International Directory of Active Components Manufacturers

PREFACE

This is the first edition of a new directory detailing **Active Component** manufacturing sites throughout the world.

It comprises 30 country reviews - United States of America, Japan, 14 West European countries and 14 other major countries throughout the rest of the world. (No East European countries were analysed.) Within each of these 30 countries is a listing of manufacturing sites - the products they manufacture and relevant trade associations.

Within each product category there is a listing of each manufacturing site's address/telephone number/telex/employees/sales (where available). The accuracy and comprehensiveness of the information published in this directory is the best available at the time of going to press.

Clementson Electronic Services Ltd have been carrying out specific studies in this sector and have been monitoring all the active component statistics for the last ten years and are therefore well qualified to provide this information; neither the authors, nor the publishers can be held responsible for any action taken as a result of data and information published in this book.

All sales and trade values are quoted in US\$ millions (for ease of comparison) utilising the exchange rates quoted at the end of this directory.

It must be stressed that this publication relates only to active components and is a directory not a profile.
