ENDA (Environmental Development in Africa and the Third World). Dr. Sall also worked in CILSS (Permanent Inter-State Committee for Drought Control in Sahel) where he served as chief of the Human Resources Development Programme and chief of the Office of the Executive Secretary. Dr. Sall has authored, co-authored, or edited several books on African development issues and futures studies, including *Africa 2025: What Possible Futures for Sub-Saharan Africa?*

Patrice Vimard is a researcher at the Laboratoire Population-Environnement-Développement in Marseille and serves as research director at the Institut de Recherche pour le Développement. A demographer, Dr. Vimard has studied a variety of aspects of population changes in the Maghreb and in Africa South of the Sahara. Major research initiatives with which he has been involved include a research programme on family changes, population policies and human development, a programme on fertility transitions and the transformation of rural societies, and a study of the relationships between population dynamics and economic and environmental crises. His current research is focused on the relationship between population dynamics and human development policies in Africa adopting a comparative approach and he has recently contributed to the project 'l'Afrique Face à ses Défis Démographiques: un Avenir Incertain', including the preparation of a synthesis chapter for the volume summarising the results of a wide-ranging research programme on Africa's demographic future.
