STUDIES IN ECONOMIC AND SOCIAL HISTORY

This series, specially commissioned by the Economic History Society, provides a guide to the current interpretations of the key themes of economic and social history in which advances have recently been made or in which there has been significant debate.

Originally launched in 1968 as 'Studies in Economic History', in 1974 the series had its scope extended to include topics in social history, and the new series title 'Studies in Economic and Social History' marked this development. This series was completed in 1995. A new series, published by Cambridge University Press and entitled 'New Studies in Economic and Social History', has now been inaugurated and this includes a number of reissued titles previously published by Macmillan.

Titles still available from Macmillan are given below, followed by a listing of those titles now available from Cambridge University Press.

STUDIES IN ECONOMIC AND SOCIAL HISTORY

This series, specially commissioned by the Economic History Society, provides a guide to the current interpretations of the key themes of economic and social history in which advances have recently been made or in which there has been significant debate.

Originally entitled 'Studies in Economic History', in 1974 the series had its scope extended to include topics in social history, and the new series title, 'Studies in Economic and Social History', signalises this development.

The series gives readers access to the best work done, helps them to draw their own conclusions in major fields of study, and by means of the critical bibliography in each book guides them in the selection of further reading. The aim is to provide a springboard to further work rather than a set of pre-packaged conclusions or short-cuts.

ECONOMIC HISTORY SOCIETY

The Economic History Society, which numbers over 3000 members, publishes the *Economic History Review* four times a year (free to members) and holds an annual conference. Enquiries about membership should be addressed to the Assistant Secretary, Economic History Society, Peterhouse, Cambridge. Full-time students may join the Society at special rates.

Acknowledgements

I am grateful to the Passfield Trustees for permission to quote from the Passfield Papers. My thanks are due to my colleagues at Manchester University who have helped in any way in the production of this short study and particularly to Professor W. H. Chaloner for reading the preliminary draft and for his ever-welcome and valuable advice. I owe a particular debt of gratitude to the first editor of this series, Professor M. W. Flinn, for his careful and critical reading of the manuscript and for his exemplary patience despite the numerous delays which occurred during its production. My typist, Mrs M. Gissop, worked speedily and accurately once the manuscript appeared. It is traditional for an author to thank his wife for her patience and sympathy. In this, if in nothing else, I am a fervent traditionalist.

M.E.R.

Editor's Preface

WHEN this series was established in 1968 the first editor, the late Professor M. W. Flinn, laid down three guiding principles. The books should be concerned with important fields of economic history; they should be surveys of the current state of scholarship rather than a vehicle for the specialist views of the authors, and, above all, they were to be introductions to their subject and not 'a set of pre-packaged conclusions'. These aims were admirably fulfilled by Professor Flinn and by his successor, Professor T. C. Smout, who took over the series in 1977. As it passes to its third editor and approaches its third decade, the principles remain the same.

Nevertheless, times change, even though principles do not. The series was launched when the study of economic history was burgeoning and new findings and fresh interpretations were threatening to overwhelm students – and sometimes their teachers. The series has expanded its scope, particularly in the area of social history – although the distinction between 'economic' and 'social' is sometimes hard to recognise and even more difficult to sustain. It has also extended geographically; its roots remain firmly British, but an increasing number of titles is concerned with the economic and social history of the wider world. However, some of the early titles can no longer claim to be introductions to the current state of scholarship; and the discipline as a whole lacks the heady growth of the 1960s and early 1970s. To overcome the first problem a number of new editions, or entirely new works, have been commissioned – some have already appeared. To deal with the second, the aim remains to publish up-to-date introductions to important areas of debate. If the series can demonstrate to students and their teachers the importance of the discipline of economic and social history and excite its further study, it will continue the task so ably begun by its first two editors.
