Critical Human Geography

'Critical Human Geography' is an international series which provides a critical examination and extension of the concepts and consequences of work in human geography and the allied social sciences and humanities. The volumes are written by scholars currently engaged in substantive research, so that, wherever possible, the discussions are empirically grounded as well as theoretically informed. Existing studies and the traditions from which they derive are carefully described and located in their historically specific context, but the series at the same time introduces and explores new ideas and insights from the human sciences as a whole. The series is thus not intended as a collection of synthetic reviews, but rather as a cluster of considered arguments which are accessible enough to engage geographers at all levels in the development of geography. The series therefore reflects the continuing methodological and philosophical diversity of the subject, and its books are united only by their common commitment to the prosecution of a genuinely human geography.

Acknowledgements

This book was originally to have been written with Steve Jones. Though Steve had to drop out of the project my first debt is to him, and to his burgeoning family, for continued support and friendship. I am also indebted to Ben Farmer, Derek Gregory and Ron Martin for reading through the entire text in draft form, and to Alan Gilbert, John Harriss, Gerry Kearns and Derek Reeve for reviewing particular draft chapters. All of them offered valuable comments and whilst I alone am responsible for the book's thesis I hope they will recognise the imprint of at least some of their remarks. I must also thank Stephen Pratt of the Geography Department of Huddersfield Polytechnic for his help in drawing the diagrams.

Finally, my greatest thanks go to my family: to my parents, to Jane and Dave, to my wife Joan Simms, and to our cat Hattie. One of them, at least, promises to be a silent critic.
