

**THE ALUMINIUM MULTINATIONALS AND THE
BAUXITE CARTEL**

MACMILLAN INTERNATIONAL POLITICAL ECONOMY SERIES

General Editor: Timothy M. Shaw, Professor of Political Science and
Executive Director, Later Pearson Institute for International
Development, Dalhousie University, Nova Scotia

The global political economy is in a profound crisis at the levels of both production and policy. This series provides overviews and case studies of states and sectors, classes and companies, in the new international division of labour. These embrace political economy as both focus and mode of analysis; they advance radical scholarship and scenarios.

The series treats policy-economy dialectics at global, regional and national levels and examines novel contradictions and coalitions between and within each. There is a special emphasis on national bourgeoisies and capitalisms, on newly industrial or influential countries, and on novel strategies and technologies. The concentration throughout is on uneven patterns of power and production, authority and distribution, hegemony and reaction. Attention will be paid to redefinitions of class and security, basic needs and self-reliance and the range of critical analyses will include gender, population, resources, environment, militarisation, food and finance. This series constitutes a timely and distinctive response to the continuing intellectual and existential world crisis.
