	<i>The Tables and Figures: Sources and Comments</i>	167
	<i>Index</i>	179

ACKNOWLEDGEMENTS

The work on which this book is based was commissioned by the Programmes Analysis Unit, a joint unit of the U. K. Atomic Energy Authority and the Department of Industry. The opinions and arguments found here are, however, entirely those of the author, and are in no way attributable to his sponsors.

A number of people have, at various points, made helpful comments and criticisms: Peter Jones, Keith Taylor and Ken Hill from the P. A. U.; almost all of my colleagues in the Science Policy Research Unit; and in addition Christopher Saunders, Guy Routh, Krishan Kumar and Bernard Cazes. The manuscript was typed, in its various stages, by Sylvia Richards and Melanie Hempleman.
