Studies in Social Policy

'Studies in Social Policy' is an important new series of textbooks intended for students of social administration and social welfare at all levels. The books will be directly related to the needs of undergraduate and postgraduate students in universities, polytechnics and similar institutions as well as vocational students preparing for careers in a variety of social and other public services. The series will include the following topics:

the roles of different public and private institutions such as social services departments and building societies in meeting social needs;

introductory guides to new technical and theoretical developments relevant to the analysis of social policy such as political theory and the newly emerging specialism of the economics of social care;

contemporary social policy issues such as the use of charges in the delivery of social welfare or the problem of determining priorities in the health and personal social services.
