Contents

	<i>Page</i>
1 Introduction	1
2 Basic Differences	4
3 At Least As Good	7
4 Till	20
5 A File Handling Survival Kit	36
6 Super Storage and Statistics	47
7 Cricket	69
8 Draw and Move	93
9 Effective 1K Programming	114
10 Building Block Programming	129
11 Music	150
Appendix ZX81 Hardware Modifications	171

The idea for this book must be the result of my contacts with other ZX enthusiasts. It is difficult to trace the material back to source, but I am very grateful to all who helped, consciously or otherwise.

Particular thanks must go to two people. John Watson supported the venture from the start and contributed many helpful suggestions. It was he who provided the final solution to the ZX Merge problem in the form of a ROM address which allowed the computer to re-initialise itself. Linda, my wife, provided the valuable criticism which has allowed me to keep the book as free from jargon and as readable for the beginner as it is. Without her support in the bleak periods and her constant attention to detail the final result would have been much less good.

However you helped, thank you.
