Islamic Environmental Systems Engineering

Macmillan International College Editions (MICE) are authoritative paperback books covering the history and cultures of the developing world, and its scientific, technical, social and economic development. The MICE programme contains many distinguished series in a wide range of disciplines, some titles being regionally biased, others more international. Library editions will usually be published simultaneously with the paperback editions.

Other titles of interest

- H. S. Murison and J. P. Lee *Housing in Third World Countries –
perspectives on policy and practice*
H. Enayat *Modern Islamic Political Thought*
S. Aziz *Rural Development – learning from China*
P. K. Hitti *History of the Arabs*

Islamic Environmental Systems Engineering

A systems study of environmental engineering, and the law, politics, education, economics and sociology of science and culture of Islam

Contents

Acknowledgements	xiii
1 The Quranic Spirit	1
Islam	1
Revelation and reason in the Quran	2
The scope and function of scriptural revelation	3
Succession of prophets, and culmination of scriptural revelation	3
Reason, empiricism, traditionalism, authority and freedom	5
Critique of pure reason	7
Reason and scriptural revelation are complementary	7
Axiological systematisation as methodology for apprehending the Quran	8
Quranic personal and social ethics: concept of man, nature, and altruistic humanism	9
2 Islamic jurisprudence: revealed law (<i>sharī'a</i>) and derived or substantive law (<i>fiqh</i>)	16
Introduction	16
History of Islamic law and civilisation	16
Medieval Islamic law	16
Decline of the medieval islamic civilisation: causes and consequences	18
Revival of Islamic law and culture	22
Methodology of Islamic jurisprudence	24
Sources of <i>sharī'a</i>	24
The Quran: primary source	24
The <i>Sunnah</i> or <i>Hadiith</i> (traditions or sayings of the Prophet Muhammad)	24
Fundamental principles of <i>sharī'a</i> : primary sources of <i>fiqh</i>	25
<i>Qiyās</i> (analogical reasoning)	26
<i>Ijmā'</i> (consensus)	27
Fundamental principles of <i>sharī'a</i> : secondary sources of <i>fiqh</i>	27
Pre-Quranic revelations	28
<i>Istihsān</i> (preference for the better)	29
<i>Istiślāḥ</i> or <i>al-Maṣlaḥa</i> (public interest)	29
' <i>Urf</i> , ' <i>ādah</i> , ' <i>āmul</i> (custom and usage)	30
Foreign sources of <i>fiqh</i>	30
Leniency (<i>taysīr</i>) under compulsion or constraint (<i>iḍṭirār</i>), or in dire necessity (<i>ḍarūra</i>)	30
The spirit and scope of <i>sharī'a</i> and <i>fiqh</i>	31
Implications of the sources of <i>sharī'a</i> and <i>fiqh</i> for development strategies: imitative-innovative assimilation	32

3 Islamic philosophy of knowledge and education: classification and outline of environmental engineering systems planning education	34
Introduction	34
Islamic philosophy of knowledge and education according to Al-Ghazali (AH 450–505/AD 1058–1111)	35
Classification of knowledge	35
Classification of knowledge by level of obligatoriness	35
Classification of knowledge by source	37
Classification of knowledge by social function	37
Blameworthy and praiseworthy sciences: criteria	37
Sciences blameworthy for sociological reasons	38
Sciences blameworthy for <i>sharīʿa</i> reasons: Al-Ghazali's critique and Ibn Rushd's defence of 'philosophers'	39
Praiseworthy 'philosophical' sciences	41
Educational and research planning	41
Discussion	42
Islamic philosophy of knowledge according to Ibn Khaldun (AH 732–808/AD 1332–1406)	44
Classification of knowledge	45
<i>Sharīʿa</i> -based (<i>sharʿiyya</i>), or transmitted (<i>naqliyya</i>), or positive (<i>wadʿiyya</i>) sciences	45
The 'philosophical' (<i>falsafiyya</i>), or rational/intellectual (' <i>aqliyya</i>) or 'natural' (<i>tabīʿiyya</i>) sciences	46
The <i>sharʿiyya</i> and 'philosophical' sciences: disentangling their confused inter-relations	47
Discussion	49
An Islamic classification of disciplines comprising environmental engineering systems planning	49
<i>Sharīʿa</i> -susceptive realm of environmental engineering systems planning	50
Universal rational realm of environmental engineering systems planning	51
Developing Islamic environmental engineering systems planning through imitative-innovative assimilation	52
Imitative-innovative assimilation in the <i>sharīʿa</i> -susceptive realm of environmental engineering systems planning	53
Imitative-innovative assimilation in the universal rational realm of environmental engineering systems planning	54
Islamic engineering education: the teaching of humanistic-social sciences in technical education to Muslim and non-Muslim students in the Islamic setting	56
Humanistic-social sciences stem of undergraduate engineering education in non-Islamic states	57
Humanistic-social sciences stem of Islamic engineering education: structure and subject matter	61
Islamic philosophy and sociology of science, and the history of medieval science and technology	63
Islamic ethics: inculcation of creative, altruistic professionalism	66
Transfer of science and technology, and transmission of <i>sharīʿa</i> -susceptive sciences	68
Discussion	70

4 Implications of Islamic jurisprudence for environmental engineering systems planning: the case of water law	72
Introduction	72
Implications of the sources of <i>sharī'a</i>	72
The Quran	72
The 'legal, binding <i>Sunnah</i> '	73
The <i>Majallah</i> : some possible <i>sharī'a</i> legal maxims pertinent to environmental engineering systems planning	76
Implications of fundamental principles of <i>sharī'a</i> : the primary sources of <i>fiqh</i>	79
<i>Qiyās</i>	79
<i>Ijmā'</i>	81
Implications of fundamental principles of <i>sharī'a</i> : the secondary sources of <i>fiqh</i>	82
<i>Istiṣlāḥ</i> or <i>al-Maṣlaḥa</i>	82
<i>Istiḥsān</i>	83
'Urf: Muslim customary law or traditional <i>fiqh</i>	84
Foreign sources (non-Muslim)	86
<i>Taysīr</i> under <i>Idṭirār</i> or <i>ḍarūra</i>	87
<i>Tadrīj</i>	88
Transition from Islamic customary (traditional) law to modern <i>ijmā'</i> legislation	90
 5 Islamic state and comparative politics: implications for environmental engineering systems planning	92
Introduction	92
Principles of the Islamic (<i>sharī'a</i>) state	93
Sovereignty	93
<i>Shūrā</i> and <i>Ijmā'</i>	93
Rights of citizens, Muslim and non-Muslim	94
Rights of the Islamic state	94
Special rights and limitations of non-Muslim citizens	94
<i>Ikhtilāf</i> , and the decisive consensus	95
Subsidiary principles on division of governmental functions: relation between legislature and executive	95
Interdependence of legislative and executive functions	95
Executive powers	95
Integration of legislative and executive functions	95
Judicial arbitration between legislature and executive	95
A model Islamic state: the Rightly Guided Caliphate (AH 11–41/AD 632–661)	96
Typology of states and political cultures	96
Review of Islamic political thought	96
Ibn Khaldun's Islamic typology of states and political cultures	97
Arbitrary rule, or 'natural' kingship (<i>mulk ṭabī'ī</i>)	97
Rational regimes (<i>siyāsāt 'aqliyya</i>)	97
The rational regime whose primary end is this-worldly public interest (<i>maṣāliḥ 'amma, istiṣlāḥ</i>)	98
The rational regime whose primary end is this-worldly special interest of the Rulers	98

The <i>sharī'a</i> regime (caliphate, imamate) whose end is this-worldly and other-worldly universal common good (<i>al-Maṣāliḥ al-Kāffa</i>)	99
Contemporary Muslim politics and Ibn Khaldun's typology	100
Comparative politics: methods and contents of decision-making	102
'Political' and 'social' democracy	102
The Islamic democracy <i>vs</i> 'political' and 'social' democracy	104
Implications of Islamic democracy for methods and contents of decision-making in environmental engineering systems planning	107
Response of political systems to public interests	107
Principles of decision-making methods: the <i>shūrā</i> (consultation) method of decision-making	111
Concepts of planning for environmental engineering systems	115
Discussion	116
6 Islamic welfare economics and its implications for environmental engineering systems planning	120
Introduction	120
Islamic economic welfare function: objectives, principles, and criteria	122
God's ownership of the universe	122
Universal human brotherhood, equality, and economic trusteeship	123
Mutual economic aid and co-operation	124
Methods of acquiring income and wealth	125
Ownership and enterprise: public <i>vs</i> private sector	127
Economic egalitarianism: redistribution of income and wealth through social spending	130
Criteria of social spending: public spending (taxation, and beneficiary charges), and private spending (charity, or philanthropy)	131
Fiscal planning and sociopolitical decision-making: the role of <i>sharī'a</i> democracy	134
Implications of Islamic economic welfare function for fiscal planning of environmental resources development	140
Allocation of resources	140
Economic stabilisation	141
Distribution of income	142
Implications of Islamic welfare economics for environmental engineering systems planning	142
Financing and pricing public projects and utilities	143
Conclusions	144
7 Imitative-innovative patterns of socio-cultural rejuvenation: Islamic ideological and technological 'modernisations'	146
Introduction	146
Basic patterns of culture: the ideal and model, and the actual or behavioural	148
Cultural relativism: an appreciation of alien cultural patterns	149
Political modernisation: 'Islamisation' or 'westernisation'?	150
Basic patterns of socio-cultural rejuvenation through imitation and innovation	152

CONTENTS

xi

Imitation-innovation processes in rejuvenation of early post-Quranic Islamic culture	152
'Islamicisation' of the West: imitation-innovation processes in Catholic-Protestant reformations and Renaissance	155
Universal patterns of imitative-innovative rejuvenation of empirical socio-cultural systems	161
Summary and conclusions: imitative-innovative rejuvenation of Islamic environmental engineering systems	164
Glossary	168
