

Palgrave Studies in Religion, Politics, and Policy

Series Editors: Ted G. Jelen and Mark J. Rozell

A generation ago, many social scientists regarded religion as an anachronism, whose social, economic, and political importance would inevitably wane and disappear in the face of the inexorable forces of modernity. Of course, nothing of the sort has occurred; indeed, the public role of religion is resurgent in US domestic politics, in other nations, and in the international arena. Today, religion is widely acknowledged to be a key variable in candidate nominations, platforms, and elections; it is recognized as a major influence on domestic and foreign policies. National religious movements as diverse as the Christian Right in the United States and the Taliban in Afghanistan are important factors in the internal politics of particular nations. Moreover, such transnational religious actors as Al-Qaeda, Falun Gong, and the Vatican have had important effects on the politics and policies of nations around the world.

Palgrave Studies in Religion, Politics, and Policy serves a growing niche in the discipline of political science. This subfield has proliferated rapidly during the past two decades, and has generated an enormous amount of scholarly studies and journalistic coverage. Five years ago, the journal *Politics and Religion* was created; in addition, works relating to religion and politics have been the subject of many articles in more general academic journals. The number of books and monographs on religion and politics has increased tremendously. In the past, many social scientists dismissed religion as a key variable in politics and government.

This series casts a broad net over the subfield, providing opportunities for scholars at all levels to publish their works with Palgrave. The series publishes monographs in all subfields of political science, including American politics, public policy, public law, comparative politics, international relations, and political theory.

The principal focus of the series is the public role of religion. "Religion" is construed broadly to include public opinion, religious institutions, and the legal frameworks under which religious politics are practiced. The "dependent variable" in which we are interested is *politics*, defined broadly to include analyses of the public sources and consequences of religious belief and behavior. These would include matters of public policy, as well as variations in the practice of political life. We welcome a diverse range of methodological perspectives, provided that the approaches taken are intellectually rigorous.

The series does not deal with works of theology, in that arguments about the validity or utility of religious beliefs are not a part of the series focus. Similarly, the authors of works about the private or personal consequences of religious belief and behavior, such as personal happiness, mental health, or family dysfunction, should seek other outlets for their writings. Although historical perspectives can often illuminate our understanding of modern political phenomena, our focus in the Religion, Politics, and Policy series is on the relationship between the sacred and the political in contemporary societies.

Acknowledgments

I would like to thank my wife Janelle for enduring the many long hours I devoted to this book and my two-year-old daughter Annalise for humoring me in countless ways, including her persistent belief that I was in fact writing a book about Barack Obama, who supposedly I work with, and pronouncing “Romney” in such an adorable way.

I would like to thank my Mom, Diane Perry, for teaching me how to pay attention to detail, to be unwavering in my determination, and to be confident without taking myself too seriously. I would like to thank my Dad, Chad Perry, for instilling me with a love for learning and teaching me how to stay calm, effectively communicate, and analyze behavior. I would not be who I am today without such devoted, loving, and patient parents.

I would like to thank the countless teachers, mentors, and scholars who have nurtured and enhanced my studies and scholarship. This includes, but is certainly not limited to, Melvin Kulbicki, who inspired my interest in American politics, Mary Graham, who introduced me to scholarly writing, Alana Jeydel, who guided me to graduate school, Jerry Mileur, who gave me the professional opportunity of a lifetime, and Jeffrey Sedgwick, who taught me the value of patient and reasoned deliberation. This book in particular benefited from the kindness, generosity, and knowledge of many people, including Richard Bushman, Patrick Mason, Matthew Bowman, Orrin Hatch, Joanna Brooks, Michael Leavitt, and Randy Allen.
