No representation or warranty is given that the matter treated in this book is free from patent rights; nothing herein should be interpreted as granting, by implication or otherwise, a licence under any patent rights.

This book is sold subject to the standard conditions of the Net Book Agreement.

The paperback edition of this book is sold subject to the condition that it shall not, by way of trade or otherwise, be lent, resold, hired out, or otherwise circulated without the publisher's prior consent in any form of binding or cover other than that in which it is published and without a similar condition including this condition being imposed on the subsequent purchaser.

PREFACE

This book has been written for the use of the automotive electrical engineer, fitter, mechanic and student whose career is concerned with the electrical system of the motor car. It is also intended for the keen driver who wishes to obtain full information, not only on how the system works, but also on why it works and why certain features are used in preference to others.

The basic principles of electricity and its application to the motor car are fully covered with the accent on principles of operation, with suitable illustrations of modern practice. Every endeavour has been made to make this volume as up-to-date as possible despite the continual development taking place in the industry. Despite this development, the basic principles still remain the same and with this knowledge, the newest developments can easily be followed.

In conclusion, the author trusts that the reader will find this work both informative and readable. If this is so, his endeavours will have succeeded.

R. H. Bacon

CONTENTS

Chapter 1:	ELECTRICAL THEORY	1
	The electric sections	1
	The electric circuit	2
	Ohm's law	3
	The ampere-hour	4
	Electric power	4
	Conducting and insulating	4
	Magnetism	5
	Electromagnetism	6
	Electromagnetic induction	7
	Generating electricity	7
	Generating direct current	9
	Dynamo or alternator?	10
	The direct current motor	11
	The induction coil	11
	Self-induction and the condenser	12
Chapter 2:	WIRING	13
	The conductors	13
	Current return	15
	The wiring diagram.	17
	Connectors	17
	Wiring troubles	19
	Fuses	20
Chapter 3:	THE BATTERY.	22
	Primary and secondary cells	22
	The lead-acid battery	23
	The plates and separators	24
	Battery chemistry	25
	Checking battery charge.	26
	Battery capacity	28
	Maintaining the battery	28
	Charging the battery	30
	Battery chargers	31

CONTENTS

v

Chapter 4:	CHARGING WITH THE DYNAMO	32
	The dynamo.	32
	Dynamo output control	35
	The third brush dynamo	36
	Compensated-voltage control	37
	Current-voltage control	41
	The cut out	42
	Dynamo maintenance	43
	Control unit maintenance	44
 Chapter 5:	 THE ALTERNATOR	 45
	The principle of the alternator	45
	The principle of the rectifier	47
	Alternator output control	49
	The alternator relay and warning light	51
	Alternator mounting	52
	Integrated circuit regulator pack	52
	The motor cycle alternator	52
	The 12 volt motor cycle alternator system	54
	The motor cycle alternator control system	55
 Chapter 6:	 SIMPLE IGNITION SYSTEMS	 56
	Ignition systems	56
	Coil ignition.	56
	Electrical operation	57
	The coil	58
	Spark polarity	59
	The contact breaker and distributor	60
	The condenser	62
	The contacts	63
	High tension leads	64
	The firing order	64
	Ignition time	65
	Automatic advance and retard	66
	Distributor maintenance	67
	The rotating-armature magneto	68
	The principle of the magneto	69
	The rotating-magnet magneto	70
	Maintenance of magnetos	71
	Ignition test oscilloscope	71

Chapter 7: SPARKING PLUGS	72
Plug construction	72
Sparking plug sizes	73
Plug types.	74
Plug maintenance	76
Chapter 8: ADVANCED IGNITION SYSTEMS	78
The cold start ignition coil	78
Ignition using transistors	78
Transistor assisted contacts	79
Electronic ignition	81
The Lucas "Opus" electronic ignition system	82
The photodiode ignition system	83
The magnetic pulse ignition system	83
Piezo-electric ignition	84
Chapter 9: STARTING SYSTEMS	85
The starter motor	85
Starter power	87
The starter drive	87
The inertia engaged drive	88
Positive engaged drive	89
Inboard and outboard drive	90
Starter maintenance	91
The starter switch	93
Chapter 10: LIGHTING	96
Headlamps	96
The headlamp lens	97
Earlier headlamps	98
The light unit with pre-focus bulb	99
The light unit with asymmetric dipped beam	101
The sealed beam unit	102
The four headlamp system.	103
Headlamp setting	105
Other external lamps	107
Extra driving lamps	109
Lamp bulbs	110
Tungsten halogen bulbs	113
The effect of headlamp voltage variation	115

Chapter 11: ELECTRICAL CONTROLS, INSTRUMENTS AND	
ACCESSORIES	117
The electric horn	117
The high frequency horn	118
The windtone horn	118
Horn mounting and operation	119
Windscreen wipers	120
The cable rack windscreen wiper	122
The link windscreen wiper	124
Intermittent wiping	125
Windscreen washers	126
Direction indication	127
Flashing light indicators	128
Two-level signals	132
Brake and indicator lights for trailers	132
Dimmed headlamps	134
The dip switch	137
Headlamp flashing	138
Bonnet and boot lamps	138
Brake light switch	138
Courtesy lights	139
Facia or panel lights	140
Warning lamps	140
The electric petrol pump	141
Electrically operated reserve petrol tap	143
Instruments	144
The moving iron-resistance fuel level indicator	144
The bimetal resistance fuel level indicator	146
Oil level indication	147
The thermal temperature indicator	148
The semiconductor temperature indicator	149
The oil pressure indicator	151
Oil pressure switches	151
The voltage stabiliser unit	152
Vacuum gauges	153
The ammeter	153
The voltmeter	153
Air-cored instruments	153
Moving-coil-generator speed indicators	154
Electric clocks	154

Interior heaters and ventilators	156
Demisting	156
Air conditioning	156
Electric cooling fans	157
Power operated windows	157
Electronic fuel injection	157
The overdrive unit	158
Eddy current brakes	158
 Chapter 12: RADIO EQUIPMENT	 160
The car radio	160
Coach equipment	162
The car tape recorder	163
Two-way radio.	163
Car television	163
The aerial	164
Interference	164
Suppressing interference	164
 Chapter 13: ELECTRONIC EQUIPMENT IN CARS	 169
Transistor controlled flashing lights	169
The use of photocells	171
Rear light failure warning	171
Automatic anti-dazzle mirror	172
Automatic headlamp dipping	173
The electric impulse tachometer	174
Fluorescent lighting	175
Zener diode	177
 Index	 178
