Acknowledgments

I am grateful to my former colleagues in the Department of Instructional Design, Development and Evaluation at Syracuse University and my current colleagues in the Learning, Design, and Technology program at The University of Georgia for both allowing me to learn how to teach instructional design and encouraging me to share my use of ADDIE as an approach to instructional design.

I want to acknowledge the following members of the training department at Universal Instruments in Binghamton, New York, during the early to mid-1990s who helped shape some of my initial perceptions about authentic training development environments: Patricia Wrobel, Corporate Training Manager, Gregory Taylor, Customer Training Manager, and trainers Steve Austin, Charles Brown, Adolfo Lopez, and Edward Milot who comprised the ad hoc Instructional Design Group.

I look forward to the continued support of colleagues like Dr. Wendy Thompson, an Instructional Designer at the Charles Drew Biomedical Institute in Washington, DC, and my colleagues from a time back at the United States Bureau of the Census who provided opportunities for me to demonstrate the effectiveness of the ADDIE approach to instructional design with national implications.

I wish to thank Ted Lehne of the Learning Services Division at Delta Air Lines, Susan Greathead, President of Lead America Corporation, and Lynn Miller, Senior Enterprise Associate at the Center for Creative Leadership for their inspiration.
