WHITE-COLLAR WORK

CAMBRIDGE STUDIES IN SOCIOLOGY

Editors: R. M. Blackburn and K. Prandy

This series presents research findings of theoretical significance on subjects of social importance. It allows a wide variety of topics and approaches, though central themes are provided by economic life and social stratification. The format ranges from monographs reporting specific research to sets of original research papers on a common theme. The series is edited in Cambridge and contains books arising mainly from work carried out there. However, suitable books, wherever they originate, are included.

Contents

<i>List of Tables and Figures</i>	vii
<i>Preface</i>	ix
1 WORK INEQUALITY: RESPONSE AND REPRODUCTION	1
Expectations	4
Rewards	7
Job satisfaction and commitment to the organisation	10
Adaptations	14
Avoidance	15
Psychological withdrawal	17
Adjustments of the situation by individuals	19
Informal collective adjustments	21
Formal collective adjustments	23
2 RESEARCH STRATEGY	26
Collection of the data	26
Measurement	36
Analysis	40
3 SOCIAL BACKGROUND, REWARDS AND PERCEPTIONS	43
Social background	44
Social location and rewards	51
Perceptions of rewards	58
Income	60
Status	63
Security	66
Intrinsic job	67
Social interaction	71
Promotion	72
4 ORIENTATIONS AND REWARDS	78
The theoretical role of expectations and salience	78

Expectations	81
Salience	83
The relative salience of rewards	85
Determinants of orientations	87
Income	89
Status	93
Security	95
Intrinsic job	98
Social interaction	100
Promotion	102
Inter-relationships of expectations and perceptions	106
 5 WORK SATISFACTION AND INDIVIDUAL ADAPTATION	 114
Satisfaction	114
Determinants of satisfaction	117
Satisfaction and salience	122
Satisfaction and social referents	124
Total satisfaction	126
Individual adaptations to unsatisfactory conditions	135
Attitude to top management	135
Job attachment	142
Self-estrangement	144
 6 ATTITUDES TOWARDS COLLECTIVE REPRESENTATION	 151
Unionateness	151
Determinants of society unionateness	159
Determinants of enterprise unionateness	161
Commitment to the organisation	164
 7 CONCLUSIONS	 174
Summary	174
Social circumstances and individual adaptations	177
Market principles, class and social reproduction	183
 <i>Appendix I</i> Individual interview schedule and checklist	 193
<i>Appendix II</i> The calculation of 'expectations' from perceptions and gaps	201
 <i>Bibliography</i>	 204
<i>Index</i>	210

List of Tables and Figures

TABLES

2.1	Establishments in survey area (sample numbers in parentheses): location and industry by size	30
2.2	Major industries characterised by level on four indicators	32
2.3	Establishments approached and reasons for refusal, by industry and size	33
2.4	Abridged Cambridge scale	38
3.1	The process of educational attainment (path coefficients)	48
3.2	Social location and rewards and social background (path coefficients)	53
3.3	Influences on perceptions of status and security (path coefficients)	64
3.4	Influences on perceptions of intrinsic job (path coefficients)	69
3.5	Influences on perceptions of social interaction, superior and promotion (path coefficients)	73
3.6	Inter-relationships of perceptions (correlation coefficients)	76
4.1	Salience of work rewards	86
4.2	Influences on expectations and salience of income (path coefficients)	91
4.3	Influences on expectations and salience of status (path coefficients)	94
4.4	Influences on expectations and salience of security (path coefficients)	97
4.5	Influences on expectations and salience of intrinsic job rewards (path coefficients)	99
4.6	Influences on salience of social interaction (path coefficients)	101
4.7	Influences on expectations of promotion (path coefficients)	104

4.8	Inter-relationships of expectations (correlation coefficients)	107
4.9	Influences of perceptions on expectations: combined analysis (path coefficients)	108
4.10	Influences of perceptions and expectations on salience of rewards (path coefficients)	111
5.1	Influences on satisfactions: background and situational factors only (path coefficients)	118
5.2	Influences on satisfactions: combined analysis (path coefficients)	119
5.3	Satisfaction and salience (path coefficients)	123
5.4	Influences on total satisfaction (path coefficients)	127
5.5	Influences on total satisfaction (path coefficients)	131
5.6	Contribution of individual satisfactions to total satisfaction according to salience (path coefficients)	134
5.7	Influences on attitude to top management (path coefficients)	136
5.8	Influences on job attachment (path coefficients)	142
5.9	Influences on self-estrangement (path coefficients)	146
6.1	Mean enterprise and society unionateness scores by type of employment and occupational group	157
6.2	Influences on society unionateness (path coefficients)	160
6.3	Influences on enterprise unionateness (path coefficients)	162
6.4	Relations to a hypothetical variable of satisfaction	165
6.5	Relations to a hypothetical variable of commitment	168

FIGURES

3.1	Simplified path representation of determination of social location	57
4.1	Schematic representation of the structure of determinants of orientations	88
5.1	Non-linear regression of individual on total satisfaction	132
6.1	Schematic diagram of inter-relationships of outcomes: private sector	171
6.2	Schematic diagram of inter-relationships of outcomes: public sector	173

Preface

The study reported in this book is part of the sociological research programme of the Department of Applied Economics in the University of Cambridge. The original project was financed by the Social Science Research Council, whose support we should like to acknowledge with gratitude.

Survey research is ultimately made possible only by the willing co-operation of those who are interviewed, and so our major thanks must go to the many whose responses constitute the greater part of this work. We should also like to thank those responsible in the employing establishments – of which there are rather too many to be named individually – who gave not only their permission for the interviews to be carried out, but also their time and help in other ways.

Large-scale research is also a team effort, and the authors reporting the results depend very substantially on the support provided by many others. One person deserves special mention. In the early part of the analysis, especially, before the easy availability of program packages, we were given invaluable help and advice by Dr Joyce Wheeler. Among other things she produced for us a program (SORDENS) to carry out the disorderly interlocking referred to in Chapter 2. In addition we extend our thanks in general terms to all those who helped make the research and its reporting possible – from the interviewers who collected the data and those who helped work on it by offering their statistical and computing skills to those who provided typing, secretarial and general administrative services.
