Critical Human Geography

'Critical Human Geography' is an international series which provides a critical examination and extension of the concepts and consequences of work in human geography and the allied social sciences and humanities. The volumes are written by scholars currently engaged in substantive research, so that wherever possible the discussions are empirically grounded as well as theoretically informed. Existing studies and the traditions from which they derive are carefully described and located in their historically specific context, but the series at the same time introduces and explores new ideas and insights from the human sciences as a whole. The series is thus not intended as a collection of synthetic reviews but rather as a cluster of considered arguments, which are accessible enough to engage geographers at all levels of the subject in its development. It therefore reflects the continuing methodological and philosophical diversity of the subject, and its books are united only by their common commitment to the prosecution of a genuinely human geography.

I am grateful for the receipt of a John Simon Guggenheim Memorial Foundation Fellowship and a Wisconsin Alumni Research Foundation Fellowship from the Graduate School of the University of Wisconsin, Madison. The support from these foundations allowed me to devote the 1975–6 academic year to formulating and researching the problems discussed in this book. I want to thank the following individuals for reading earlier drafts of the manuscript and for offering excellent criticisms and most needed encouragement: Martin Cadwallader, Daniel Doeppers, Muriel Dury, Nick Entrikin, Fred Lukermann, Charles Mahaffey, Karen Sack, Yi-Fu Tuan and David Ward. I want to thank the following individuals and organisations for their copyright permission and co-operation: the Meadows Museum, Southern Methodist University, Dallas, Texas, for Portrait of Philip IV by Velázquez; Frau G.
