CONTENTS

Introduction	1
Chapter 1 Propagation of radio waves in a dielectric	3
1.1 Propagation of plane waves	3
1.2 Spherical waves	8
Chapter 2 Tropospheric propagation	13
2.1 Propagation in a standard atmosphere	13
2.2 Propagation in a stratified atmosphere	21
2.3 Tropospheric scattering	29
Chapter 3 Wave propagation in the ground	54
3.1 Terrestrial electric constants	54
3.2 Electrical behaviour of imperfectly conducting bodies	54
3.3 Propagation of a plane sinusoidal wave of constant frequency in an imperfectly conducting medium	55
3.4 Wave propagation in the ground	58
Chapter 4 Wave propagation close to the earth's surface	59
4.1 Wave reflection from the earth's surface	59
4.2 Wave behaviour near the ground	71
4.3 Field value on flat ground; surface wave	74
4.4 Calculating the field on spherical ground	78
4.5 Propagation over irregular terrain	80
Chapter 5 Wave propagation in ionized media	86
5.1 Constitution of an ionized medium	86
5.2 Motion of particles; effect of electric and magnetic fields	87
5.3 Propagation in the absence of a magnetic field	90

5.4	Propagation in the presence of the earth's magnetic field, when the latter is parallel to the direction of propagation	97
5.5	Complete equation and approximations	100
Chapter 6	Ionospheric propagation	102
6.1	The ionosphere	102
6.2	Ionospheric propagation	125
6.3	Ionospheric predictions	149
6.4	Random variations in the ionosphere	151
Chapter 7	Principles of calculating a radio link	158
7.1	Field received	158
7.2	Field required	170
7.3	Calculating the minimum required field	183
Chapter 8	Practical calculation of radio links	184
8.1	Introduction	184
8.2	Decametric (h.f.) and longer waves	186
8.3	Metre and shorter waves	274
	Appendices	303
A.1	Units	303
A.2	Properties of electromagnetic fields	305
A.3	Maxwell's equations	306
A.4	Retarded potentials	308
A.5	Hertzian vector	309
A.6	Statistical distributions	310
A.7	Fourier transformations	320
A.8	Fresnel zones	322
A.9	Doppler effect	325
A.10	Calculation of the signal-to-noise ratio	326
	References	331
	Index	341
