

The New Poor Law in the Nineteenth Century

Each volume in the 'Problems in Focus' series is designed to make available to students important new work on key historical problems and periods that they encounter in their courses. Each volume is devoted to a central topic or theme, and the most important aspects of this are dealt with by specially commissioned essays from scholars in the relevant field. The editorial Introduction reviews the problem or period as a whole, and each essay provides an assessment of the particular aspect, pointing out the areas of development and controversy, and indicating where conclusions can be drawn or where further work is necessary. An annotated bibliography serves as a guide for further reading.
