

# THE WORKING CLASS IN THE LABOUR MARKET

**CAMBRIDGE STUDIES IN SOCIOLOGY**

**Editors: R. M. Blackburn and K. Prandy**

This series presents research findings of theoretical significance on subjects of social importance. It allows a wide variety of topics and approaches, though central themes are provided by economic life and social stratification. The format ranges from monographs reporting specific research to sets of original research papers on a common theme. The series is edited in Cambridge and contains books arising from work carried out there. However, suitable books, wherever they originate, are included.

*Forthcoming titles*

**A. Stewart, K. Prandy and R. M. Blackburn:**

**SOCIAL STRATIFICATION AND OCCUPATIONS**

**K. Prandy, A. Stewart and R. M. Blackburn:**

**MOBILITY AND MILITANCY: THE WORK EXPERIENCE AND  
UNIONISM OF WHITE-COLLAR EMPLOYEES**

<i>Subject Index</i>	365

# List of Tables and Figures

## TABLES

2.1	Percentage of economically active males in certain occupations, Peterborough, East Anglia, and Great Britain, 1971.	38
2.2	Major employers in the Peterborough area, 1968.	43
2.3	Companies participating in the study and distribution of the sample.	45
3.1	Job characteristics, correlations.	64
3.2	Factor matrix of objective job scores, wages and hours.	70
3.3	Job characteristics: constructed measures and other variables, weighted and unweighted.	79
3.4	Factor matrix of objective job scores, wages and hours: Jobs weighted by number of incumbents.	84
4.1	Wages and hours, by firm.	89
4.2	Desirable job characteristics distinguishing firms.	93
4.3	Jobs in labour market available within 6 months of entry to a firm.	97
4.4	Difference in attractiveness between jobs requiring 6 months service and those directly available.	98
4.5	Jobs and workers exercising comparable skill to drivers.	101
5.1	Mean wages and workers estimates, by firm. Jobs available within 3 years of entry.	117
5.2	Desirable job characteristics distinguishing firms and workers' beliefs about these.	124
5.3	Reasons for liking or disliking 10 Peterborough firms.	126
5.4	Subdivision of "Job Content" Reasons in Table 5.3.	131
5.5	Persistence of reasons for liking or disliking 10 Peterborough firms.	137
6.1	Reasons for changing previous firms.	151

6.2	Reasons for enjoying present job and liking best job experienced.	154
6.3	Importance of job characteristics and persistent preferences.	160
6.4	Correlation of importance scores with preferences.	164
6.5	Satisfaction with aspects of work: means, standard deviations and contributions to general satisfaction.	169
6.6	The meanings of a "worthwhile" job.	173
7.1	Outdoor preference by outside work.	187
7.2	Outdoor preference by exposure.	187
7.3	Outdoor and autonomy orientations by job autonomy.	192
7.4	Wage orientations by job rewards.	198
7.5	Intrinsic job orientations by job rewards.	205
7.6	Congruence between orientations and rewards by attachment to present job.	215
8.1	Number of dependent children by economic orientation.	227
9.1	British-born and immigrants by age, length of service and works status.	248
9.2	British-born and immigrants: work rewards by works status level.	249
9.3	Work rewards by health.	258
9.4	Work rewards by qualifications.	261
9.5	Correlation matrix of employers' measures of worker quality, work rewards and control variables.	263
9.6	Partial correlations between employers' measures of worker quality and work rewards. Age, length of service in firm and in job controlled for (Healthy U.K. workers only).	265
9.7	Correlations between job level and work rewards.	271
9.8	Job level by father's job level (Healthy U.K. workers only).	273
A.III 1	Job factor measures.	328
A.IV 1	Background factors and orientations.	335

## FIGURES

6.1	Path model of job satisfaction.	172
9.1	Wages and use of mental ability and skill by age and seniority.	267

# Preface

The project on which this book is based is part of the sociological research programme of the Department of Applied Economics in the University of Cambridge. It was carried out with the help of a grant from the Social Science Research Council, and a small grant from the Engineering Employers Federation.

Large-scale fieldwork is only made possible by the friendly co-operation of many people. Our thanks go out to all of them. First and foremost we owe a debt to the management and workers of the nine participating organisations, those of Baker-Perkins Ltd., Bettles the Builders, British Rail (Peterborough District), Combex (and parent company Dunbee-Combex-Marx Ltd), Farrows (and parent company Reckitt and Coleman Ltd), Horrells Dairies, London Brick Company, Perkins Engines (and parent company Massey-Ferguson), and Peterborough Corporation. Well over 1000 people in these organisations gave generously of their time, knowledge and other resources. Many others in the town of Peterborough – including union officials, other managements, the staffs of the Employment Exchange and of the New Town Development Corporation – also gave us much help.

Our research team has also been numerous. The Department of Applied Economics has been our project's home, and most of its staff have contributed in one way or another to this book. Carol Stocking of the N.O.R.C. unit in Chicago helped in the early stages when we were studying the firms and setting up the interviewing programme. This programme was carried out with the help of Sheila Abrams, Paola Begey, Valerie Blackburn, Meg Brian, Kay Coe, Wendy Nicol, Rosemary Parker, Penny Pollitt and Mary Riddell, all of whom also helped in a number of other ways. Our data analysis was assisted by Margaret Clarke, not forgetting the staff of the creed room, while programming owed much to Mike Hughes, Roger Smith, Dr Joyce Wheeler and Dr Lucy Slater. For the typing and production of questionnaires, research instruments, and various drafts of this book we wish to thank the secretarial staff of the D.A.E. and also Linda Peachey of Essex University and Elizabeth O'Leary of the London School of Economics.

To our colleagues in the D.A.E., Ken Prandy and Sandy Stewart, we owe a large intellectual debt. The sharing of ideas, fieldwork experience and techniques of analysis between our various research projects has been so extensive that often we cannot remember where a particular idea originated. Other colleagues, especially in the Essex University Sociology Department and in the Stratification Seminar of the Social Science Research Council, have given helpful advice and criticism. We would like to single out especially Frank Bechhofer, John Goldthorpe, David Lee, David Lockwood, Howard Newby, Frank Wilkinson and Stephen Wood.

Despite all this, however, we take and claim responsibility for the contents of this book.
