Contents

- 1 Aims and Assumptions**
- 2 Programming**
- 3 Saving Time and Space**
- 4 Word Juggler**
- 5 Money**
- 6 Personal Finances**
- 7 Banking**
- 8 Bulk Storage**
- 9 Rank Order**
- 10 Exam Result Analysis**
- 11 Hardware Modifications**

I would like to express my gratitude to all the ZX80 and ZX81 enthusiasts who have contributed towards this book. Some made their contributions directly but the majority will probably be oblivious of having helped. During countless conversations centring round the machines, chance remarks have sparked off the ideas which led to the finished programs in this work. Steve Adams made many of the direct contributions and his idea on modifying the 3K RAM pack is included in the chapter on hardware. However you made your contribution, thanks.

Particular thanks must go to my wife, Linda. The original idea was that she should read and criticise the material from a complete beginner's point of view but she learned so fast that she became the major bug finder and editor as well. Thanks, love, I couldn't have got half way through without you.
