PREFACE

This book is presented in a very similar style to the previously highly successful books in the Macmillan Vehicle Engineering Series. Its specific aim is to make easier and more rewarding the task of students, and teachers, working through the City and Guilds 381, Part 1, Motor Vehicle Craft Studies Course and comparable Courses.

The form of presentation relieves both teacher and student of much of the chore of preparation and note taking. As such it enables much more of that most valuable ingredient — time — to be devoted to “real” teaching and learning. Marking and checking is simple, and numerous sections could easily replace the traditional old-style homework.

Great care has been taken with the blank spaces that need to be filled in, and the drawings requiring completion, to allow users of the book as much freedom as possible, within the confines of the syllabus. However for anyone requiring precise guidance as to how the spaces may be completed an “Answer Book” is published as a companion to this volume. This can, of course, be a most valuable aid to teachers in respect of both lesson preparation and presentation.

Anyone completing this book conscientiously should be thoroughly equipped to succeed in their end-of-course examinations.

All the objectives set out in Part 1 of the City and Guilds 381 Course are carefully interpreted and properly covered, without any attempt to "overteach". In a very few instances the Editorial Team considered that a small amount of back-up learning would be helpful, and this has been included as an aid to student progress.

The work is presented in strict syllabus order and with appropriate references. It is realised that this is very unlikely to be the teaching order, but it does maintain an internationally recognizable uniformity. Suggested schemes of work are available from the publisher.

The editor and authors wish success to everyone who uses this book. If you have any constructive suggestions that you would care to make about it we should be most pleased to hear from you via The Macmillan Press Ltd., Basingstoke.

R. Brooks
Editor.

ACKNOWLEDGEMENTS

The editor and authors wish to thank the very many organizations and individuals who have assisted with information and illustrations for this book. In some instances the results may not be easily recognizable, for example where simplified to suit teaching requirements. None the less, their help is greatly appreciated, in particular the following:

BL Cars Ltd.
Calvert Motor Company Ltd.
Vauxhall Motors Ltd.
SU-Butec
The Zenith Carburettor Company Ltd.
AC-Delco
Lucas Industries Ltd.
Champion Sparking Plug Company Ltd.
Automobile Association
VAG (United Kingdom) Ltd.

Contents

Preface	1
Health and Safety	12
SECTION A VEHICLE TECHNOLOGY — ENGINES	13
A1. Spark-ignition engines: principles and construction	36
A2. Cooling	51
A3. Lubrication	58
A4. Petrol fuel system	69
A5. Engine electrical system	80
A6. Compression-ignition engines	86
A7. Fastening and locking devices	90
SECTION B VEHICLE TECHNOLOGY — CHASSIS COMPONENTS	91
B1. Transmission: clutch	99
B2. Transmission: gearbox	108
B3. Transmission: propeller shafts and drive shafts	113
B4. Transmission: final drive	120
B5. Suspension	129
B6. Wheels and tyres	137
B7. Brakes	149
B8. Steering	

B9. Chassis layout and vehicle body	155
B10. Tools and soldering	169
B11. Vehicle electrical systems	178
SECTION C ASSOCIATED STUDIES	190
C1. Calculations	191
C2. Measurement and marking out	211
C3. Heat, temperature, pressure	219
C4. Force and moments	225
C5. Energy, work, power	233
C6. Machines	238
C7. Materials	241
C8. Electricity	250
C9. Drawing	257
