Challenges to Democracy in the 21st Century

The series “Challenges to Democracy in the 21st Century” was initiated by the Swiss National Center of Competence in Research *NCCR Democracy*, an interdisciplinary research program launched by the Swiss National Science Foundation and the University of Zurich in 2005. The program examines how globalization and mediatization challenge democracy today (www.nccr-democracy.uzh.ch).

Series Editor: **Hanspeter Kriesi**, University of Zurich, Switzerland

Democracy faces substantial challenges as we move into the 21st Century: the West faces malaise; multi-level governance structures pose democratic challenges; and the path of democratization rarely runs smoothly. This series examines democracy across the full range of these contemporary conditions. It publishes innovative research on established democracies, democratizing polities and democracy in multi-level governance structures. The series seeks to break down artificial divisions between different disciplines, by simultaneously drawing on political communication, comparative politics, international relations, political theory, and political economy.

Acknowledgements

This book would not have been possible without the generous funding from the Swiss National Science Foundation. The project started in May 2012 and several people have helped bring it to a successful conclusion. My special thanks go to Professor Frank Esser from the University of Zurich, who supervised the project and was involved in developing the coding instrument. I am infinitely grateful for his advice and encouragement during my work on this project. Similarly, I thank Professor Gabriele Siegert for her helpful comments on an earlier version of the manuscript. Furthermore, I am indebted to the student assistants who helped code the extensive news material: Filip, Nika, Stephanie, Silja, Julia, and Puya. Finally, I am thankful to my family and friends for their continuous encouragement, as well as my colleagues at IPMZ for sharing their expertise and providing enjoyable moments inside and outside the office. My deepest and most heartfelt appreciation goes to my partner Nino. His patience, support and our intensive discussions about media and politics provided me with the motivating encouragement to write this book and wrap it up.

This work was accepted as a PhD thesis by the Faculty of Arts and Social Sciences, University of Zurich in the autumn term 2014 on the recommendation of the Doctoral Committee: Professor Frank Esser (main supervisor) and Professor Gabriele Siegert.
