To the small peasant farmers of the developing world, to students and colleagues at Wye College and to my own mentors, especially Peter Bauer, who in their different ways have been a source of inspiration and of whatever insight I possess.

Contents

Part I Agricultural Development at Sector Level

1	Changing Development Objectives and Agriculture	3
	Phase one: Raising production and incomes	4
	Phase two: Employment creation and redistribution	9
	Phase three: Basic needs	19
2	The Politics of Changing Development Objectives	25
	Some characteristics of the debate	25
	Some examples of the debate	31
3	The Anatomy of Farm Incomes and their Distribution	41
	Smallholder incomes and their distribution in Kenya	44
	Smallholder incomes and their distribution in Malaysia	50
	Smallholder incomes and their distribution in Sumatra and Northern Nigeria	50
	Smallholder incomes and their distribution in South Korea	52
	Some general comments	54
	Concluding observations	59

Part II Agricultural Development at Farm Level

4	Constraints and Objectives of Peasant Producers	67
	The constrained farm environment	68
	Objectives of peasant farm families	77
	Economic objectives and farmer decisions	78
5	The Peasant Farmer and his Decision Behaviour	98
	The search for a decision-making algorithm	98
	The peasant farmer as a maximiser	100
	The peasant farmer as an optimiser	105
	The elusive decision algorithm	108
6	Application of Farm Management Research to LDC Agriculture	110
	Role of farm management research (FMR) in LDCs	110

Changing aims and methods of FMR (A look at the toolkit)	113
Contribution of FMR to LDC agriculture	121
Some recent achievements of FMR	125
Problem areas of FMR	130
FMR and future needs	135
 7 The Farming Systems Approach to Adaptive Research	 137
Farming systems research (FSR)	137
FSR procedure	142
Observations on FSR	153
 8 Mechanisation and Peasant Agriculture	 161
 Part III Agricultural Development at Project Level	
 9 The Project Approach to Development	 177
Design and appraisal of agricultural projects	183
Project costs, size of holding and target farm income	186
Some project management issues	193
 10 Project Management, Monitoring and Evaluation	 210
Definition and purpose of monitoring	210
Monitoring and evaluation (MOE)	213
Monitoring and project objectives	214
Monitoring indicators	215
Monitoring project operation, performance and impact	216
Monitoring project staff performance	220
Resistance to project monitoring	222
Practical problems of monitoring	223
An M & E system checklist	227
 Notes and References	 240
Appendix: Book Reviews	259
Index	271

List of Tables

1.1	Growth rates of food production by developing country regions, 1950-80	6
1.2	Distribution of holdings by size	16
3.1	Gini concentration ratios for small-farm income distributions by ecological and provincial zones, in Kenya, 1974-5	45
3.2	Smallholding farm income distribution, per hectare, by farm size and zones, Kenya, 1974-5	47
3.3	Income distribution of farmers on Mwea Irrigation Scheme, Kenya	48
3.4	Distribution of farm and household income, by farm size, on Muda Irrigation Scheme, Malaysia, 1972-3	49
3.5	Distribution of farm and household income, by farm size, of rice farmers in Lampung Province, Sumatra, 1977	51
3.6	Net farm and household incomes (in Naira) and Gini ratios in three Northern Nigerian villages, 1974-5	52
3.7	Farm household income by farm size, South Korea, 1965-76 ('000, 1970 Won)	53
3.8	Preliminary estimates of Gini coefficients for South Korean agricultural households, 1964-75	53
3.9	Annual growth rates of farm household income by farm size (ha), South Korea, 1965-76 (using 1970 constant prices)	54
3.10	Percentage distribution of holdings by household income group and selected agro-ecological zones	57
4.1	Average and marginal returns per hour of labour (shs/acre)	84

4.2	Effects of delayed sowing on yield of cotton (percentage of yield from that of optimum sowing date)	86
4.3	Coffee yields and gross margins, showing response to grass mulches	87
4.4	MV and TV rice yields (tonnes/ha), Philippines, 1966-7	96
6.1	Factors relating to farmers growing Aromatic and Virginia tobacco in Tanzania	114
7.1	Cross-tabulation of type of seed-bed and time of planting	150
7.2	Sample table of the incidence of climatic risk expressed by farmers in a tropical maize area	151
7.3	Crop calendar establishment and usage, percentage of plantings	156
7.4	Farmers' planting sequence and priorities	158
7.5	Months of hardest work on Serenje farms	158
9.1	Land use by farm size on settlement schemes, 1967-8	189
9.2	Tapping frequency and optimum size of rubber smallholding	190
9.3	The development of rubber with intercrops	193
9.4	Capital debt positions of settlers with and without intercrops	194
