CNC Part Programming Workbook

City and Guilds Co-publishing Series

City and Guilds of London Institute has a long history of providing assessments and certification to those who have undertaken education and training in a wide variety of technical subjects or occupational areas. Its business is essentially to provide an assurance that pre-determined standards have been met. That activity has grown in importance over the past few years as government and national bodies strive to create the right conditions for the steady growth of a skilled and flexible workforce.

Both teachers and learners need materials to support them as they work towards the attainment of qualifications, and City and Guilds is pleased to be working with several distinguished publishers towards meeting that need. It has been closely involved in planning, author selection and text appraisal, although the opinions expressed in the publications are those of the individual authors and are not necessarily those of the Institute.

City and Guilds is fully committed to the projects listed below and is pleased to commend them to teaching staff, students and their advisers.

Carolyn Andrew and others, *Business Administration Level I* and *Business Administration Level II*, John Murray

Chris Cook, *Assessor Workbook*, Macmillan

David Minton, *Teaching Skills in Further and Adult Education*, Macmillan

Graham Morris and Lesley Reveler, *Retail Certificate Workbook* (Levels 1 and 2), Macmillan

Peter Riley (consultant editor), *Computer-aided Engineering*, and associated Workbooks: *CNC Setting and Operation*; *CNC Part Programming*; *Computer-aided Draughting*; *Robot Technology*; *Programmable Logic Control*, Macmillan

Barbara Wilson, *Information Technology: the Basics*, Macmillan

Caroline Wilkinson, *Information Technology in the Office*, Macmillan

CNC Part Programming Workbook

Bernard Hodges

*Department of Engineering
Bournemouth and Poole College of Further Education*

*Consultant Editor: Peter Riley
Formerly Head of Department of Engineering Technology
Blackpool and The Fylde College*

Contents

Introduction	1
General note	2
How to use this book	3
Learning Assignment 1 Machine axes and datums	4
Zero datum shifts	6
Task 1.1 Datum positions	6
Task 1.2 Z datum position (milling)	7
Task 1.3 Tool length offsets	7
Learning Assignment 2 Setting up a component datum and the tooling	9
Setting up a component datum	9
Moving the work datum point	9
Entering the tool length offsets	10
Entering the tool radius	10
Task 2.1 Setting tool length offsets on a milling machine	10
Task 2.2 Setting tool length offsets on a turning machine	10
Learning Assignment 3 Line format and program structure	12
Conversational programming	13
Word address programming	14
Absolute and incremental programming	15
Task 3.1 Data format	16
Task 3.2 Machining a slot	16
Task 3.3 Task 3.2 in incremental mode	16
Learning Assignment 4 Input and edit functions	17
Task 4.1 Inputting a program	17
Manually writing a CNC program using the text editor of a CAM system	18
Task 4.2 Identifying features in a text editor of a CAM system	19
Task 4.3 Inputting a program for a square profile	19
Learning Assignment 5 Work holding and tooling	20
Task 5.1 Identifying work-holding devices	20
Tooling	20
Optimum cutting conditions	21
Task 5.2 Work holding and tooling for a given component	23
Task 5.3 Types of available tooling	23

Learning Assignment 6 Toolpath calculations	24
Cutter compensation	24
Task 6.1 Problem-solving using trigonometry	25
Learning Assignment 7 Planning a CNC program	27
Documentation	29
Task 7.1 Writing a program to include messages	31
Task 7.2 Documentation	31
Task 7.3 Identifying tooling commands	32
Learning Assignment 8 Canned cycles/macros	34
Canned cycles	34
Macros	35
Task 8.1 Identifying canned cycles	35
Task 8.2 Identifying macro programs on a CNC machine	35
Task 8.3 Programming a cover plate	35
Task 8.4 Writing a macro program	35
Learning Assignment 9 Starting-up procedures for a CAD/CAM system	37
Task 9.1 Starting on a CAD/CAM system	37
Learning Assignment 10 Operating parameters for a CAM system	38
Task 10.1 Starting on a CAM system	38
Learning Assignment 11 Using a drawing package	39
Task 11.1 Functions in the root menu of a CAD system	39
Task 11.2 Drawing exercises	39
Task 11.3 Drawing a base plate	40
Learning Assignment 12 Using a CAM system to produce CNC part programs	42
Task 12.1 Machining a profile; drilling and counterboring holes	42
Task 12.2 Drilling holes in a grid	44
Learning Assignment 13 Machining pockets	45
Task 13.1 Machining a profile and a circular pocket	45
Machining pockets using the 'freehand' milling command	46
Task 13.2 Using the 'freehand' milling command	46
Task 13.3 Machining a pocket with an 'island'	46
Learning Assignment 14 Machining slots	47
Machining slots by using a macro	48
Task 14.1 Machining slots using a CAM system	48
Learning Assignment 15 Complex profile with a spline	50
Task 15.1 Drawing a spline	50
Task 15.2 Machining a complex profile	50
Projects	52
Glossary	55
Index	57
