ACKNOWLEDGMENT

I would like to take this opportunity to thank Bruce Aune, Steven Braude, Fred Feldman, Edmund L. Gettier, and Michael Hooker for their willingness to discuss certain problems that arose in connection with setting my mind straight about knowledge and belief in the course of writing this monograph. There are some matters on which I still disagree with each of them, but without their help, I could not have written a manuscript with which I would have been satisfied, given the space limitations of this series.

I should like to dedicate this volume to the series general editor, D. J. O'Connor—left-handed spin bowler, Chelsea fan, philosopher, and friend.
