1 Introduction	1
2 Financing the Green Transformation – Market Failures, Government Failures and the Role of the State	7
2.1 The economic rationale for public intervention – addressing the obstacles to green finance	7
2.1.1 Market failures	7
2.1.2 Government failures	12
2.1.3 Balancing public and private interest	14
2.2 Measures and instruments to enhance green finance	16
2.2.1 Creating a conducive policy framework	16
2.2.2 Extending the supply of green finance	17
2.2.3 Fostering the demand side	19
3 The Green Transformation in Indonesia	22
3.1 The need for a green transformation	22
3.2 Policy goals and initiatives	27
3.2.1 Policy goals	27
3.2.2 The National Action Plan	29
3.2.3 Energy conservation policies	32
3.2.3 Further environmental regulations	34
3.3 Emission reduction potentials, investment needs and financing sources	36
3.3.1 Potential GHG emission reductions in the energy sector	36

3.3.2	Investment needs	40
3.3.3	Potential sources of green finance in Indonesia	49
4	Empirical Analysis of Supply of and Demand for Green Finance in Indonesia	56
4.1	Supply side: bank survey and interviews	57
4.1.1	Methodology: sample selection, hypotheses and questionnaires	57
4.1.2	Findings	58
4.2	Demand side: company survey and interviews	70
4.2.1	Methodology: sample selection, hypotheses and questionnaires	70
4.2.2	Findings	76
4.3	Summary of findings	92
5	Policy Recommendations	95
5.1	A three-phased approach to fostering green finance	96
5.2	Defining green finance	102
5.3	Capacity building	105
5.4	Energy service companies	107
5.5	Soft loan schemes	109
5.6	Credit guarantee scheme	113
5.7	Utility finance	116
5.8	Vendor financing	117
5.9	Summary	118
6	Summary and Conclusions	120
	<i>Annex</i>	124
	<i>Notes</i>	159
	<i>References</i>	162
	<i>Index</i>	173

List of Boxes

3.1	Policies and strategies to reduce emissions in energy, transportation and industrial sectors	31
3.2	Electricity price structure in Indonesia	34
3.3	Indonesia's power system	37
3.4	Policies, actions and instruments for the energy sector	47
5.1	Implementation of a green banking policy by Bangladesh Bank	99
5.2	Risk categorisation and managing portfolio risk	105
5.3	The Thai Energy Efficiency Revolving Fund	111
5.4	Kredit Usaha Rakyat credit guarantee scheme	114

List of Figures

3.1	GHG emissions (in trillion g CO ₂ e) in Indonesia by source, 2000 and 2005	23
3.2	Energy consumption in the industry sector (in million barrel of oil equivalent)	39
3.3	Asset composition of financial institutions (as of June 2013)	52
3.4	Domestic credit to private sector by banks (% of GDP), 1980–2012	53
3.5	Equity, bonds and domestic credit (in billion USD and as % of total), December 2000–June 2013	54
4.1	Green finance as a promising business area	59
4.2	Extension of green finance	60
4.3	Green finance working unit	61
4.4	Availability of qualified staff	62
4.5	Effects of environmental risks	65
4.6	Opinions on regulatory framework	67
4.7	Obstacles to green finance	68
4.8	Support from banking authority	69
4.9	Awareness	77
4.10	Environmental concerns	77
4.11	Environmental investments	78
4.12	Conditions to foster investments	80
4.13	Access to finance	82
4.14	Obstacles to credits	83
4.15	Risks of an investment credit	83
4.16	Electricity expenses	85
4.17	Effects of an increase in energy prices	86
4.18	Subsidies and business competitiveness	86
4.19	Environmental licenses	87
4.20	Bottlenecks and recommendations	94
5.1	Kredit Usaha Rakyat credit guarantee scheme disbursement, 2008–2011	115

List of Tables

2.1	Types of market barriers and measures that can alleviate them	10
3.1	RAN-GRK Priority sectors and envisaged action	30
3.2	Emission reduction potential per priority sector	42
3.3	Top countries for south-originating investment in renewable energy infrastructure, 2004–2013 Q3	43
3.4	Activities in the energy sector as put forward in the Indonesia Climate Change Sectoral Roadmap	44
3.5	Examples of industrial technology available for GHG emission mitigation in the industry sector	48
3.6	Indonesia’s sovereign ratings, August 2014	51
3.7	Number of financial institutions, 2013	52
4.1	Company size and sample distribution per sub-sector of firms participating in online firm survey and interviews	75
4.2	Major findings at the company level	91

Acknowledgements

This study was financed by the German Development Institute/ Deutsches Institut für Entwicklungspolitik (DIE) as part of its Postgraduate Training Programme. The bank and firm surveys in Indonesia were developed and carried out in collaboration with Bank Indonesia, the Indonesian central bank. This research would not have been possible without the invaluable advice and support we received from Bank Indonesia's Pak Mulya E. Siregar, Pak Edi Setijawa, Ibu Diana Yumanita and Pak Frans Hendra Winarta who devoted much time and effort to this study by supporting and advising us in all matters of our research. We have also benefitted tremendously from close co-operation with the Regional Economic Development Programme of the German Development Cooperation (GIZ) in Indonesia and the Financial Systems Development team at the GIZ headquarters in Eschborn. At GIZ Indonesia our gratitude goes especially to Frank Bertelmann and Michael Marien for their support and advice during all stages of this research project, as well as to Ibu Nanik Rahmawati for her great backup in organising firm interviews. Special thanks go to Volker Bromund from Prime Consultancy for invaluable advice on all matters related to (green) banking and finance in Indonesia. Gratitude is also due to colleagues from KfW Development Bank and DEG, who provided advice and organisational support, TUV Rheinland Indonesia whose support in disseminating the firm survey was crucial, as well as the Indonesian Business Council for Sustainable Development and the Green Building Council.

For our research we carried out numerous interviews with representatives from Indonesian banks, companies, ministries, business associations, as well as experts from academia, NGOs, international organisations and international development agencies. We would like to sincerely thank all those who shared their time and insights with us. Moreover, we would like to thank our interpreters in Jakarta, Semarang, Yogyakarta and Bandung for their assistance as well as the translators at Bank Indonesia and the GIZ Regional Economic

Development Programme for translating the bank and firm surveys from English into Bahasa Indonesia.

At the risk of forgetting someone, we would like to thank all those who have contributed in various ways to this study (in alphabetical order): Vincent Aloysius, Pamela Bracey, Maren Breuer, Wolfgang Bücken, Simone Dettling, Achim Deuchert, Laksmi Dhewanthi, Adi Ekopriyono, Bigael Febe, Thomas Foerch, Roland Gross, Andianto Haryoko, Paul Heinemann, Sakariza Qori Hemawan, Ester Hutabarat, Noke Kiroyan, Alexander Klein, Arief Heru Kuncoro, Indria Kusumawardani, Timotheus Lesmana, Binsar Marpaung, Rana Yusuf Nasir, Oliver Oehms, A. Aziz Pane, Eva Pitterling, Ramaiyer Ramachandran, Tiur Rumondang, Jochen Saleth, Johny Supriyadi Salim, J.W. Saputro, Giulia Sartori, Christian Schoen, Dieter Schulze-Vornhagen, Irwan Sendjaja, Rike Septivisari, Samuel Siahaan, Gunadi Sindhuwinata, Noraya Soewarno, Dirk Steinwand, Miles A. Stump, Asep Suwarna, Frank Tibitzanzl, Ronald van Doorn, Heiner von Luepke and Nyoman Yogi. We also thank all those who attended our workshop at Bank Indonesia for the discussion of our preliminary findings and for providing critical comments and new perspectives. Last but not least, at DIE we would like to thank Peter Wolff, Kathrin Berensmann, Clara Brandi, Jonas Hein, Nannette Lindenberg and Anna Pegels for their helpful feedback and advice during the research process as well as for remarks on earlier versions of the manuscript and Regine Mehl for great support throughout this project. Any shortcoming is our own and the views expressed in this study should not be attributed to Bank Indonesia or any of the organisations or persons which supported our research.
