CNC Setting and Operation Workbook

City and Guilds Co-publishing Series

City and Guilds of London Institute has a long history of providing assessments and certification to those who have undertaken education and training in a wide variety of technical subjects or occupational areas. Its business is essentially to provide an assurance that pre-determined standards have been met. That activity has grown in importance over the past few years as government and national bodies strive to create the right conditions for the steady growth of a skilled and flexible workforce.

Both teachers and learners need materials to support them as they work towards the attainment of qualifications, and City and Guilds is pleased to be working with several distinguished publishers towards meeting that need. It has been closely involved in the planning, author selection and text appraisal, although the opinions expressed in the publications are those of the individual authors and are not necessarily those of the Institute.

City and Guilds is fully committed to the projects listed below and is pleased to commend them to teaching staff, students and their advisers.

Carolyn Andrew and others, *Business Administration Level I* and *Business Administration Level II*, John Murray

Chris Cook, *Assessor Workbook*, Macmillan

David Minton, *Teaching Skills in Further and Adult Education*, Macmillan

Graham Morris and Lesley Reveler, *Retail Certificate Workbook* (Levels 1 and 2), Macmillan

Peter Riley (consultant editor), *Computer-aided Engineering*, and associated Workbooks: *CNC Setting and Operation*; *CNC Part Programming*; *Computer-aided Draughting*; *Robot Technology*; *Programmable Logic Control*, Macmillan

Barbara Wilson, *Information Technology: the Basics*, Macmillan

Caroline Wilkinson, *Information Technology in the Office*, Macmillan

CNC Setting and Operation Workbook

Tom Renshaw

*Department of Engineering Technology
Blackpool and The Fylde College*

Consultant Editor: Peter Riley
*Formerly Head of Department of Engineering
Technology, Blackpool and The Fylde College*

Contents

Introduction	1
How to use this book	2
Safety note	3
Learning Assignment 1 Position machine axes	4
Task 1.1 Absolute and incremental positioning	5
Task 1.2 Checking table limits of travel	7
Task 1.3 Manual positioning of tool in all axes	7
Learning Assignment 2 Methods of guarding	8
Protecting the operator	8
Protecting the machine and/or workpiece	8
Task 2.1 Methods of protection on CNC machines	9
Task 2.2 Operating the machine Z axis lock	9
Task 2.3 Spindle motor protection on a turning centre	9
Task 2.4 Checking interlock guards	10
Learning Assignment 3 Machine datums	11
Task 3.1 Setting machine to datum position	12
Task 3.2 Re-setting machine override	12
Task 3.3 Transferring machine datum to workpiece datum	13
Task 3.4 Component location using work co-ordinates	13
Learning Assignment 4 Work-holding	14
Selecting clamps	14
Task 4.1 Component setting	15
Task 4.2 Component clamping	15
Learning Assignment 5 NC tooling	17
Task 5.1 Working practices	17
Task 5.2 Tool tip selection	18
Task 5.3 Tool identification	18
Learning Assignment 6 Tool changing	20
Manual tool changing	20
Automatic tool changing using magazines or carousels	20
Automatic tool changing using turrets	20
Task 6.1 Tool selection: turning	21
Task 6.2 Tool selection: milling	21
Learning Assignment 7 Tool offset facilities: turning	23
Programming information	23
Task 7.1 Setting a tool offset in the X axis	23
Learning Assignment 8 Tool length offsets: milling	25
Methods of tool offset measurement	25
Task 8.1 Setting TLO values manually on a machine	26
Task 8.2 Set TLO values away from the machine	26

Learning Assignment 9 Tool setting	27
Pre-setting	28
Setting on the machine (turning)	28
Qualified tooling	28
Task 9.1 Pre-setting tools using a fixture	29
Task 9.2 Pre-setting tools by measurement on machine	29
Tool nose radius compensation (TNRC)	30
Learning Assignment 10 NC program listing and analysis	31
Task 10.1 Program analysis	32
Task 10.2 Program efficiency	32
Learning Assignment 11 Input, edit and store data	34
Task 11.1 Data storage	34
Task 11.2 Data transfer	35
Learning Assignment 12 Program proving	36
Testing method 1: Dry run	37
Testing method 2: Step through block by block	37
Testing method 3: Graphic simulation	37
Task 12.1 Program proving	38
Task 12.2 Program proving and correction	38
Learning Assignment 13 Tape handling	40
Task 13.1 Tape editing	41
Task 13.2 Tape loading and re-winding	42
Learning Assignment 14 Tape preparation	43
Code standards for punched tape	43
Preparing the paper tape	45
Task 14.1 Tape preparation	45
Glossary	47
Index	49
