National Children's Bureau series

Editor: Mia Kellmer Pringle

This new series examines contemporary issues relating to the development of children and their needs in the family, school and society. Based on recent research and taking account of current practice, it also discusses policy implications for the education, health and social services. The series is relevant not only for professional workers, administrators, researchers and students but also for parents and those involved in self-help movements and consumer groups.

Acknowledgements

Firstly, we would like to thank our sponsors, The Buttle Trust, Noel Buxton Trust, Children's Research Fund, City Parochial Foundation, and an anonymous trust, for their generous support.

Secondly, we would like to thank all our colleagues at the National Children's Bureau who have had a hand in producing this report. Every Bureau publication is, to a greater or lesser extent, a joint venture, but there are some people we would like to mention and thank specifically. Peter Wedge has been involved throughout and given patiently and generously of his time, as has Ken Fogelman in the later stages. Harvey Goldstein was statistician to the project till he left the Bureau, when his place was taken over by Jenny Head. Ian Vallender and Biddy Cunnell have helped with the references and among the typists Roz Treadway, Celia Rodbard, Joyce Famosa, Bobbie Reddaway, Esther Mason, Judy Angus and especially Diane Haggis gave particular assistance. Mia Pringle, Joan Cooper, Elsa Ferri, Dougal Hutchison, Juliet Essen, Doria Pilling and also Jane Rowe (from ABAFA) read the main draft in record time and made many valuable comments.

Finally, we should explain that the authorship is joint in spirit rather than in time. Lydia came to the project when it received a six months' extension and took over from Jane a great pile of material, which forms the basis of this book. Jane had spent 16 months working on the project and continued to give some of her busy time till the end but Lydia is responsible for the book's final shape and contents. We are united in a common concern for our subjects and would like to offer our thanks and good wishes to all those who are in the National Child Development Study.
