8 Freehand sketching	24
9 Electrical work	26
10 Drawing exercises	27
Appendix: Extracts from BS 308: Part 1: 1972	55

PREFACE

This book is entirely in SI units, and has been specially prepared to be used by all students taking basic Engineering Drawing. Students and lecturers alike can use it for classwork and for homework examples.

My thanks are due to:

- (a) my senior students, Messrs Lamming, Prosser, Howlett, Claridge, Grainger, Salt and Wainwright who have drawn out many of the examples;
- (b) my friend and former colleague Mr P. G. W. Astley, who has checked the script;
- (c) my wife Tessa, who, besides typing the script, has carried out many other tasks to prepare the book for publication;
- (d) the publishers and production team for their helpful comments and suggestions.

Extracts from B.S. 308: Engineering Drawing Practice: Part I: 1972 General Principles, are reproduced by permission of the British Standards Institution, 2 Park Street, London W1A 2BS.
