

European Administrative Governance

Series Editors

Thomas Christiansen
Maastricht University
The Netherlands

Sophie Vanhoonacker
Maastricht University
The Netherlands

The series maps the range of disciplines addressing the study of European public administration. In particular, contributions to the series will engage with the role and nature of the evolving bureaucratic processes of the European Union, including the study of the EU's civil service, of organization aspects of individual institutions such as the European Commission, the Council of Ministers, the External Action Service, the European Parliament, the European Court and the European Central Bank and of inter-institutional relations among these and other actors. The series also welcomes contributions on the growing role of EU agencies, networks of technical experts and national officials, and of the administrative dimension of multilevel governance including international organizations. Of particular interest in this respect will be the emergence of a European diplomatic service and the management of the EU's expanding commercial, foreign, development, security and defence policies, as well as the role of institutions in a range of other policy areas of the Union.

Beyond this strong focus of EU administrative governance, the series will also include texts on the development and practice of administrative governance within European states. This may include contributions to the administrative history of Europe, which is not just about rules and regulations governing bureaucracies, or about formal criteria for measuring the growth of bureaucracies, but rather about the concrete workings of public administration, both in its executive functions as in its involvement in policy-making. Furthermore the series will include studies on the interaction between the national and European level, with particular attention for the impact of the EU on domestic administrative systems.

ACKNOWLEDGMENTS

This book would not have been possible without the help and support of countless others. First and foremost, I am extremely grateful to Bart Kerremans for providing me the opportunity to conduct this research, and for his guidance and support. A generous and critical guidance committee helped me let go of ideas and arguments, despite my love for them. Much gratitude is due to Dirk De Bièvre and Andreas Dür for repeatedly discussing earlier drafts of chapters and discussion notes.

I also consider myself lucky to be surrounded by so many selfless people who took the time to read and comment on earlier draft chapters. Thanks are due to Tom Delreux, Hylke Dijkstra, Edith Drieskens, Colleen Carroll, Evelyn Coremans, Yf Reykers, Margaux van de Velde and Vigilencia Abazi. The luxury of working in a stimulating environment is not to be taken for granted. My colleagues at the KU Leuven, Maastricht University and University of Antwerp are to be thanked for the good times I have enjoyed (and continue to enjoy) both during and after office hours.

To gather the necessary data for this research, I was dependent on many civil servants and diplomats who gallantly spared their scarce time. Therefore, I would also like to extend my gratitude to all the respondents of the survey and the interviewees in the member states and European institutions. In particular, I would like to thank Jean-Charles van Eeckhaute of the European Commission who supported me in distributing the survey in the TPC. A special word of thanks is also in place for Katarina Sazonkyna for her assistance in the field research in Poland.

In my first economics class, I was introduced to the concept of opportunity cost. The idea that you cannot spend your time twice implies that

with every choice you make, you forego a range of alternatives. In that sense, I owe my family and friends both my gratitude as well as an apology. My gratitude is for their unrelenting support, even if I could not return the favour, and my apologies are for all the times I chose the company of my work over theirs. Last but not least, I would like to thank Eulalie for her love, and Josephine.
